Buffalo Mill Furnishing Establishment.

Improved Grist and Flouring Portable Mills, Burr Mill Stones, of Superior quality and workmanship; OLD ANKER Bolting Cloths, Mill Picks, Screen Wire, and Mill Furnishing in all its branches.

THE subscriber, agent for the above old and well-known establishment, is prepared to furnish to order, together with all other articles in the above line, Noye's Improved Centrifugal Bolting Flouring Mill, in manufacturing by the proprietor in Buffalo, N. Y. These Mills have obtained a celebrity from their extraordinary performance, both as regards quality and quantity of work, which precludes the necessity of saying much in relation to them. It is conceded by the most experienced Millers and Millwrights, that the past century presents no improvement in Mill machinery that equals that which has been attached to these Mills. The amount of power necessary to run them, when compared with large stones or any Portable Mill now in use, exhibits a saving of from twenty five to thirty three per cent. This, of itself, recommends them particularly to those using steam as a motive power, or light streams of water. The meals from these Mills are not their least recommendation. The barrel of flour is obtained from four and one sixth to four and one half bushels, according to the quality of wheat used, at the same time making flour of a richness of color, that can not be equaled by any other process.—They will grind (very fine for meal) from 15 to 18 bushels wheat, twenty five bushels of fine meal, and from sixty to eighty bushels of corn for feed for horses. Such is the simplicity of their construction, that any miller of the smallest experience, can keep them in order. THESE MILLS are those which have recently all other Portable Mills whether super or under driven runners, and which more than all other causes put together, has tended to make them odious, is not applied to these. The belt of the runner stone and iron attached thereto, are fitted upon a lever, for weight. They can be furnished to order, to fit any desirable locality, and driven either by belt, spur, or bevel gear. The low prices at which they are furnished, goes to cheapen the construction of Mills very much. Sizes suitable for plantation mills for grinding corn for feed and bread meal are now manufactured on the same principle.

He with attached, are a few of the many letters received by the proprietor from those who have these Mills running. Of the several hundred already sold, not one what has given satisfaction.

T. P. HYMER.

Terre Haute, July 7, 1 52.

TERRE HAUTE, IN., 8 Pt. 10, 1852.

JOHN T. NOYE, ESQ.

DEAR SIR: We received your 3 feet Double Geared Centrifugal Feeding and Flouring Grist Mill on the 3d inst. We had a number of citizens to see it operate; they were perfectly satisfied. We never saw anything go off so nice and complete. The gearing works fine, we like the plan better than the single geared, with pulley on the latter we deem it preferable to any other Portable or large Mill for flouring or grinding corn meal. It performs its work perfect in every respect, grinding at the rate of from twelve to fifteen bushels wheat per hour with ease, and at the same time making superior flour. We do therefore recommend these mills to the public on account of their substantial build, economy of power, and perfectness of work. If we can sell the Burrows Patent Mill we have on hand, we will take a other.

JOHN SIBLEY & SON.

Since the above was written, Messrs. Sibley & Son have disposed of the Burrows Patent Mill referred to above, and are now using two of my Mills. They have been manufacturing the best quality of superfine flour, and all the citizens of Terre Haute who have used it for the past year, will bear testimony.

JOHN T. NOYE.

BURNETT, S PT. 15, 1852.

We have had one of Noye's 36 inch Geared Portable Mills running in our Elevator for more than a year past. It has given entire satisfaction. We consider them decidedly the best Portable Mills ever manufactured with, either for durability, economy of power, or amount of work performed. We regard two things which the miller should strictly look to for profit, per hour. We have no hesitation to recommend these Mills, for grinding corn, for fine meal or feed. We are not grinding wheat, therefore know nothing about their capacity for flouring.

EVANS & DUNBAR.

MR. DUNBAR, of the above firm, is well known in Western New York, as an experienced miller of the highest reputation.

BUFFALO, NOV. 6, 1852.

J. T. NOYE, ESQ.

DEAR SIR: The 36 inch Portable Mill we purchased of you we intended express for flouring, after Bonne's system. We have been obliged to use it almost constantly for this purpose, having been flouring most of the time since getting it, about a year since. For grinding corn, it is better than a large stone we ever saw doing this business. When set for flour in this way, we have used it on Wheat, and it does, beyond question, equally as good work, if not better than large stones, and grinds faster with the same water. The feeding does work to perfection.—We have not had the least difficulty with them, and so sensitive is the grinding balance, that a quarter of a pound will affect it, and is quite perceptible. We have not had any trouble from heating, or the breaking of anything. It runs as smooth as a mole or a clock work.

