

The Gossiper

One great trouble with the country is, there are too many workmen trying to get jobs picking cherries in the winter time and shoveling snow in the summer time.

Some business men are so solicitous for the welfare of the farmer they lay awake at night trying to frame up some plan to "soak" him when he comes in to trade. This, no doubt, is done in order to relieve him of his surplus cash and to guard him against the possibility of being robbed.

Republican spellbinders and a few disgruntled Democratic corporation lawyers are beginning to practice their political speeches for the next campaign. Of course, their oratory will be directed against President Roosevelt and the "New Deal," and will have about as much weight with the voters as a preacher's salary at tax-paying time.

New York, according to press reports, is full of old men 60 years of age, and more, who are just beginning to "grow their wild oats." Here is a good place for the government to get busy and plow 'em all under.

The movies must have become pretty rotten when such men as Walter Winchell join the movement to "clean house." Walter should know all about them as he has seen much through various "keyholes."

The New Jersey man who wants to marry one of the Siamese twins may be taking quite a risk in knowing which one he married. He is probably not particular as to which one he gets, and feels that after he is married it's up to the other twin to look out.

France wants to borrow three billion francs. We have about fifty thousand we bought after the war and will be glad to loan them, provided, of course, she puts up an equivalent amount of cash in advance, as security.

"The alphabetical crowd is doing its best to transform us all to ragged individualism." — Muncie Star. Oh, yes! H-O-O-V-E-R! Then "Ragged Individualism," followed naturally by "Ragged Individualism." Here is one part of the alphabet we seldom hear mentioned.

"When the bloom is one the eye," it is much more pleasant to look upon, than when the eye begins to bloom on some fellow's nose.

It requires a lot of "gall" for Republican editors and writers to attempt to discredit the present administration and its efforts to improve business conditions, after what happened during the last two years of Hooverism.

New stories are constantly coming to the front concerning the great emancipator, Abraham Lincoln, the latest one being that he kept a saloon at New Salem, Ill. When it comes to swallowing this one, we feel somewhat like the Irishman who once remarked: "Not more than half the d—n lies they tell about the Irish are true."

Isn't it great, when one comes to think about it, that there was no tax on soup or apples, from 1930 to 1932? Of course, we must give credit to the Republican party for this great blessing, as well as for the necessity for soup houses and apples.

The way the British government keeps sticking its nose into the affairs of Germany, it would not be surprising to hear at any time, of Adolf Hitler "tipping John Bull over the head with a 'lickery 'ammer 'andle."

Stage Attractions At Rivoli Theater

Stage attractions are not a regular feature at the Rivoli Theater. Productions behind the footlights are not a standard policy; but whenever any are booked in, one may be assured that such production is one of merit and worthy of consideration. And so it is that next Sunday and Monday, the Rivoli Theater will present a feature of the WLS radio station which is as popular over the air as any other program ensuing from that station—the WLS Merry-go-Round. The photoplay, "Kiss and Make Up," is the other attraction. Cary Grant and Genevieve Tobin have the leads, while Helen Mack and Edward Everett Horton also appear in the picture. It is the story of a modern temple of beauty, directed by a handsome young doctor, Cary Grant. He falls in love with Miss Tobin, marries her, and suddenly awakens to the realization that she is just a heartless cosmetic creation.

Mayor Dale Says Lawyers, Judges Actually Human

Threatens to Write Book Entitled "Judges I Have Met," in Which He Will Devote Entire Chapter to Judge Bob Murray—Intimates Gray Will Shelve Muncie Man.

(By George R. Dale.)

As stated last week, I attended the meeting of the State Bar Association at the Spink-Wawasee Hotel on the north shore of Lake Wawasee.

Although it may be news to some of the readers of The Post-Democrat, lawyers and judges are actually human. But you've got to get 'em out on a lake, and away from the courthouse to find it out.

Judge Murray wasn't there, at least he wasn't there when the writer was mingling with the where-abouts and wherefore boys, but if he had he would not have played the part of the big, bad wolf, and talked about sending members of boards of safety to jail, and so forth.

I spent two hours among the lawyers, from all over the state. Met a number of judges I know and told them I was preparing to write a book about "Judges I Have Met."

And speaking about judges, Muncie is now getting a good dose of what judges can do and keep their faces straight while they are doing it.

Muncie is normally Republican and it has been the custom to fire all Democrats and give deserving Republicans the political jobs.

Threatens Safety Board. Like a big green pea I followed the rule when I became mayor and nine firemen who were fired brought suit and Judge Murray ruled that they were illegally fired, ordered their reinstatement and payment of back salaries amounting to something like \$69,000.

The Star quoted the judge's words: "I don't know whether he said the things ascribed to him, but he was quoted as saying that he would send my board of safety to jail if they refused to obey 'orders' and that he could not be held responsible if 'somebody made a fool of himself.'"

I wonder if the judge meant me. Whether he did or not I am inclined to plead guilty. In the beginning it should have occurred to me that it was the height of folly for a Democrat mayor to cause the dismissal of Republicans from the public payroll.

Judge Murray is the Republican candidate for Congress in the Tenth district. In the same issue of the Star that quoted the judge's alleged "fool" remark, he was quoted as saying in a political speech in Randolph county that he wanted to go to Congress to help kill the "crazy New Deal."

Intemperate assertions are neither becoming to the bench nor the political soap box. If judges are to be the final word in the conduct of municipal affairs, then I am more than pleased to announce that my tenure of office expires the first of next year.

What Finly Gray Will Do. And I might say that Bob Murray also will become a private citizen at the same time, for Congressmen Finly Gray will take Bob like Grant took Richmond.

The people of the Tenth Congressional District like Finly Gray. They have confidence in him, they distrust Bob Murray, and will record their preference at the polls in no uncertain manner.

If I ever get that book completed on "Judges I Have Met" I am going to devote one chapter to Bob Murray, who did not resign from the bench when he became a candidate for congress and who finally got the political licking that he has had coming to him for a long time.

Very Good Reasons

"You want me to raise your salary, eh?" growled a boss to his employee. "Give me at least two good reasons."

The employee gazed meekly at his employer and murmured, "Twins."

AN IRISH DISPUTE

"Ten stitches did the doctor have to put in my husband after the fight with your old man last night?"

"Ten, was it? Well when the doctor seen me poor husband carried in, says he: 'Has anny wan got a sewing machine?'"

DANGER AHEAD

The train had stopped on the line, says an English paper, and the guard was tired of answering stupid questions.

"What's the matter," guard? came yet another query.

"The signalman up there has got red hair," replied the guard, "and we can't get engine to pass the box."

PROFITING BY INVESTING IN GOOD LIVING

Few Better Slogans Than "Build Now—Repair Now."

To buy a modern home, small or large, expensive or inexpensive, is to make an investment in better living.

Construction has stood still the past few years, ever since it tumbled to the depths with depression, but contractors, designers, builders and equipment manufacturers have continued to improve their services and commodities.

They have given us not only more comfort, but more efficient homes—homes in which four or five rooms do the work that six rooms used to do. They have given us new ideas of heating, ventilation, air-conditioning, furnishing, designing.

"Marvelous" Equipment. They have given us mechanical equipment which can be adequately described only by the word "marvelous"—equipment which is more-than-human in doing work in- expensively and quickly, that used to take back-breaking hours before a furnace or over a washboard.

And, to cap the climax, building costs are still well below normal levels. There are plenty of skilled and unskilled workmen. When we build we give men jobs and not only get a bargain for ourselves but advance recovery by stimulating purchasing power and industrial production.

There are few better slogans than "Build Now—Repair Now!"

Capital Comment

A concerted movement toward sweeping the dirt out of motion pictures is under way. We are reminded constantly that times have changed, and upon such grounds as candor, realism and the spread of knowledge, are informed that speech, the print and the films should have full sway. It may be that matters formerly avoided in ordinary conversation, writing and illustration might profitably have a little more light thrown on them than heretofore. Upon the other hand, there are few parents who, on many occasions, have not taken growing son and daughters to moving picture shows from which they wished they had stayed away. The general impression is that "there ought to be a law." It would take a little research to find out the particular person who started the film-house-cleaning, but when found, he should be given a large measure of approval and praise, filled up and running over. If his efforts

The Beauty of The Stars

"I have observed that a woman who cares exquisitely for her person, respects herself—and her admirers do likewise."

—Lenthéric

I Daytime Fragrance

D'Aureville, the French Poet, used to lead a lobster on leash about the streets of Paris. When asked why he engaged in such a strange practice, D'Aureville replied "because a lobster does not bark and knows the secrets of the deep."

Presumably the French at that time were interested in the deep and the phenomenon of barking seems to have mattered to them. Strange preoccupation! If the lobster knew the beauty secrets of the movie stars, now, that would be different. There might be one toddling on every block. Or do lobsters toddle?

