Fordson
TRADE MARK
Fam Tractor

When Henry Ford sabout building the Fordson tractor, he had a thorough understanding of juwhat it should be and what it should do. His early life on the farm gahim a deep insight into the daily life of the farmer; his mechanical genisaw the type of tractor needed. And for more than twelve years he eximented over more than 7,000 acres of land in different kinds of soil, widifferent crops.

So he built the Forn. It is so simple that a school-boy can operate it. It is low in first cost. It is lowest in operating cost and Fordson parts and Fordson service aralways to be had promptly frohe dealer.

The Fordson is a ritable investment. It can based every working day in theear. It is an inexpensive powplant and it will lighten your rk.

Made by Henry Fo and Son, and sold by—

A "TITAN" 10-20 for $1,000.00

*The Best Tractor Ever Offered for the Money*

*When you operate a Titan 10-20 pulling 3 plows, you are doing 50 per cent more work than the average 2-plow outfit.*

*Government investigation proves the 3-plow tractor to be the most economical for the farmer to use.*

A STATEMENT like this requires some explanation to be fully appreciated. We claim that the Titan 10-20 at the price of $1000 is the best farm tractor ever offered for the money. We believe it is far superior, from the farmer's standpoint, even to many that sell at a much higher price.

A DURABLE ENGINE

The engine is powerful yet simple in construction. It will stand up under hard work day after day and be ready to go when you want the work done. The slow engine speed insures endurance and service.

PULLS THREE PLOWS

The Titan 10-20 is a 3-plow tractor under the average soil conditions found in this country. In extremely heavy or sticky soil it is sometimes advisable to use only two plows. The facts are that the Titan 10-20 will pull as many plows as any other tractor of equal rating and considerable more than most of them.

This makes the cost per plow of the Titan 10-20 very reasonable. In fact much less we believe than any other tractor on the market. Some tractors sell for less money but they produce less power. Power is what does the farm work when you invest in a Titan 10-20 you get more power for the money than in any other make of tractor.

SIMPLE CONSTRUCTION

The Titan 10-20 is constructed throughout in such a simple way that anyone with ordinary intelligence can quickly learn the purpose of the various parts.

STURDY

The Titan 10-20 is made of the best materials. It is properly designed and carefully built. It has sufficient power to meet the requirements on the average farm.

STEADY SPEED

The fly ball throttle governor controls the speed and keeps it uniform at all loads. Titan 10-20 power is ideal for belt work because it is smooth running and steady.

EASY TO START

The Titan 10-20 is easy to start because of its simple construction.

ACCESSIBILITY

Great care has been taken in designing the various parts to make them well protected from dust, dirt and grit. In every case ample means are provided for making the part accessible.

GUARANTEED IN WRITING

The Titan 10-20 is guaranteed in writing not only in regard to material and workmanship, but as to its ability to operate on kerosene (coal oil), distillate (39° Baume) or gasoline, whichever you can buy at the lowest price.

UNEQUALED TRACTOR SERVICE

The Titan 10-20 is handled by thousands of dealers located in all sections of the country. In case you should need extra parts or expert assistance, they will be promptly forthcoming from one of our dealers or from one of our 92 branch houses.

We also sell the famous I. H. C. 8-16 two-bottom tractor which we strongly recommend for farmers who do not have heavy enough work for the 8-20.