Yours very respectfully,

L. L. & J. S. GILLETT.

TROY, N. Y., DEC. 27, 1852.

JOHN T. NOYE, ESQ.

DEAR SIR: After trying your 30 and 36 inch Mills, I can give you the result of their working. I have ground, within one year, 75,000 bushels of grain. I find them work equally well upon all descriptions, either wet for custom or for merchant work, and will grind as much wheat, malt and corn for flour and feed. The average quantity that each Mill will grind, is 15 to 20 bushels of fine meal per hour on the 36 inch stones, and from 20 to 25 bushels of buckwheat and corn meal per hour on the 30 inch stones. I have been using mine for a half foot above for a year. I now grind one third more with the same power with your 30 inch stones.

Respectfully yours,

W. H. RAYMOND.

TROY FLOUR MILLS, ALBANY, MARCH 6, 1853.

JOHN T. NOYE, ESQ.

DEAR SIR: In reply to your request for information respecting the running of your Portable Mill, we would state that we have now used it for some weeks with our four and a half feet stone, and can safely say that at all times it will do more work than one of our large 4 foot stones, with the same quantity of water, and do it quite as well. On one occasion, when two of our four and a half feet stones were grinding wheat, one at the rate of 12 bushels per hour, and the other 10, we started your Mill in the place of the 10 grinding 10 bushels per hour, and found that your single 4 feet stone, 15 bushels per hour with precisely the same quantity of water, and it will always vary in that proportion, while with a light heat of water it will do good work when it would be impossible to drive a 4 foot 6 in its stead. In fact, we consider it a most valuable improvement upon the Mill as now in use, and can with heartiness recommend it to the attention of all Millers.

Yours truly,

A. D. SHEPARD & CO.

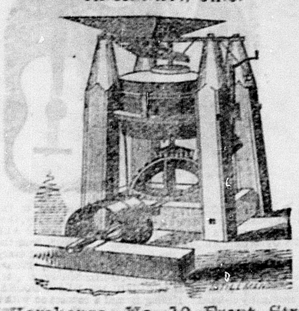
FROM S. H. PARVIN, 68 FOURTH STREET.

J. STRAUB. P. HALLIST.

ISAAC STRAUB & CO.,

MILL FACTORY,

CORNER OF FRONT AND JOHN STREETS, CINCINNATI, OHIO.



Warehouse, No. 19 Front Street, between Main and Walnut.

THE above is a woodcut of a double-geared "QUEEN OF THE SOUTH" CORN MILL.

We manufacture a Corn Breaker of great strength and durability, and ease of operation.

We place this useful contrivance on all sizes of Mills, by which means we convert a Corn Mill into a Stock Feed Mill; but a few minutes work to put it on, or take it off.

We manufacture portable Mills, single and double geared [best quality of French burrs] to grind Wheat, Corn and Stock Feed, calculated for steam, water or horse power. These Mills have been run by steam and horse power in competition against the other make of Mills in our city, at our State Fairs, and have never failed to carry off the first premium—no one occasion was a standard a beautiful silver medal. Our Mills also took two first premiums, at the best Mills, at two annual Fairs of our Mechanic's Institute.

ALSO—Portable Saw Mills to be run by steam, water or horse power. This Mill was exhibited in operation by horse power, at the Ohio State Fair, in 1850, when it was awarded a premium and a splendid silver medal.

ALSO—Different kind of portable horse powers, and steam Engines. All our articles, for ease of operation, simplicity, usefulness and durability, are surpassed by none now in use.

All our articles are warranted as represented—or no sale—at our cost of transportation and the money refunded.

For a full description and testimonials of merit and usefulness we refer those interested to our pamphlet, to be had at our factory, where we take pleasure to explain each article.

ISAAC STRAUB & CO.

NOTE.—Mr. Kimball, the partner of J. H. Burrows, while exhibiting a Burrows Mill at our State Fair, last fall, was boisterous about his Mill, and courageously entered into an arrangement with me to grind corn that whoever grinds the most, regarding quality and quantity, was to be the owner of both mills, at each and every trial.

FIRST TRIAL.

Straub to run a 18 in. Mill; Burrows & Co. to run a 20 in. Mill.

SECOND TRIAL.

Straub to run a 22 in. Mill; Burrows & Co. to run a 24 in. Mill.

THIRD TRIAL.

Straub to run a 26 in. Mill; Burrows & Co. to run a 30 in. Mill.