The chief secrets of the glamorous ladies of Hollywood come from Paris, from the Rue St. Honoré where, for generations, perfumers and cosmeticians have built the aesthetic philosophy of the alluring physical personality. For their receptiveness to this philosophy of "caring exquisitely for the person" and their interpretation of it in American terms, the stars of the stage and screen have performed a noble service to the American woman. Of course, much of the beauty technique remains secret, the relation between a lovely woman and her perfume being as confidential as with her physician. Still, in Hollywood, there are enterprising agents who have some of the secret-culling perquisites of the lobster. So, if we eavesdrop a little, we may learn. . . .

We have heard, for example, that lately the loveliest ladies of Hollywood have possessed a new, elusive daylight charm—fresh as the spring breezes, fragrant as spring flowers, and quite distinct from their evening glimmers. It is the new "daytime fragrance," the light, floral bouquet derived from the odor of midday's favorite evening perfume. Refreshingly cool, delicately scented,

Clara Lou Sheridan, lovely Paramount player, who is the embodiment of all that is fresh and youthful.

quietly persistent, it is the essence of well-bred femininity in its daytime mood.

Born of a wedding of an exquisite perfume and a fine Eau de Cologne, this lingering fragrance constitutes a "silent messenger" of great refinement, one moreover which enables a woman to preserve the consistency of her perfume personality.

The six leading perfumes—Le Numero Douze, Miracle, Forêt Verte, Lotus d'Or, Asphodèle and Au Fil de l'Eau—all have their daytime counterparts in a bouquet of the same name. Loveliness accessible without extravagance.

Here is the way to employ the bouquet: In the morning, after bath or shower, apply freely to the body. Spray it or pat it on with the hands. It may also be sprayed on lingerie or handkerchiefs.

State Properties are Valued \$20,000,000

Department of Conservation Has Many Projects Under Consideration, Which Will Give These Lands Constantly Increased Value.

Supervision and operation of the state possessions—parks, forests, fish hatcheries, game farms and memorials which have an inventory value of sixteen million dollars and a replacement value in excess of twenty million dollars, is one of the major functions of the department of conservation, Virgil M. Simmons, commissioner, declared in a recent address.

These properties, belonging to the people of Indiana and operated for their present and future benefit, cover an area of more than 55,000 acres while offers of additional ground are being received almost weekly, he stated. Several hundred acres of land have been accepted for the state within the past year while other offers are being considered.

The department of conservation now supervises and operates five state forests, five fish hatcheries, three game preserves, eleven state parks and five state memorials. Along with the performance of this

task the department has developed a definite, long-range conservation program for Indiana which will give these properties constantly increasing value. This program, Mr. Simmons pointed out, calls for more than the occasional acquisition of land and efforts to preserve the fish and game which were our heritage. It is based on the needs of present and future generations and means developing an appreciation of nature and the out-of-doors, utilization of land for the conservation in the newer, broader application of that term, and the recognition and observance of progress in conservation methods and demands.

Importance of the state possessions in the daily life of the people of the state, he continued, was shown by records of the past year which show that more than 650,000 persons visited the state parks while over 150,000 visited state forests and still other thousands inspected the fish hatcheries operated by the department.

Seventh Street journey will carry him past the site of Fort Stevens, marked by a boulder monument. The view along either route should remind him that Washington was not always the peaceful community that it is today. Seventy years ago this month, the Confederate forces met the Federal troops at the Monocacy, and swinging around to the North, made things uncomfortable by appearing at Fort Stevens, a few miles from Potomac. President Lincoln went out to watch the scrimmage, and Fort Stevens is remembered as one of the few places where the Chief Executive was under fire. The successors of Mr. Lincoln may not have heard the whistle of actual war-time bullets, but they did not escape the volleys of sharp criticism discharged in their direction.

Thousands of Citizens View Pool

Credit for Beauty and Capability of "Swimmin' Hole" Goes to George (Bud) Dale, Jr., Assistant City Engineer — Lasting Monument to Present Administration.

The new Tuhey Park municipal swimming pool was opened for public inspection last Sunday and Monday, with thousands of citizens and visitors attending the opening program and patronizing the pool beginning Tuesday, July 17. This improvement to the city of Muncie, sponsored by the Dale administration and built at a very low cost to the city, since it was constructed as a CWA project with the Federal government paying for all labor, has received much commendation from all who have visited the pool.

Assistant City Engineer George R. Dale, Jr., designed and supervised the construction of the entire project, which is 187½ feet in length, 75 feet in width from the deep water end to the fence-dividing the children's wading section, and from this point it is 100 feet in width. The depth of the pool ranges from 1 foot to 9 feet and will accommodate approximately 1,600 bathers. An additional feature to the all cement swimming pool is a sand beach and playground equipment constructed 150 feet long and 70 feet wide. The bath house is completed of stone masonry and

fully equipped with shower baths, check rooms, concession stands, and all convenient improvements.

A Thing of Beauty. The great beauty of the entire project is marked with beach umbrellas, swings, tables and all modern swimming pool equipment such as diving boards, slides and the finest of filtration plants. Adequate parking facilities are being made with West North street being fully improved through the park and the boulevard paved with 60 feet in width. The landscaping with shrubbery and sowing of grass under the supervision of the city park department, has and will add even more beauty to the entire park.

At night the pool and grounds are effectively lighted so as to accommodate evening bathers. The splendor of it all may well be accredited as another worthwhile improvement to the city of Muncie by Mayor Dale and his administration, has reported receipts from its operation for the first three days, Tuesday, Wednesday and Thursday, at a total of \$493.26. All receipts of the municipal pool will be accredited to the park fund of the city and with the central location, together with the complete modernization and attractiveness of the project, it is expected that

MEMORY BRINGS BACK THOUGHTS OF THE LONG AGO

By R. M. Hofer. I was recently in the oldest bank in the west, the Wells Fargo Bank and Union Trust company, in San Francisco. It was established 83 years ago. Its name conjures up visions of the Pony Express, the old Wells Fargo Express company and the days when California represented a gold miner's dream.

On entering this bank one is impressed with the fact that it is a bank, not a financial department store. The officials sit at ordinary desks such as might be found in the back room office of any busy grocery, meat market, or newspaper office. They indicate long use and lots of service and no money wasted on superficial trappings.

It was reassuring to talk to Mr. F. L. Lipman, the president. He doesn't think the country is going to the dogs but he does think that a lot of unsound practices must be thrown to the dogs. He expressed the opinion that much more is involved in operating a bank than just hiring a manager. Tradition, character and experience which are essential to sound management, cannot always be "hired" on the spur of the moment. They are developed in an institution.

Banking Not Just a Job. After talking to Mr. Lipman, one feels that he knows every move that is being made in his bank and that to his aides banking is a serious profession, not just a job.

Sitting in Mr. Lipman's office and watching the wheels go round, strengthens one's confidence in the fact that the character, ambition and enterprise which built America industrially, socially and spiritually, still underlie our economic structure.

Conservation may be temporarily crowded out of sight by the "Show Off" Governmental meddling and pampering may be used to nurture or maintain the unsound or uneconomic enterprise. But underlying all superficials, stand the industries and institutions with character like the Wells Fargo bank. They support our whole business structure with or without legislation and because they are founded and operated on sound principles with which passing fancies, experiments, depressions and boom times have little or no part.

The country can be thankful that such character still exists throughout the land.

Here, There, Everywhere

The President's plan to inaugurate a vast program of slum eradication is the cause of a large amount of verbal and printed comment, just at present, and most of that comment is favorable to the general idea embodied in that plan.

This writer, for one, is decidedly in favor of eliminating slums, both rural and urban, and believes that such a step would be to the benefit of society in general. But he does not subscribe to the belief, so often expressed in recent editorials, that vice and crime would automatically cease to exist immediately upon our doing away with slums. Nor does he, for a single instant, believe that all of the present-day denizens of our worst districts would be transferred to new living quarters in different parts of town.

However, there is not much doubt that the younger generation of slum dwellers, if taken away from their sordid environments, would to a large extent, benefit by the change and become more useful citizens.

The human element must be taken into consideration, and we may expect several generations to elapse before the full benefits of the present undertaking becomes apparent.

It is almost the work of the ages to alter habits and we should remember that many of our slum-bred gangsters changed but little upon moving into large suites in our leading hotels. But all those facts should not discourage us from undertaking to eliminate slums. It will pay eventually.

It seems to have but recently occurred to some of our noted criminologists, that the offering of a substantial reward for information leading to the arrest of John Dillinger, might be of material assistance in bringing about his speedy apprehension.

Nearly every police officer in North America, above the rank of township constable, has long been aware that the offering of a large reward, with a promise not to divulge the true source of the information, usually leads to the betrayal of the fugitive by some of his own kind.

The chief of police of Suedunk, Pa., could tell our noted Washington investigators that Mr. Dillinger now stands an excellent chance of being quietly turned in, either by some of his own lady friends or by some of their girl friends who are "in the know," if not by almost any of the assorted shady characters upon whom he is forced to depend for refuge.

About the surest way for proprietors of present-day theatrical enterprises to wind up playing to empty seats, would be for them to attempt to make "stooges" out of members of modern audiences, by ballyhoo in the news reels.

