

slight mistake. Standing within the same closet was a bottle of aqua-fortis, that had been purchased for a far different purpose, and as it dropped upon the back of the poor cow, and the hair began to smoke, and the flesh to burn, she exhibited decided appearances of restlessness.

"Four on more, Paddy," shouted Bridget, as she tugged at the rope. "I'll give her enough now."

Up went the heels of the cow, down went her head, over went Bridget and a half dozen of the "children," and away dashed the infuriated bovine down the street, the terror of all the mothers and the delight of all the dogs.

Poor Paddy stood for a moment breathless with astonishment, then, clapping his hand upon his hips, looked sorrowfully, and exclaimed: "Bejabbers, Bridget, but isn't the Protestant strong in her—the bast—!"

Mosquitoes.

The mysteries of the life and death of mosquitoes, seems never to have been studied with sufficient care, and a brief consideration of the subject will present some startling questions. How many millions of them are developed annually is not known, but it is known that they belong to the tribe of blood-suckers, and draw their rations from animals and bipeds under protest. Now a man must live, and so must a mosquito. The latter finds himself projected into the world *utens rebus*, as it were, left an orphan at an early age, dependent upon blood for his subsistence, and pursuing the first great law of nature, he approaches and attacks mankind, impelled by the same instinct that leads men to approach and attack their diurnal hush. Perhaps the mosquito perched upon your nose is breaking his fast for the first time in his life. Would you cut him off in the bloom of his youth, simply because his gentle puncture causes pain? Would you take advantage of your size and inflect bodily injury upon an inoffensive member of society? In plain language, has a mosquito no rights which you are bound to respect?

The mosquito drags out his miserable existence in the midst of a perpetual famine, and invariably dies of starvation—the insignificant number killed "by hand," being too small to deserve mention. The writer fought nobly, the other day, and killed but two outright, though a third showed signs of punishment and perhaps perished of his wounds. Strict humanitarians however, could not find it in their hearts to kill these merry little songsters.

GENERAL DIRECTORY.

Indiana State University.
REV. CYRUS S. FLETCHER, D.D., President and Professor of Moral and Political Philosophy.
REV. T. A. WYLLIE, D.D., Professor of Natural Science and Modern Languages.
DANIEL KIRKWOOD, LL.D., Professor of Mathematics.
REV. E. F. FLETCHER, A.M., Professor of Greek and Latin Literature.

COMPETITION

Out Done!

I will make all kind of Calf Boots as

CHEAP AS ANY SHOP IN THE TOWN.

I have on hand a large lot of

Goat Morocco

And will make work to order.

I will WARRANT all work done at my

Shop and will also WARRANT the

Leather used by me.

I will at all times

GUARANTEE A GOOD FIT.

I have a large lot of Plow Shoes on hand

which I will sell CHEAP for CASH.

College Avenue,

Two doors South of Small's Store,

BLOOMINGTON, IND.

Persons leaving measures at my shop,

who are troubled with corns or bunions,

can have their Boots made so that they

will suffer no inconvenience from them.

A large stock of Leather always in store,

for customers to select from.

Leather of All Kinds for sale at

the Shop, or at my Tannery.

The Market price paid for Hides.

GEORGE ROLESBACHER.

Bloomington, Ind., April 7, 1899.

Notice to Farmers

AND TO THE

CITIZENS OF BLOOMINGTON.

NICHOLAS NOLAN has opened a new

Grocery and Provision Store, in the

room formerly occupied by Clark House on

the west side of the public square, and has

at hand and will always keep a full stock

of Staple and Fancy Groceries—Tea, Coffee,

Cigars, Confections, and in fact every article

usually found in a Grocery Store.

An extra article of N. O. Molasses, at

50¢ per gal. Sorghum, 75¢ to 50¢ per gal.

COUNTRY PRODUCE.

The highest market price will be paid for

Turkeys, Chickens, Butter, Eggs, Beans,

Dried Apples and Peaches.

Bloomington, Ind., February 3, 1899.

THE BISHOP PILL!

THE BISHOP PILL!

THE BISHOP PILL!

Not "Brand's Pills," not "Ayer's," not Wright's

but "Costar's" Bishop Pill,

which is bound to take all place of all

other purely vegetable pill (except catarrh), and of extraordinary efficacy for Constipation, Indigestion, Dyspepsia, Headaches, Nervous Debility, Liver Complaint, &c.—*Medical Journal, Sept. 8*

Positively the best Pill in the World.

Thousands of boxes now used.

For sale at FEE & WYLLIE'S Grocery Store.

Calisaya or King's Bark was unknown until the middle of the 17th century.

Humboldt makes favorable mention of its febrifuge qualities as an antidote to Fever and Ague, Intermittent and Malarious Fevers, in his extensive South American travels.

In 1640 it was used by the Jesuits, who alone at that time possessed the secret of its wonderful tonic properties, and it was sold by them for its own weight in silver.

In 1658, eighteen years after, Sir John Talbot employed it with great success in France in the treatment of Fever and Ague, Dyspepsia, Nervous Affections, Loss of Appetite, Weakness and Debility, Palpitation of the Heart, Diarrhoea, &c. In 1679 he sold the secret of its origin to Louis XIV, by whom it was divulged. It is now the all important ingredient in Drake's PLANTATION BITTERS, and preserved as it is in pure St. Croix Rum, makes a tonic of rare merit, and one that should be upon the side-board of every family. Messrs. P. H. Drake & Co., the sole proprietors of the celebrated PLANTATION BITTERS, are the largest importers of Calisaya Bark in America. The Bark is gathered and cured under the immediate supervision of an agent sent out to Brazil, expressly for that purpose, and aside from a few thousand pounds which are sold to the manufacturers of Quinine, is all used in the preparing of these Bitters, to which they are indebted for their wonderful success as a tonic.

The above cut represents the natives in their own native forest gathering the Bark.