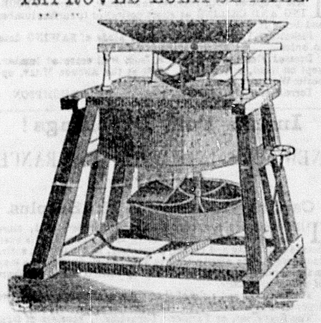
When the pinch came, that boisterous courage stepped out. To the above I now append a challenge to grind cob feed out of whole ears of corn.

I will run my 18 inch, *"Queen of the South,"* with a cob-breaker attachment, *the same article that took the premium at the Ohio State Fair, last fall*, against a 24 inch Burrows Mill and William Stewart's Ohio and Kentucky Stock Feed Mills, both to be run at once; and if you are apprehensive of a risky business, you have my entire approbation to run Mr. Pomeroy's Corn Crusher as an auxilliary. Should my single article fail to grind equal in quality or quantity to the combined productions of the two or three mills [just as you please] then you can draw a few hundred dollars as stakes put up.

Come boys, don't be cowardly—there is nothing like walking strait into the merits of a thing ISAAC STRAUB.

August 5, 1852-15-6m.

R. COCHRAN'S IMPROVED ECLIPSE MILL.



THE subscriber manufactures the above Portable Corn and Flouring Mill of all sizes, from 16 to 36 inches diameter, both double and single geared. The stone is of the best quality of French Burr. The advantages of this mill are that the under stone is the runner, which is perfectly balanced on the cockhead of the spindle, the weight of the stone being below the balancing point and driver, which gives it a steady, unvarying motion, thereby making fine even meal or flour. The simple and peculiar construction of the step by which the spindle and runner stone are raised perpendicularly—the wear of the stones raising and lowering does not affect or change the train of the mill. The bush is contracted so that it is oiled and tights at when the mill is running. It is impossible to chafe the mill at any speed with anything that a mill was ever intended to grind. With it is a fan that cleans the grain as it falls from the shoe into the eye of the stone. This mill, in simplicity of construction, strength and durability and the ease of being kept in good running order, on examination or trial, will recommend itself to be superior to all others in use. Convinced that this mill combines all the advantages claimed for it, I will give $100 to any man that will produce a mill of the same diameter, that will grind more wheat or corn, and make better flour or meal with the same amount of power—to be decided by disinterested judges. These mills will be sold at reduced prices for cash or approved notes. They are all warranted to give entire satisfaction, if not the money refunded, the cost paid, and the mill taken back.

He has also for sale Portable and Stationary Horse Powers.

ROBERT COCHRAN,

August 26, 1852-1?-1y 41 Walnut St., Cincinnati.

ROBERT COCHRAN

MANUFACTURER OF FARMER BURR MILL STONES, all sizes, both old and new quarry blocks, with cast iron brush in the runner, in which is boxes for driver. Having longer practical experience in manufacturing and selecting, and having made more mill stones with my own hands than any other manufacturer in this country, I will warrant a more even temper with heavier blocks and better workmanship than can be purchased at any other establishment in the west and equal to any in the United States, and all warranted to give entire satisfaction or all costs paid, the money returned and the stone taken back. I have also for sale the genuine old German Ancher Brand Bolting Cloth, extra heavy; and Bradley's superior Mill Picks and Patent Hackles, Screen Wire, Dumsel Irons, Hoisting and Tempter Screws, Waltz's Patent Self-oiling Bed Stone Bush and Mill Irons in general, Elevator Belts, Cotton and Leather Belt Plate. I also manufacture Straub's Patent Saw Machine and Stretcher Leather Bands. All the above articles are for sale and warranted by

Chickering's Piano Fortes.

ALTHOUGH but about four months since the destruction of one of Mr. Chickering's factories at a loss of about $150,000, yet he is now making twenty pianos per week, and we shall in a few days be able to supply the demand for these unrivalled instruments. With new patterns new scale, and a determination on the part of Mr. Chickering, which he has thus far carried out, to make the best Piano Fortes, we offer to the public an instrument unapproachable in every respect, as not only the past and present, but the future will show. The first invoice will arrive early next week, when we invite the attention of purchasers, professors, and amateurs for their examination.

COLBORN & FIELD,

Sole Agents, 154 Main street.

ap2, 53-29-1y

ALSO, constantly on hand a fine assortment of Piano Fortes from the factory of Woolward & Brown. These instruments have attained a well merited celebrity, and their rapid sale is sufficient evidence of their durability and excellence.—Thus far we have been unable to meet the demand for either of the above mentioned instruments, but that difficulty will in a measure be obviated in future.