Operators of attractions on the legitimate stage, possessed of the fixed idea that all small city audiences were packs of "rubes," killed their own lucrative business "on the road" by imposing all kinds of pitchmen and small-time "grifters" upon citizens who had assembled to see the show.

After about so many experiences in purchasing a ticket and attending an advertised attraction, only to have a large part of the evening taken up with the harranguing of corn doctors, gentlemen selling chances on tin watches and the ballyhooing of such entertaining individuals as Chief Lone Eagle the patent medicine man, while song book pluggers bellowed up and down the aisles incessantly, the average citizen simply stayed away from the theater.

In so far as the alleged sinfulness of present-day movies are concerned, we believe that feature has been greatly exaggerated, largely due to overly enthusiastic press agency, which depicts the sinfulness of some rather tame pictures.

Eminent prelates and stern moralists seldom attend movies, that are widely advertised as sinful and usually assume that such theatrical productions live up to the three-sheeting.

In our opinion, if the use of scorching adjectives were abolished in the advertisements and some of the near-nude pictures of female stars were dragged in from in front of the theaters, most of the current agitation would automatically disappear.

Of course, now and then a really off-color picture does appear. We are beginning to wonder if some of our noted municipal authorities could not profitably borrow some ideas used by the poker-faced gentlemen who run the noted bathing and gambling resorts at Hot Springs, Ark., in protecting that sporty city from the depredations of visiting sharpshooters and assorted confidence men.

Huge sums of money change hands daily over the gambling tables of Hot Springs, and no berries are ever attempted in that city since the optimistic gunmen

SPEED VERSUS POCKET BOOK, MR. MOTORMAN

Fast Driving Hard on Gas, Tires and Other Mechanism

Excessive pressure on the accelerator has sent thousands of automobile passengers, drivers and pedestrians hurtling to destruction, and is responsible for more than half of our 30,000 deaths and \$50,000 injuries annually.

Thus far, humanitarian considerations apparently have not impressed drivers as reason for exercising greater care in regard to speed. However, recent investigations of Clarence P. Taylor of the Massachusetts motor vehicle department, constitute a serious challenge to the average driver's pocketbook, and may therefore bear greater weight.

It is vastly more expensive, Mr. Taylor found, to operate an automobile at speeds in excess of 30 miles an hour. The faster a car goes beyond that rate, the more gas it consumes per mile—at 75 miles per hour over twice as much gasoline is required to go the same distance as at 20 miles per hour. In addition, wear and tear on the tires and on the car mechanism itself is greatly increased, so that a motor vehicle habitually driven at high speeds wears out much

HELPS FOR BUSY HOUSEWIVES

BRAZIL NUTS ARE CAST IN A NEW ROLE

PHOTOS BY AIKINS

Brazil Nuts have long been regarded as a popular confection and holiday tidbit, but to find them mixed in as a basic ingredient of a cool and "chewy" new summer salad is an experience you will surely want to enjoy.

Introduced by Theophile, maitre d'cuisine of the Sherry Netherlands, New York's most exclusive hotel, Brazil Nut salad is winning favor on the luncheon tables of many smart hostesses. Like so many other dishes which have been prepared according to laws which govern the highest French cuisine, this intriguing new salad conveys an entirely new taste sensation. Despite the distinctiveness of such ingredients as curry powder, pimento and pineapple, you will be unable to single them out if you follow Theophile's recipe to the letter.

An interesting point to be noted, when mixing this salad in your own kitchen, is the lack of olive or other oil in the dressing. This omission is considered advisable because of the abundance of oil in the nuts.

Success which followed the first servings of the salad, led its creator to experiment with Brazil Nut desserts. Theophile's recipe for Burnt Brazil Nut ice cream, a rich and delicious party treat for eight, follows that of his famous salad.

Brazil Nut Salad Theophile

One-half pound Brazil Nuts
Pimento
One small pineapple
Curry powder
One lemon
Pinch salt
One-quarter pint heavy cream
Hearts lettuce

For a dish for four persons, first shred one-half pound Brazil Nuts. Now cut up a small pineapple in julienne; that is to say, in lengths of an inch or more, sliced into fine strips. Next cut up some pimento in large dices, add a dash of curry powder—no more than can be put on the tip of the blade of a pocket knife—and add the juice of a lemon, a pinch of salt and one-quarter pint of heavy cream. Mix well. Dress in a salad bowl with the leaves from a heart of small crisp lettuce, and decorate with pimento cubes, slices of two hard-boiled eggs, and Brazil Nuts cut in half lengthwise.

Above: Burnt Brazil Nut Ice cream. Left: as served at the Sherry Netherlands, New York's most exclusive hotel. Below: Theophile, maitre d'cuisine at the Sherry Netherlands, who conceived this distinctive new summer dessert.

Burnt Brazil Nut Ice Cream

(Note: "burnt" the same as "burnt" almonds; i. e., roasted.)
Half pound burnt Brazil Nuts
Two gills cream
Ten egg-yolks
Ten ounces sugar
One pint boiling milk

Crush half a pound of burnt Brazil Nuts and mix with two gills of cream. Put ten egg-yolks in a basin with ten ounces of sugar, mix well together, adding the nut mixture and a pint of boiling milk. Set the basin on a slow fire, stir constantly with a spatula until it is sufficiently thick to stay on the spatula. Now put aside to cool, but stir at times to prevent a skin forming on top. When cool, add one pint of cream, strain through a fine sieve, and freeze. However, for service, an artistic method is to use melon-shaped molds for freezing the cream. These should be coated with strawberry ice, in which has been mixed twice its quantity of whipped cream. Then fill the mold with the ice cream, preparation already made. Freeze the molds and unmold on a folded napkin, from which the now completed dessert can easily be transferred to the serving dish.

MyFavoriteRecipes

Frances Lee Barton says:

WHEN blueberry time rolls around, a juicy blueberry pie is the order of the day. But, just because blueberries are so juicy, very often the juice and sugar bubble over into the oven—the juice is lost and the oven has to be cleaned. Just make your next blueberry pie by this recipe and your juicy fruit pie troubles will be over. The small quantity of quick-cooking tapioca absorbs and holds the juice in the pie—where it belongs. Try it and see.

Blueberry Pie
2½ tablespoons quick-cooking tapioca; ¾ cup granulated sugar; ½ cup firmly packed brown sugar; ¼ teaspoon salt; 1 tablespoon melted butter; 3 tablespoons water; 1 quart fresh blueberries; Pie crust.

Combine quick-cooking tapioca, sugars, salt, butter, water, and berries; let stand 15 minutes, or while pastry is being made. Line a 9-inch pie plate with ½ of pastry rolled ¼ inch thick, allowing pastry to extend ½ inch beyond edge of plate. Moisten edge of pastry with cold water and fold inward, even with rim of plate. Fill with berry mixture. Moisten edge again. Roll other half of pastry ¼ inch thick. Fold half the pastry back on other half. With sharp knife make several slits to permit escape of steam. Place upper crust on filled lower one, opening out folded half after it is placed on pie, and drawing snugly across top to prevent sagging at edges. Press edges together. Trim off surplus pastry, being careful not to cut folded edge of lower crust. Bake in hot oven (450° F.) 15 minutes; then decrease heat to moderate (350° F.) and bake 20 minutes longer, or until filling is cooked.

IT looks as though the upside down cake had come to stay—it's growing increasingly popular. More and more delicious recipes are cropping up every day and almost every kind of fruit is pressed into service.

On my part, I find the use of cherries in an upside down cake a positive inspiration—the refreshing, distinctive flavor of cherries is a perfect foil to the cake. Here it is:

Cherry Upside Down Cake
1½ cups sifted cake flour; 1½ teaspoons combination baking powder; ¼ teaspoon salt; ¾ cup sugar; 4 tablespoons softened butter or other shortening; 1 egg, well beaten; ¼ cup milk; 1 teaspoon vanilla.

4 tablespoons butter; ½ cup sugar; 1½ cups pitted and drained red cherries, fresh or canned. Sift flour once, measure, add baking powder, salt, and sugar, and sift together three times. Add butter. Combine egg, milk, and vanilla; add to flour mixture, stirring until all flour is dampened; then beat vigorously 1 minute.

Melt 4 tablespoons butter in 8x8x3-inch pan or 8-inch skillet, over low flame. Add sugar; cook and stir until thoroughly mixed. On this arrange cherries. Turn batter out on contents of pan. Bake in moderate oven (350° F.) 50 minutes, or until done. Loosen cake from sides of pan with spatula. Turn upside down on dish with cherries on top. Garnish with whipped cream, if desired.

IT is a good idea to vary the cake you serve by making a cake to suit the food which is to accompany it. For instance,

in our family, when we are having blanc-mange, plain custard, or stewed pears for dessert, I try to give the family a spicy cake (about): Melted butter; 1½ cups fresh blackberries; 6 tablespoons sugar.

Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Turn out immediately on slightly floured board and roll ¼-inch thick. Brush with melted butter, cover with blackberries, and sprinkle with sugar. Roll as for jelly roll. Moisten edge and press against roll. Place in greased loaf pan with edge of roll on under side, brush with melted butter, and bake in hot oven (400° F.) 20 to 25 minutes. Serve hot with cream. Serves 8.

Blackberry Roly-poly

2 cups sifted flour; 2 teaspoons double-action baking powder; ¼ teaspoon salt; 4 tablespoons butter or other shortening; ¾ cup milk (about); Melted butter; 1½ cups fresh blackberries; 6 tablespoons sugar.

Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Turn out immediately on slightly floured board and roll ¼-inch thick. Brush with melted butter, cover with blackberries, and sprinkle with sugar. Roll as for jelly roll. Moisten edge and press against roll. Place in greased loaf pan with edge of roll on under side, brush with melted butter, and bake in hot oven (400° F.) 20 to 25 minutes. Serve hot with cream. Serves 8.

Quick Spice Cake

2 cups sifted cake flour; 2 teaspoons double-action baking powder; ¼ teaspoon salt; ½ teaspoon cinnamon; ¼ teaspoon nutmeg; ¼ teaspoon cloves; ¾ cup sugar; 5 tablespoons softened butter or other shortening; ¼ cup molasses; 2 eggs, well beaten; ½ cup milk.

Sift flour once, measure, add baking powder, salt, spices, and sugar, and sift together three times. Add butter and molasses. Combine eggs and milk; add to flour mixture, stirring until all flour is dampened; then beat vigorously 1 minute. Bake in two greased 8-inch layer pans in moderate oven (375° F.) 25 minutes, or until done. Spread with Coffee Frosting.

Coffee Frosting

4 tablespoons butter; 2 cups sifted confectioners' sugar; 2 tablespoons strong coffee (about); Dash of salt.

Cream butter; add part of sugar gradually, blending after each addition. Add remaining sugar, alternately with coffee, until of right consistency to spread. Beat after each addition until smooth. Add salt. Makes enough frosting to cover tops and sides of two 8-inch layers.

CHILD'S HOPE

Doris had just lost her baby teeth, and was thrilled at the prospect of getting new ones.

One day her mother saw her looking in a mirror, seriously studying the gap that was soon to be filled by her second teeth. Presently Doris turned and said: "Mother, I hope my new teeth will be gold ones, don't you?"

Waste doesn't prove Americans stupid. It is silly to save ice down where Byrd is.

OUR CHILD AND THE SCHOOL

By Dr. ALLEN G. IRELAND
Director, Physical and Health Education
New Jersey State Department of Public Instruction

Caring for the Teeth

An unclean mouth takes the edge off one's appetite. Sore gums and painful teeth naturally curb a desire to eat and encourage bolting.

Observations seem to indicate that we overlook these facts too frequently when dealing with children. A look into a child's mouth would be revealing to many parents.

Proper care of the teeth is a two-fold matter. Teeth ought to be examined regularly by a dentist and his instructions followed. He will tell you that food is the important factor in preventing tooth decay.

The chief foods for teeth are the so-called "protective foods"—milk, fruits and vegetables. Do not deprive a child of any of these if you wish him to have sound, even teeth.

A child should also be taught to care for his own teeth. Brushing the teeth and gums is an important habit, though we do not any longer believe that cleanliness alone will prevent tooth decay. Nevertheless it is as important as washing the face or hands and every child should learn it early in life.

Dental caries, or decay of the teeth, has been called the most prevalent disease in America. It is estimated that 90 to 95 per cent of all children have it. Parents, by proper care, can prevent much of it.

Summer vacation time approaches. Dr. Ireland will discuss its special problems next week.

THE perfect finish to a substantial dinner or supper is a light fruit dessert. But, for all its simplicity, it need not lack a touch of luxury if you choose your fruit desserts from among the many which include coconut.

Snowy Fruit Mounds
Allow two slices plain or sponge cake, or two flat cookies for each serving. Put slices together, covering tops with sweetened crushed berries or pineapple; sliced apricots, peaches, or bananas; or sections of oranges, free from membranes. Pour fruit juice over fruit as needed. Sprinkle generous moist, sweetened coconut over each layer. Garnish with whipped cream around base, if desired.

NOTICE

To the Taxpayers of Center Township, Delaware County, Indiana: You are hereby notified that the Advisory Board of Center Township, Delaware County, Indiana, on the 6th day of August, 1934, at 7 o'clock p. m., will hold a public hearing at the office of the Trustee of said Township, in the Community Building, 1128 South Mulberry street, in the city of Muncie, Indiana, to determine whether or not an extraordinary emergency exists for the following additional appropriations in addition to the sums heretofore appropriated for the current year:

Budget Item 3. Township Fund, Justice of Peace Salary and Supplies, \$150.00
Budget Item 23. Special School Fund Transfers, 4,700.00
Budget Item 37. Tuition fees, 3,000.00

Frances Lee Barton says:

WHEN Sunday dinner time arrives the family always looks for a special treat in the way of dessert. When they see this Ice Box Cake brought on the table, there is great rejoicing. For even on the hottest summer day a rich, smooth chocolate refreshingly cold from the ice box brings renewed appetite.

Chocolate Ice Box Cake

(5 eggs)

1 sheet sponge cake (10½x6x1 inches) or 2 dozen lady fingers; 8 squares (½ pound) dipping chocolate, cut in pieces; 4 tablespoons sugar; 4 tablespoons water; 5 egg yolks, well beaten; 1½ teaspoons vanilla; 5 egg whites, stiffly beaten; 1 cup cream, whipped; ½ cup nut meats, coarsely chopped.

Line loaf pan, 7x4x3 inches, with waxed paper. Divide sponge cake into three equal parts and place one piece in pan. Melt chocolate in double boiler; add sugar, water, and egg yolks. Cook until smooth, stirring constantly. Cool. Add vanilla and fold in egg whites. Pour ½ of chocolate mixture over cake. (Cover with second piece of cake.) Add remainder of chocolate mixture. Put third piece of cake on top. Place in refrigerator for 12 hours. When ready to serve, slice cross-wise, cover each slice with whipped cream, and garnish with nuts. Serves 8.

If lady fingers are used, line bottom and sides of a mold. Pour chocolate mixture, and cover with remaining lady fingers.

PREPARE ahead of time for unexpected guests by keeping on hand in the ice box a supply of Chocolate Syrup.

This syrup will keep fresh for a month and when neighbors come to sit on the porch you can make them a delicious, icy cold chocolate drink in a twinkling.

Chocolate Syrup

(Base for many chocolate drinks)
4 or 5 squares unsweetened chocolate; 1 cup sugar; 2½ cup hot water; 2 egg yolks, slightly beaten. Melt chocolate over hot water; remove and cool to lukewarm. Add sugar to water, stirring until sugar is dissolved; cool to lukewarm. Add syrup to egg yolks, about one-fourth at a time, beating well after each addition; add chocolate in the same way. Then continue beating mixture 1 minute, or until slightly thickened. Turn into jar, cover tightly, and place in refrigerator. Syrup can be kept for several days. Use 2 tablespoons chocolate syrup for 1 cup milk. Makes 2 cups syrup.
This syrup can be made with scalded milk rather than hot water, if a richer syrup is desired.

Frances Lee Barton says:

DID you ever make home-made ice cream without turning the crank of a freezer? Well, you can make it, deliciously and economically too, if you will follow this recipe. This ice cream has a rich, smooth texture and yet you use only one cup of cream. If you freeze it in an automatic refrigerator it will freeze without any of those tiny ice crystals to mar its smooth texture. The secret lies in the addition of a small quantity of quick-cooking tapioca. For next Sunday's dinner make your ice cream by this recipe:

Toasted Coconut Bisque

3 tablespoons quick-cooking tapioca; 2 cups milk; 1/3 cup sugar; ¼ teaspoon salt; 3 tablespoons light corn syrup; 2 tablespoons sugar; 2 egg whites, unbeaten; 1 cup cream, whipped; 1½ teaspoons vanilla; 1 cup shredded coconut, toasted and crumbled.

Add quick-cooking tapioca to milk in top of double boiler. Place over rapidly boiling water, bring to scalding point (allow 3 to 5 minutes), and cook 5 minutes, stirring frequently. Strain hot mixture on 1/3 cup sugar, salt, and corn syrup, stirring (not rubbing) through very fine sieve. Stir until sugar is dissolved. Chill. Add 2 tablespoons sugar to egg whites and beat until stiff. Fold into cold tapioca mixture. Fold in cream, vanilla, and coconut. Turn into freezing tray of automatic refrigerator and freeze as rapidly as possible—3 to 4 hours usually required. Or turn into container, cover tightly, and pack in equal parts ice and salt 2 to 3 hours. Makes 1 quart bisque.

HERE is a tasty, eye-tempting change from the summer dish of sliced tomatoes—

Cheese Salad in Tomato Cups. Serve it for supper some hot meat or for a bridge luncheon.