COLBURN & FIELD,

Sole Agents, 154 Main street.

ap2-29-1y

WE have also on hand Piano Fortes from some of the *best New York Makers*, which we can sell at very low prices, and warrant in every respect. In fact we will keep nothing but good instruments.

Of one fact we wish to assure all purchasers of Piano Fortes; you can purchase an instrument cheaper in this city than in Boston or New York, as we can prove to any one who will take the trouble to call on us.

COLBURN & FIELD,

Dealers in Pianos, Melodeons, Music and Musical Instruments, 154 Main street. ap 15

Geo. A. Prince & Co.'s Improved MELODEON.—We would call especial attention to these instruments—unsurpassed by any thing of the kind manufactured in this or any other country. The volume of tone is equal to that of a small organ, and by means of the swell may be increased or diminished at the pleasure of the performer. It is sufficiently loud for small churches, and is well calculated for a parlor instrument. Hundreds have examined them, and all have been loud in their praise; but the best evidence of their merit is their rapid sale.

In consequence of the great success which has attended the introduction of Prince & Co.'s Melodeons, numerous imitators have sprung up in different parts of the country, offering instruments under the same name, and in outward appearance resembling them. We would therefore advise all persons wishing an instrument of this kind, to examine those of Prince & Co. before purchasing.

All orders for the above promptly attended to, either at wholesale or retail, by

ap 15-29-1y COLBURN & FIELD.

Musical Merchandise.—We beg to inform our numerous friends and customers, in town and country, that we have just completed some important alterations in our Music Warerooms, for the better accommodation of our largely increasing business, and are now better prepared than ever to fill orders for all descriptions of Sheet Music and Instruction Books, Brass Instruments, Guitars, Flutes, Violins, Pianos, Melodeons, Violoncellos, Bass and Snare Drums, French Accordeons, Fifines, French Harps, Violin, Violoncello, Banjo and Guitar Strings, etc. Our stock is selected with great care, and will be found to be of the best description. Every effort will be used to give satisfaction to all who favor us with their patronage.

SAVE YOUR ICE!

BURNET'S PATENT WATER COOLER.—We are now prepared to offer our friends and customers a superior article of WATER COOLER of entirely new styles, and at greatly reduced prices.—This article is the result of the application of scientific principles to the purpose intended, viz: to keep water as cool as possible, as long as possible, and with the least possible quantity of ice.

The proprietor has long devoted his attention to this particular branch of domestic economy, and passing from one improvement to another, has at length arrived at near perfection as it is possible to reach. A proof of this is found in the very general use of these Coolers in all parts of the country. A simple statement of facts in regard to these Coolers will satisfy every one of their superiority. First, they are the only article of the kind ever patented. They are furnished with two distinct non-conducting chambers, by means of which, with two pounds of ice to the gallon, water is kept at a temperature of 40 degrees above zero, or eight degrees from freezing [all day.] Thus at a cost of about Five cents a day, a family of ordinary size can be constantly supplied with water as cool as ice (each larger numbers in the same proportion. This has been found to be an actual saving of at least twenty-five per cent. over the earthen jars formerly used for this purpose.

Again, these Coolers never sweat; in this way saving much unnecessary waste and trouble.

Being manufactured in the most workmanlike style, and handsomely finished in every respect, they make a beautiful ornament for dining room, hotel or steamboat.

An important improvement has lately been added to the Cooler, viz: a small pan [capable of holding from six to eight pounds of butter] inserted directly under the cover. This quantity of butter can be kept perfectly hard all day, without additional ice; a very important addition to the economy and comfort of a family.

If desired, the Cooler can be furnished at a small expense with a Filtering Apparatus, which serves the additional purpose of removing all impurities from the water, rendering it perfectly clear and wholesome.

The Cooler and Filterer may be seen in operation at any time, at BURNET'S HOUSE FURNISHING ESTABLISHMENT, No. 14 East Fourth Street, Cincinnati.

For sale at the following places:—

Louisville, by John Bull, 135 Main street.

Columbus, J. R. Hoyt, High street, opposite the Franklin Bank.

Cleveland, by Hutchings & Brooks.

Indianapolis, by Jacob Lindley.

Frankfort, by Greer & Todd.

Nashville, by A. H. Hicks.

New Orleans, by J. A. Morris & Co., 115 Tchoupitoulas street.

July 8, 1853-41-y1

Terre-Haute DRUG STORE.

PERMANENTLY ESTABLISHED.

Wholesale and Retail

J. R. CUNINGHAM,

(THE OLD STAND.)

National Road Street, directly North of the Court-House, Terre-Haute, Ind..