Cheese Salad in Tomato Cups

1 package lemon-flavored gelatin; 1½ cups warm water; 2 teaspoons vinegar; ¼ teaspoon salt; 1 package (3 ounces) cream cheese; ¼ cup mayonnaise; 6 medium-sized tomatoes, peeled. Dissolve gelatin in warm water. Add vinegar and salt. Chill. Blend cheese with mayonnaise. When gelatin is slightly thickened, add to cheese mixture gradually, stirring well. Turn into shallow pan, in ½-inch layer. Chill until firm. Cut slice from stem end of each tomato. Remove part of pulp. Sprinkle inside of tomatoes with salt and turn upside down to drain. When gelatin is firm, cut in ½-inch cubes. Fill tomatoes with gelatin mixture. Arrange on bed of crisp lettuce or water cress. Serve with additional mayonnaise. Serves 6.

Frances Lee Barton says:

OUR youngsters have never forgotten the time their grandmother paid us a visit and made for them a real old-time "rolly-poly pudding." So whenever I am in doubt about a pudding for dinner I know the answer—a roly-poly. At this time of the year it will be a fresh fruit roly-poly. This pudding, made of luscious, juicy blackberries, always enjoys high favor with us.

Blackberry Roly-poly

2 cups sifted flour; 2 teaspoons double-action baking powder; ¼ teaspoon salt; 4 tablespoons butter or other shortening; ¾ cup milk (about); Melted butter; 1½ cups fresh blackberries; 6 tablespoons sugar.

Sift flour once, measure, add baking powder and salt, and sift again. Cut in shortening. Add milk gradually until soft dough is formed. Turn out immediately on slightly floured board and roll ¼-inch thick. Brush with melted butter, cover with blackberries, and sprinkle with sugar. Roll as for jelly roll. Moisten edge and press against roll. Place in greased loaf pan with edge of roll on under side, brush with melted butter, and bake in hot oven (400° F.) 20 to 25 minutes. Serve hot with cream. Serves 8.

EVEN the traditional cooky has its up-to-date moments...

the ice box cooky. You can make your cooky dough when you do the rest of the Saturday baking and store it either in your ice box or in your automatic refrigerator. Then it is all ready to slice and bake for the impromptu picnic or porch party.

Hostess Ice Box Cookies

4 cups sifted cake flour; 4 teaspoons double-action baking powder; ¼ teaspoon salt; 1½ cups softened butter or other shortening; 1½ cups sugar; 2 eggs, unbeaten; 4 squares unsweetened chocolate, melted; 1 teaspoon vanilla; 1 cup finely cut raisins; 1 cup broken walnut meats.

Sift flour once, measure, add baking powder and salt, and sift again. Combine butter, sugar, eggs, chocolate, and vanilla, beating with spoon until blended; then add raisins and nuts. Add flour gradually, mixing well after each addition. Divide dough in two parts. Place on waxed paper and shape into rolls, 1½-inches in diameter; roll each in waxed paper. Chill overnight, or until firm enough to slice. Cut in ¼-inch slices; bake on ungreased baking sheet in moderate oven (350° F.) 10 minutes, or until done. Makes 7 dozen cookies.

LoveLiness BEGINS IN THE KITCHEN

Twenty-five million dollars—that's the amount of money American women spend each year for loveliness. • Yet how much of it is wasted in stuffy kitchens, made unbearably hot by old-fashioned ranges! • Hours that could contribute to charm by means of rest and recreation, instead have made unwilling victims of women who can easily enjoy the advantages of a modern, automatic ELECTRIC range, yet do not. • For electric cooking is as economical as it is convenient. • A penny per person per meal is the average cost. And think of the dividends that small outlay pays in leisure, health, and charm! • Let us tell you the whole story of ELECTRIC ranges. • If you have not seen one in operation you will marvel at its speed, convenience, and cleanliness. • Learn the facts about electric cooking today!

LITTLE AMERICA ANTARCTICA
With Byrd at the South Pole
by C.A. Abele Jr. President
U.S.M.A.

20
All Snugged Down!

LITTLE AMERICA, ANTARCTICA, April 9 (Via Mackay Radio)—And now Admiral Byrd is out there, 123 miles away in his 13 x 7 feet high shack under the snow, on his terrible, lonely rig of more than six months and we are all packed down comfortably for the long Antarctic winter here at Little America.

The fierce South Polar winter is almost upon us. Already we have looked at the thermometer and found the figures "59 below zero" starting at us. We have only about four hours a day of sunlight. Yesterday the darkness came at one o'clock in the afternoon after one of these amazing Antarctic sunsets—simply incomparable for beauty. On April 19 the sun will disappear completely and the leader of this expedition will be out there in that but all winter, for four months of which

V. H. Czegka
Expedition
Supply Officer

he will be in total darkness, with only candles for light. And outside his hut will rage the most violent weather known on this globe—blinding blizzards, wind screaming at 150 miles an hour—and 80 to 90 degrees below zero. It is one of the most amazing feats ever attempted. I am praying for him, that he will not get a sprained ankle or—well, any of the other terrible things that could happen to him. We expect to be in touch with him by radio at all times.

Here we have plenty to do preparing for the great exploits we hope to accomplish from next October to February. There is a never ending variety of work going on daily. Albert Ellifsen, of Tromsø, Norway, is building new dog sledges. Vernon Boyd, of Turtle Creek, Pa., is installing a wind-driven generator on top of a sixty-foot tower (and he'll have lots of time to run it). Dr. Poultier, of Dunedin, N. Z., our leader here, is working all the time, mostly making cosmic ray observations. William C. Haines, our meteorologist from Washington, D. C., is constructing a weather observatory. Dr. Louis Potaka, our new New Zealand doctor, is arranging the sick bay (which is sailor-man talk for hospital). Ed Moody, of Tamworth, N. H., is making dog harness. Finn Ronne, from Pittsburgh, is showing his Norwegian skill in mending skis, (which I've learned to pronounce "sheez"). Clay Bailey, radio man, from sun-kissed Brawley, Calif., is tinkering with the electric generators so I can get these stories out to you people in the club better. Kenneth Rawson, our young Chicago navigator, is repairing and adjusting his instruments. The archeologist, Walter Lewisohn, of New York, one of our 13 scientists, is snapping everything in sight with a camera. Linwood Miller, of Highland Park, Ill., official sail maker, is repairing our wind proofs.

Facts for Farm Folks
Written by
AGRICULTURAL AUTHORITIES

HOLDING UP SUMMER EGG PRODUCTION
By A. G. Philips
(Formerly Professor in charge Poultry Husbandry Purdue University)

Summer egg production can be made profitable. All that is necessary is to obtain the eggs. Egg prices are high enough to meet feeding costs and, therefore, challenge the poultry feeder to secure good egg production.

PROF. A. G. PHILIPS

Commercial poultrymen have learned that this is always true and so plan their feeding program and management that the July and August production is from forty to sixty per cent. Good results can be produced by doing two things: namely, culling out the unfit and increasing the consumption of mash.

At least every two weeks during the summer months the laying flock should be carefully examined and all birds not laying should be removed and sent to market. Three things then happen: Total feed costs are reduced, hens are sold at higher prices than they are in the fall, and more room is available in the laying quarters for those hens that are kept. When a person puts this plan of culling in to practice, it is interesting to note that he usually gives better care to the laying flock.

A certain percentage of any flock of poultry can and will lay in hot weather if given an opportunity to do so. It is not the natural laying season, and, therefore, the birds may not desire to eat as much as is necessary for high pro-

duction. In order to be sure of a heavy intake of feed, it is practical to offer one feed of moist laying mash at noon each day. Give the fowls what they will clean up in thirty minutes and feed this in a clean trough. Offer this as an addition to the hard grains and dry mash that are regularly fed. A wet mash seems to be more digestible than a dry one; it is very palatable and hens will consume it at a time of day when they are normally inactive.

In the opinion of some authorities, birds need more protein during the hot weather at the end of the laying year than they do in the spring, but they will not consume enough if it is fed only in a dry feed.

If sensible culling and the feeding of a wet laying mash is practiced during July and August, egg production can be made most profitable.

What Are the Wild Wavelets Saying

A lot of Washington's idle lawmakers and other public officials are soothing their frayed nerves and treating their tired bodies to the luxuries of salt water swims at Atlantic City. That are ahead of them in the fall elections. Had-don Hall is doing a thriving business and the Chalfonte and other boardwalk hotels are having a season that resembles those of the "good old days" before awful things happened to our beloved country. Undoubtedly a salt-washed and sea-breezed Senator, or a Congressman, is worth twice as much to his constituents as one who admits that he "is too tired to think." Let us hope that we may hear less of this kind of complaint in the coming years.

FRESH FOOT-PRINTS
BY
Lester E. Food

Ignorant people often substitute swearing and wagers for argument.

A man who is unable to control his habits of eating, sleeping or drinking shows weakness and should be more pitied than censured.

"To be in the pink of condition physically and mentally and ready and willing to do anything that needs to be done, is a great substitute for genius.

In Berlin and elsewhere in Germany there is a serious shortage of potatoes, the chief food there.

Traffic through the Panama Canal is reported the heaviest since 1929.

It is illegal for any person or organization to deliver mail in opposition to the United States Post-office department.

"Who does not love wine, women and song," once said Martin Luther, "remains a fool his whole life long."

"What is a communist? One who hath yearnings for equal division or unequal earnings; idler or bungler, or both he is willing to fork out his penny, and pocket your shilling."

Personally, we see no difference in the patriotism of the woman who carries her money in her stocking, the man who buries his wad in a can or a bank that keeps practically all of its cash either in the Federal Reserve Bank or in cash on hand.

One automobile tire requires all the rubber collected from two good rubber trees for two years.

There are only about 40,000 Eskimos in the entire Arctic region.

"No matter where you live—in city, village or farm—hang on to your real estate, says Bank President Thomas R. Ward. "Real estate today, at today's prices, is the best investment I know."

An air-passenger service between New York and Chicago now includes convertible berths of the Pullman car type.

Farmers who had their corn sealed last winter and accepted government loans of 45 cents per bushel are repaying the loans at a rate which is releasing approximately 2,000,000 bushels of corn per week.

The longest telegram ever sent was 1,299 feet long. It was sent to President Roosevelt on his last birthday and was signed by 41,000 people and filed with the Western Union at Birmingham, Alabama.

Under the new Frazier-Lemke act, creditors of a bankrupt farmer now must choose between an adjustment and a 5-year moratorium.

"How to use today," says B. C. Forbes, "will determine how tomorrow will use you."

"Work thou for pleasure Paint or sing or carve The thing thou lovest. Though the body starve. Who works for glory Misses out the goal, Who works for money Coins his very soul."

On the Up-and-Up for Many Months

The homely Rooseveltian philosophy thrills the President's partisans, encourages his opponents, and gives hope to all that the country is around that "corner" that we heard so much about a year and a half ago.

"The simplest way for each of you to judge recovery," observed the President in his most informal manner, "lies in the plain fact of your individual situation. Are you better off than you were last year? Are your debts less burdensome? Is your faith in your own individual future more firmly grounded?"

That the nation has been on the up-and-up for many months is beyond question when the answers of individuals are given to the above straightforward questioning by the President.

In a recent statement that voices the views of organized industry, discontent and doubt is voiced by Lewis H. Brown, one of their leaders. He said:

"I am no longer concerned about the 'brain trusters.' We are on the way out of the depression. Recovery is taking place. The emergency is over. The time of desperate measures hurriedly conceived conceived is past." Mr. Brown declares that "we are not going to lift ourselves by our bootstraps." He asks for sound measures "for what he describes as the 'long run' to help permanent recovery."

The President warns that our ills have not been cured. Therefore, only "sound remedies" should be given the sick nation.

"Music by Telegraph" Sent From Many Cities As Unusual Feature of A Century of Progress

From the Hall of Science tower, above, the J. C. Deagan carillon nightly plays "Music by Telegraph." Upper right—Stage scene at World's Fair as feature is demonstrated on model carillon and "Musical Stenographer." Right—Fred Waring playing "Telemusicon," with Lane Sisters.

Each World's Fair is usually remembered by one outstanding attraction, and this year's big feature, instead of a fan dancer, will be the unusual scientific demonstration: "Music by Telegraph."

Unique as a World's Fair feature, "Music by Telegraph" is the first attraction which it is not necessary to witness at the Fair alone but which will be demonstrated in approximately 150 cities in the United States during the course of A Century of Progress. It marks the first attempt to telegraph music.

A musician seated before a telegraph typewriter in any Western Union office in the country now may "play" the famous Deagan carillon, the official World's Fair chiming in the tower of the Hall of Science in

Chicago. This remarkable feat was made possible by Western Union engineers who wished to demonstrate that it is not only possible to wire written communications and money, but also to telegraph music.

A selecting device, known as the "Telemusicon," is attached to the carillon at Chicago. The Telemusicon is operated by electrical impulses traveling to it over the telegraph line. At the sending end, a midget two-octave piano keyboard is fastened directly to the keys of an ordinary telegraph typewriter. Thus as the musician presses a key of the midget piano, a telegraph signal is transmitted which causes the big carillon at Chicago to play the corresponding chime.

Twice a night a famous musician, in one of the 150 cities selected to originate programs, plays two brief concerts which are transmitted by the Telemusicon to Chicago. Early in the evening he plays a composition which is recorded not only audibly on the chimes at Chicago but also visually on the Musical Stenographer—a large illuminated board which permits the spectator to see the various notes which are illuminated on the scale as each is received from the distant city. For his second performance the musician in the distant city repeats his performance as the nightly "sign-off" feature of the Columbia Broadcasting System.

THE MARCH OF PROGRESS

WOMEN, GOD BLESS 'EM!
By J. E. Jones

Mount Vernon is a treasured spot in the hearts of all Americans. There is a sweet abiding peace hovering about the shrine made sacred by the memories of George Washington. Even in the stirring days of the Civil War this was neutral ground for Union and Confederate soldiers who met here as friends and Americans.

Only once have I ever heard a person indicate by his speech that he did not discover all that America stands for symbolized at the home of the Washingtons. It was on the great front porch. A lady came out of the mansion and she spoke to her husband I noticed the exhilaration and the thrill of patriotic pride in her voice. "O, Fred, I have just seen a perfectly splendid painting of Martha; I want you to see it. 'I don't want to see it,' he snapped. 'But you must dear, she's so lovely,' she coaxed. 'I won't, she never amounted to much, anyhow,' he growled.

A look of pain and disappointment swept over the woman's countenance as her fickle Fred revealed that he was destitute of heroic sentiment. She had aroused my sympathies which perhaps accounts for the fact that I did not tell her, Freddy a thing or two, particularly as he had caused me to see red for a brief moment. Fred was fat, because he ate too much; and because he was so fat he was suffering with tired feet that had to carry the overload; his hot, swollen feet telegraphed their distress to his troubled brain; and there was a connection between those nerve tissues and his vocal organs. I turned away.

Of course that man didn't know that when Harrison, Pendleton, Patrick Henry and other Virginia leaders went to Mount Vernon to counsel with Washington on their way to the first continental congress that Martha was an active participant in their long conferences, and that she urged them to action. "George is ready, and we will give up everything we have, and you must stand by him," she pleaded. Benjamin Harrison, whose son became the ninth president of the United States asked Martha what she thought the mothers of the colonies would say if their sons were called upon to go to war. Pendleton wrote that she brought her son Jack Custis before them to say that he was ready to join his father. He added afterwards that she talked to them "like a Spartan mother."

The women of Martha Washington's time were expected to remain in the background, particularly in public affairs. Nevertheless, Martha Washington gave ample proofs that she was a great woman. Careful study of history proves she amounted to a tremendous "much."

There is a funny old expression that American husbands inherited from the caveman, which we do not hear very often any more; yet early in the present century, despite good old bicycle rides, most men insisted that "woman's" place is in "the home."

Women decided that they would have their "rights." They certainly have gotten everything they have gone after in recent years.

Now see what we have! A woman in the Cabinet, with Presidential powers to settle strikes and adjust the principal industrial issues; Congress and state legislatures, accepting larger representations of women after each election; women in the drivers' seat on the highways, in executive positions, in educational affairs, in the professions, and in the sciences.

The Forward March of Progress has brought the women of the twentieth century out of oblivion on to the higher planes of life, there to enjoy their birthrights, is a phenomenon of the last twenty short years.

If women should seek a National shrine in America for their sex it is at Mount Vernon, where Martha great woman.

sought, directly or indirectly, to destroy our traditions, and to change our fundamental democratic system of government. They have contributed nothing to the work of recovery—nothing to making the future a happier time for the great masses of the people. Their schemes, if followed, must inevitably bring us to disorder and chaos.

"Change in this country comes through rationalized, orderly progress. We must not lose sight of the great achievements of the past, and the principles which made those achievements possible."

Nothing To Boast About Professor—Here you see the skull of a chimpanzee, a very rare specimen. There are only two in the country—one in the national museum, and I have the other.

Swimming Pool "Credit"

The afternoon daily has been trying of late to locate, and properly tag, those to whom credit is due for the construction of the new swimming pool.

It has now decided, finally, that the credit belongs to the late Ed Ball, who died some years ago.

Ed Ball was a dandy fellow, and he took great interest in the parks, and no doubt if he were living, he like all other citizens of Muncie, would take great pride in Muncie's newest and greatest public improvement.

But somehow or other it is doubted here that members of the Ball family feel greatly elated over the continual kowtowing to their greatness on the part of courtiers. It seems to us that incessant praise, in season and out of season, would "get on their nerves."

Whatever may have happened in the dim past in the way of the city's purchasing the small tract of land for park purposes, the fact remains that the spot has remained for years an eyesore and blot on the landscape, and would have remained so, world without end, if a practical city administration had not gone to work, without a brass band accompaniment, and built a swimming pool that is unequaled.