HIS now in receipt of his winter supplies, comprising every variety of articles in his line, making his stock the *largest* and *most complete* in Terre-Haute.

By purchasing the stand long occupied by himself as a Drug Store, he considers himself permanently settled, and with the present arrangement of making *cash purchases*, gives him the advantage of all markets, in obtaining goods from first hands on the most favorable terms; therefore, he is enabled to keep the

Best Assortment of Pure Medicines,

that can be procured in the Eastern and Western cities, and offers as good bargains as the same quality of medicines can be bought at any other establishment on the Wabash.

The purchasing and selecting of medicines suited to the wants of the country, and the compounding of the various preparations of the shop, with care and precision, that it may answer the purpose intended, is a matter of so much importance to the purchaser, that he feels it to be his duty to give his personal and undivided attention to it, as long as he remains in the business.

By his experience of fifteen years in Terre-Haute, together with his attention to the preparing and dispensing of Medicines, he hopes will insure him a continuance of former patronage, for which he feels himself under many obligations to the citizens of Vigo and adjoining counties, disposed to continue to serve them as long as they say.

☞ Prescriptions put up with care, and all orders promptly filled and forwarded by instructions, and *warranted* to give satisfaction.

His stock now consists of a general assortment of

Mineral and Botanic Medicines.

Also, A large supply of all the most

POPULAR PATENT MEDICINES,

Which can be furnished at Manufacturer's prices, by the Gross or Dozen, and Retail.

Dec., 3, 1852-10-1y J. R. CUNINGHAM.

april 29, 1853-31tf SMITH & LEGGETT.

HORSE'S Compound Syrup of Yellow Dock Root.

THIS is a *Purely Vegetable Compound*, scientifically prepared from the best Roots and herbs of the Materia Medica, and has gained an unrivalled reputation for the following effects, viz:

REGULATING AND STRENGTHENING THE LIVER, and Digestive Organs, and cleansing the Stomach and Bowels, and thus curing all Bilious diseases, Liver complaints, Dyspepsia, Indigestion, Costiveness, Piles, Headache, Fever and Ague, Jaundice, Nausea, Loss of Appetite, &c, and causing the food to nourish and support every part.

PURIFYING THE BLOOD,

and thus curing all Humors, Cutaneous Eruptions, Scrofula, Salt Rheum, Erysipelas, Scald Head, Canker, Pimples on the face, Blotches, Ulcers, Tumors Mercurial Disease, Cancers, &c., Regulating the Secretory Organs, and by enabling them to perform their proper functions, preventing and curing many painful and dangerous diseases; Strengthening and Quieting the Nervous System, thus allaying Nervous Irritation, and curing all Diseases of the Nerves, as Hysteria, Neuralgia, Cramps &c.

It is unrivalled in the cure of all Female Complaints, as Weakness, General Debility, Irregularity, Obstructions, Swelling of the Feet, Limbs, Joints, &c., caused by weakness; also Lung and Throat Complaints, as Colds, Coughs, Asthma, Consumption &c.; also, Dropsy.

Having made use of the Compound Syrup of Yellow Dock Root, prepared by C. NORSE & CO., either ourselves or in our families, and finding it to be a very salutary and effectual preparation, we do most cheerfully recommend it to the public as a very valuable medicine.

E. Bonner, Esq., Cashier National Bank, Providence, R. I.; A. W. Spencer, Esq., Cashier Lime Rock Bank, do. do.; Rev. William Phillips, Rev. J. B. Richmond, C. S. Jones, Editor Gen. Advt.; Wm. Field, M. W. G. M., Cyrus Fisher, M. E. H. P., James Hutchinson, G. S. Dea., V. J. Bates, Dr. Benj. Coley, and one hundred others of the most respectable families of Providence.

This certifies that I have for a number of years been acquainted with the composition and mode of manufacture of Morse's Compound Syrup of Yellow Dock Root. I have also been acquainted with its Modus Operandi in disease, and can say that in all respects it is admirably calculated to remedy that class of diseases for which it was designed. It is especially valuable in Indigestion and all its attending symptoms, it equites to healthy action the Liver, removes Torpor and inactivity of this Organ, and stimulates to healthy action in all the system. As a Depurator, or purifier of the Blood, it has no superior. DAVID HOLMES, M. D.

Providence, R. I., Jan. 4, 1853.

Prepared by C. NORSE & CO., No 436 Broadway, N. Y., and sold by Druggists and others throughout this and other countries. Also, for sale by

J. R. CUNINGHAM, *Druggist*, Terre Haute, Indiana.