Mr. Davis Mourns the "Old Order"

Readers of The Post-Democrat who possess tenacious memories will recall that John W. Davis was once picked by the Democrats as their candidate for the Presidency. Mr. Davis received a frightful drubbing on that occasion and immediately returned to his New York law office and to the pleasant task of telling members of the House of Morgan how they could get what they wanted and keep out of jail.

Last week Mr. Davis appeared before the Institute of Public Affairs of the University of Virginia "to lay his humble wreath at the feet of the old order." Capitalism has not been a "proven failure" he assured his listeners.

"The right of private property and the sanctity of contracts are the twin pillars of the capitalist system," said Mr. Davis. "They stand or fall together. American life, as Americans have known it hitherto, has proceeded upon these principles."

Note that Mr. Davis said nothing about human rights. The old order emphasized property rights; the new order, if it is to get anywhere, must emphasize human rights.

Naturally, Mr. Davis prefers the old order. It paid him fat fees and made his masters multimillionaires.

Picture Moguls Are "On the Spot"

Hollywood is scared to death, and it has reason to be. Some months ago a group of Catholic clergymen organized a "League of Decency" to clean up the movies. Protestant and Jewish churches have officially joined the move. Scores of theaters have been forced to close, more particularly in the Philadelphia area, where Cardinal Dougherty has declined a general boycott on the playhouses. Theaters remaining open report reduced receipts.

There is ample justification for the crusade. Hollywood producers have gone on the theory that "dirty pays," ignoring the fact that clean plays like "Little Women" and "The House of Rothschild" have proven immensely popular.

Reform movements of this kind generally go too far. Let us hope that this one will be wisely directed.

One suggestion which should meet with universal approval is that Will Hays be kicked out as "cear of the movies." For years Hays, an old ally of the "Ohio gang," has "fronted" for the picture producers. He made them feel that so long as he was protecting them they could "get away with murder." If Hollywood really intends to clean up the first step should be to fire Hays.

MAYOR'S CORNER

Well, another week has rolled around and the excessive warm weather has been augmented, as usual, by the hot air merchants of Munseytown.

One of the outstanding events of the week was the announcement that former Sheriff Harry Hoffman was killed in an automobile accident.

Harry and myself had many notable differences, but death ends all arguments and I am going to remember nothing but Harry's good points, and forget the things he did to me in the old days when he was Sheriff and Clarence Deard was judge.

My last meeting with Harry was at Indianapolis last month in the Claypool hotel and it pleases me to remember that my last talk with the former sheriff was pleasant and jovial.

So I am going to keep on remembering him as I met him then, and not as the sheriff who locked me up in his jail several times, and who once took me to the state penal farm for making faces at a judge.

That was back in 1923, over eleven years ago. With Sheriff Hoffman as my custodian, I traveled to Putnamville, where the prison is located, via the Union Traction.

I remember on the way down that some fellow on the car asked me where I was going.

"On my way to the penal farm," I replied, "and am taking this fellow down to do a stretch. He promised to be good and not try to escape, so I didn't handcuff him, although he is a desperate criminal."

So I had my little joke and Harry didn't give me away, so we both demonstrated that we could "take it," as the say, ing goes.

Muncie had a great mystery a week ago, which has been cleared up. The venerable horse trough at the northwest corner of the public square disappeared over night and reporters on the trail of the ancient relic scented a scandal.

When Auditor Shafer, the county commissioners and the county road boss were unable to solve the mystery, the reporters turned accusingly to the board of works and Street Commission Daniel was investigated again.

What threatened to be a real scandal, became a side splitting joke when it was discovered that Leonard Shick had moved the horse trough to the farm of Will Ball, southwest of the city.

The report that the courthouse disappeared at the same time is an absurd mistake. But don't be surprised if you wake up some morning and see a set of wheels under our well known temple of more or less justice.

I recall making a sort of a speech once in the court house yard, on the south side near the entrance. "You see that big rock?" I inquired pointing to the huge dornick that adorns the courthouse grounds. "Well," says I, "take a good look

at it now for some day in the future your children will point to it sadly and tell their children that that marks the spot where the courthouse used to stand."

But coming back to horse troughs, I really wouldn't have any use for it at my farm. Haven't got any horses and don't care to buy a couple of teams just to keep the old stone trough in operation. Horse troughs to them as has horses, sez I and now that the swimmin' pool is going I wouldn't even need it for my annual bath, which may have been in the mind of my old friend Willie Ball, when he moved it out his way, for I don't know whether he has any horses and I don't know whether his idea was to swim in it or sail boats on it.

It weighs two or three tons, and at that, it might have been a good idea to have used it for the corner stone for the bath house.

Mammoth Circus At Indianapolis

Ringling Bros. and Barnum and Bailey Will Present Many New and Novel Features

The world's mightiest amusement entourage, the Ringling Bros. and Barnum & Bailey combined circus with its gigantic 1934 program of new world-wide wonders, many of which have never before appeared in America, is definitely scheduled to exhibit in Indianapolis, Tuesday, July 21.

The gorgeous, vastly enlarged inaugural spectacle, "The Durbur of Delhi," stupendously introduces the multitude of arenic marvels that succeed this popous panoramic display.

The great new international congress of features presented in the seven rings and stages, huge hippodrome track and the maze of aerial riggings includes the recently imported Otari Troupe in the most astounding mid-air feats ever witnessed. These intrepid performers fly from all points of the compass at the same time in perilous forward and reverse flights through space from their lofty aerial cross.

The Otari with such arenic notables as Milla Gillette, Europe's sensation of the air, now appearing in this country for the first time and the celebrated Torence Delores, Merckels, Willos and Spurgat Troupes, all new to this continent, are among the 800 men and women circus stars presented by the big show this year.

Here, There

(Continued From Page One)

who robbed a Hot Springs resort and escaped, were found in Boston very dead, indeed. Plugholes, who prey on Hot Springs, have been known to live for sixty days thereafter, provided they kept on traveling.

A number of gambling attaches from the various big cities are employed as house men in the Hot Springs resorts, and said housemen know the underworld personnel of their home cities like they know the backs of their hands.

Hot Springs will entertain and even welcome such visitors as Mr. Joseph "Yellow Kid" Well and Mr. Jules "Nickey" Arnstein, who shortly receive a call from the mayor of the city at their hotel, and said mayor politely mentions that Hot Springs possesses a most salubrious climate for visitors who letve all thoughts of crass material gain outside the city limits of that town.

It would seem that the law could profitably employ some of those quiet, efficient spotters from Hot Springs, on the police departments of our large cities.

INSTRUCTED

"Reggie, what is the right way of pronouncing this word 'Fascist'?" "Oh, it's quite easy, Auntie. Just as if you were slightly tight."

SCHOOL DAYS

THE LITTLE BROWN SCHOOL HOUSE

Correct English

(By W. L. Gordon)

WORDS OFTEN MISUSED

Do not say, "We made a deal with the Wilson Company." Say, "We entered into a business transaction with the Wilson Company."

Do not write, "I have your favor of June 30th." "I have your letter" is preferable.

Do not say, "I do not wish to see him nohow." Say, "I do not wish to see him at all (or, in the least)."

Do not say, "I have heard that it is a sickly climate." Say, "an unhealthy climate."

Do not say, "There were less than ten persons in the room." Use fewer to express number.

Do not say, "She was fearfully (or frightfully) tired last night." Say, "She was very tired."

Words Often Mispronounced

Lathe: pronounce the a as in lay. Lath, pronounce the a as in ask.

Discourse. Accent last syllable, not the first.

Worcester. (Mass.) Pronounce woos-ter, oo as in book.

Covetous. Pronounce kuv-e-tus, both u's as in up, e as in let, unstressed, accent first syllable, and not kuv-e-chus.

Municipal. Pronounce mu-ni-sip-al, u as in unit, oth i's as it, a unstressed, and accent second syllable.

Masculine. Pronounce the u as in unit, the i as in in, not as in line.

Words Often Misspelled

Hoard (a multitude of human beings). Idle (inactive). Idol (an angel). Abattoir. Observe the vowels and the t. Epoch, though pronounced ep-ok. Army (singular). Armies (plural). Abdominal. Observe the i.

Send 30 cents (coins) to W. L. Gordon, 1015 Vine street, Cincinnati, Ohio, mentioning this paper, for three books. Everyday Words Often Misused, Everyday Words Often Mispronounced, and Everyday Words Often Misspelled.

Speed Versus

quicker than a car driven at moderate speeds.

Subject of "Safe Speed"

The subject of "safe speeds" is everywhere a multitude of human beings. The subject is everywhere a multitude of human beings. The subject is everywhere a multitude of human beings.

It is frequently as dangerous to drive slowly on the highway as it is to speed through congested districts. Speeds in excess of 45 miles per hour, it is said, are almost always in the danger zone.

Drivers, moderate your speeds to suit them to conditions on the highways. You will save money in gasoline consumption, repair bills, taxes and insurance costs—and, above all, you will save lives.

First Aids for Housekeeping

Place a basin of water beside the flower pot. Then make a length of old cotton about the size and thickness of a lamp wick of folded material stitched together. Put one end of the cotton in water and bury the other end in earth in the flower pot. The plant will be fed steadily with water while you are away for a few days.

A steel-bristled brush will prove excellent for brushing crumbs from a waffle iron and aids in keeping the iron in good condition. Never wash a waffle iron.

White enamelware may be cleaned by dipping a wet cloth into baking soda and rubbing it on the enamel. Do not spare the soda. If food burns in a pan, put in a generous amount of soda with cold water and let the utensil stand on the back of the stove.

But don't use soda for washing china with the gilt on it. If you do, don't be surprised if the gilt gradually leaves.

Carefully select a number of thin rubber aprons, cut and cover both sides with a light material; with a little hand stitching they make very attractive bibs for the baby, which are easily washed.

Thousands

the receipts will more than provide for the maintenance and operation of the pool and be an asset to the park fund.

Wilbur Thrown Darts.

It was very noticeable during the past week from the "Comment" in a daily newspaper that it is too difficult for Wilbur Sutton, editor and columnist, to extend due credit to the present administration.

Although Mayor Dale has always advocated the construction of a municipal swimming pool for Muncie and when the opportune time presented itself, such as the CWA program, the mayor was first to insist on such a project, the site selected by the administration being objected to by numerous officials and citizens, even though such a tract of land could be beneficially utilized instead of being the receptacle for rubbish and trash haulers, the wailing editor feels such credit for the pool should go to Edmund Ball, long deceased, who back in 1921 proposed that the city purchase such property.

Of course, Mr. Ball and his family had a great many years in which to build such a swimming pool and beautify this tract of land, but the people of Muncie have never benefitted from this park accomplished the pleasure spot of the city and gave a name to the property in honor of Edward Tuhey, who passed away last year.

During the past week it is known that several bankers highly praised the new project and acclaimed it Muncie in many years, but it may be the finest improvement to well be remembered that when bonds were issued with which to purchase materials for construction of the pool, the banks and money gods of Muncie refused to bid on or purchase the bonds.

Not Muncie Money.

Instead, the city administration was forced to find outside markets for the sale of the bonds and did sell the same to a Chicago bonding company so as to assure the completion of the Tuhey Park swimming pool as well as other CWA improvements in Muncie. The new flood prevention wall along Wheeling avenue has already saved a good purpose even though the community has suffered from the drought and that is for Mr. Sutton and his Republican politicians to wall over the success of Mayor Dale and his administration in accomplishments for the benefit of Muncie.

Wise Cracks

If this weather doesn't thaw out frozen assets - nothing will. Theatre business is so bad - two bloodhounds, with an Uncle Tom Cabin Show, are doing a little outside tralling to make expenses.

Sally Rand is doing a Bubble Dance at the World's Fair. Little Pan - Now? Your Congressman is home by now, unless he is hitchhiking. Vice versa - tree surgeons get fruit from their patients. New York policemen allowed to work without coats - stock brokers have been working without shirts for months. Air lines open sleeper service to Chicago - people who walk in their sleep will wear parachutes to bed. If a lot of dead men could read their epitaphs they would think they were in wrong graves. Potash has been discovered in the Tennessee Valley.

What became of Perlmuter? Portland says: "Lightning and amateur golfers never strike twice in the same place."

(Fred Allen's "Town Talk Tonight" is heard every Wednesday night 9:00 to 10:00, Eastern Daylight Saving Time.)

Cordially, Fred Allen

Particular

Pepper entered the restaurant, seated himself at a table, and picked up the bill of fare.

"What would you like?" inquired the waiter.

"Egg," barked pepper, "boiled; but not too soft and not too hard."

"Very good, sir," said the waiter.

"Anything else?"

"Toast," went on the diner, "thin, not to hard, but well browned."

"Any special design on the egg-cup?" said the waiter, desperately.

Rural News

DALEVILLE, INDIANA.

The I Will Class of the Christian Church, with their families, will picnic at the Bushong grove, near Middletown, Sunday.

Mr. and Mrs. Frank Backlund and family spent Sunday with Mr. and Mrs. Elmer Stewart, near Yorktown.

Mr. and Mrs. Dory Funkhouser entertained at dinner Sunday, Mr. and Mrs. Garner Funkhouser and son, of California; Mr. and Mrs. Roy Carr, of Clay City; Mr. and Mrs. Arthur Bosh and children, of Farmland; Mr. and Mrs. Dale Funkhouser and Ralph Smith and family.

The Daleville Peppers 4-H Club met at the home of their leader, Miss Lois Kitterman, Wednesday afternoon.

Mrs. Mollie Feely entertained at a party Thursday night in honor of Mrs. John Forest, of Wilkesburg, Pa., and Mrs. Leon Funkhouser, of Dearborn, Mich. Those attending were: Mrs. Paul Skinner and Mrs. John Thornburg, of Anderson; Mrs. O. A. Tucker, Mrs. Garfield Grove and daughter, Enid; Mrs. M. A. Oliver and daughter, Mary; Mrs. Walter Zumppe, Mrs. Jerry Bronnenberg, Mrs. Frances Heaton, Mrs. Earl Skinner, Mrs. Ervin Martz, Mrs. Berryman Hurley, Mrs. Huston Brown, Mrs. Clyde McKee and Mrs. Alva Berton.

The Loyal Workers Class of the M. E. Church, held a picnic at the home of Mrs. Ralph Ballinger, Tuesday.

The Hay Shakers Club will picnic at the home of Mr. and Mrs. Lloyd Huff, near Spiceland, Sunday.

Warren Shirey, young son of Mr. and Mrs. Raymond Shirey, who underwent an appendicitis operation last Thursday night at the Ball Memorial Hospital at Muncie, was brought to his home Wednesday.

Church night was held at the Christian Church Friday night. All members of the other churches of the community were invited. A special program was prepared.

Arthur Franklin, 77, Salem Township assessor, died at his home, two miles southeast of here, Wednesday, following a stroke of paralysis. He is survived by a daughter, Mrs. Howard McMullen, near Middletown; a son, Homeh Franklin, near here; a brother, Homer Franklin, of Memphis, Tenn.; and four sisters, Miss Joseph Franklin, a missionary at Jhalapur, Central Provinces, India; Miss Stella Franklin, also a missionary, at Mungeli, Central Provinces, India; Mrs. Grace Holman, of Cleveland, O., and Mrs. Mildred Mundy, of here. Funeral services were conducted at 2:30 o'clock Friday afternoon at the Christian Church.

Odd Accidents

In the "Show-Me" state "fire-bugs" are birds. When the Springfield fire department was called out to put out a blaze they found it had been caused by a sparrow carrying a lighter cigarette to its nest.

Rescue came too late to save the life of an Indian man who became entangled in a wire fence and was found hanging head downward. He did not regain consciousness long enough to tell how it happened.

It may be permissible but it isn't advisable to hold your best girl on your lap too long as did Frank J. Ballin, West Virginia Romeo. When he finally rose to his feet his numb legs gave way and caused him to sprain an ankle and fracture a wrist.

Washington (D. C.) policeman saw a leg sticking through the window of a parked car and investigated. They found Arthur Judges who had died from loss of blood caused by gashing his leg when he rammed it through the window after falling asleep on the rear seat.

Nemissio Santiago, a New York widower, fell asleep while sitting on the bed mending his clothes. The needle he had been using fell from his hand and became wedged upright in the mattress. When he rolled over it pierced his heart causing immediate death.

Little three-year-old James McKeown played in an Illinois graveyard while his parents placed flowers on graves of relatives in another part of the cemetery. They returned to find him beneath a newly placed headstone which had toppled on him and fractured his skull.

Joyous Carefree Adventure GREAT LAKES CRUISES

on the S. S. SEEANDBEE

—THE WORLD'S GREATEST SHOW BOAT

500 feet long - 100 feet wide - 500 Staterooms and Parlors

Here is the ideal vacation—rest, relaxation and diversion—a varied interesting voyage of over 2000 miles—with daily programs of music, dancing to a superb orchestra, deck sports, social events, and a dazzling floor show revue and entertainment—all on a quality scale in lake transportation.

These cruises, seven days in duration, begin the second week in July and continue through the first week in September.

On each complete cruise a day and night for exploring the wonders of the Chicago World's Fair, and a full day at Buffalo permitting trip to Niagara Falls.

One low fare includes all expenses—transportation, stateroom, meals, all entertainment on shipboard, and sight-seeing trip at Mackinac Island.

One way or port-to-port trips at proportionately low costs for those who do not wish to make the complete round trip cruise.

OTHER C & B TRIPS
C & B Line steamers operate regular nightly service between Cleveland and Buffalo. Auto tourists save a day's time and money too by taking their car on the boat. Rates are low. During July and August, on Saturdays, Sundays and Holidays, steamers operate between Cleveland and Port Stanley, Ontario. Daily service between Cleveland, Cedar Point and Putnam Bay. Low rate all-expense tours to Thousand Islands and Saginaw River are available. Write for folders.
