Wm. A. Cade, Editor and Proprietor

For President,
The Man Nominated at Minneapolis
in June, 1892.

The president of the New York Life insurance company having become weary of the duties of his office resigned on the 10th. Upon which the board of managers voted him a life pension of \$25,000 a year. It is said that this was done pursuant to an arrangement made previous to the resignation. It is such lavish and wholly unjustifiable ways of squandering the money of policy holders by their managers that is bringing life insurance into disrepute.

The Louisville, New Albany & Chicago road, in the last sixty days, has hauled from Cedar Lake into Chicago packing houses 760 car loads of ice. Armour & Co., have cut at this lake and stored thirty thousand tons additional, and other parties have stored at the lake sixty thousand tons, all of which the Monon will haul into Chicago as needed, which is quite an item for that end of the line.

Several bills have been introduced into Congress to change the law so as to permit ex-Confederates to serve as officers in the army of the United States. For more than a dozen years the Democrats have been laboring to make this change, and they will get it now on account of the efforts of ex-Confederates to fight for the flag in the war with Chili.

During the month of October last 54,189 immigrants came into the United States. Germany sent 13,224, Norway and Sweden 5,229, Italy 4,441, and the United Kingdom 12,351. These people had evidently never read Senator Carlisle's predictions as to the woes and miseries that were to follow in the train of the McKinley laws. They had not heard that America was going to be ruined by the new tariff. How many of them, do you think, would vote the Democratic ticket if they really understood that it was a ballot in favor of establishing here the very identical industrial system from which they had run away!

The famous Peterman divorce case, which has been on trial all week in Crawfordsville, came to an end last Friday. Over 200 witnesses were examined, and nearly 500 citizens of Maec were constant spectators. The defendant, Clarence Peterman, is a large property holder and merchant of Maec. His wife sued for divorce and \$10,000 alimony and the custody of the child, Grover Cleveland Peterman, who was born on the day Cleveland was defeated by Harrison. Before the parties were married, in 1887, they had signed an ante-nuptial contract, in which the bride agreed to take no biscuit every meal and cut the hair of Clarence. He agreed to get a barber to shave him, and to ride in the cars. Neither of these things he had ever done before, and the evidence showed that he did not after marriage.

Her complaint Mrs. Peterman averred that Clarence had deliberately sold a calf he had given her to get her to take medicine when she was sick; that once when she baked light bread instead of biscuit he threw it to the dogs; that he insisted on parting little Grover Cleveland's hair in the middle; that he refused her money to celebrate the 4th of July, and many other things equally as ludicrous. Clarence had a cross complaint in which he said he sold the calf because his wife persisted in keeping it in the house as a pet; that she would not bake biscuit according to contract; that she once locked little Grover Cleveland in the cupboard and went hickory nutting; that she insisted upon keeping a hired girl who spit on the skillet to see if it was hot enough to cook on, and that she committed many other grievous offenses.

The court room was packed during the trial, and the audience constantly howled with laughter at the side-splitting evidence. Judge Harney refused the divorce.

Cherokee Tribe, No. 135, Improved Order of Red Men, has been organized in Bedford. By courtesy of Palestine Lodge K. of P., the hall of that lodge was used. The Tribe was organized by Geo. D. Denigan, State Organizer, assisted by Arizona Lodge, No. 52, of Bloomington, with 40 charter members. The ceremonies lasted until 4 o'clock Thursday morning. The following officers were elected and installed: V. V. Williams, Prophet; W. M. Fox, Sachem; W. M. Dennison, Senior Sagamore; John H. Bell, Junior Sagamore; James McClelland, Keeper of Records; V. V. Williams, James McClelland and A. T. Todd, Trustees.

Where Lowell Met His Match. As a young man Lowell visited the White Mountains, and he used to relate this anecdote as one of his experiences there: "I was walking through the Franconia Notch and stopped to chat with a hermit who fed with gradual logs the unwearied teeth of a saw-mill. I asked him the best point of view for the

old man of the mountains. 'Dun no—never saw it.' Too young and too happy either to feel or affect the juvenal indifference I was sincerely astonished, and I expressed it.

The log-compelling man attempted no justification, but after a little while he asked: 'Come from Bawm?' 'Yes' (with peculiar pride). 'Goodie to see in the vicinity of Bawm.' 'Oh, yes,' I said. 'I should, 'awl, I should like to stan' on Bunker Hill. You've been there often likely?' 'No-o, unwillingly, seeing the little end of the horn' in clear vision at the terminus of this Socratic perspective. 'Aw, my young friend, you've learned now that wut a man can see for nothin', children half price, he never does see. Nawthin pay, nawthin vally.'

A LIGHT STEP.—Anybody can have it who will be at the pains to set the foot down right. In that lies all the difference betwixt a thumping, lumping gait and the light tread that makes people call you "velvet footed." The whole art and mystery lies in a single sentence. Put the ball of the foot down first, throwing the weight upon it, and let the heel come to the floor the hundredth part of a second after. Treading flat-footed—over all the sole at once—the weight comes with a jar that is about equally destructive to quiet, to grace and to shoe leather, and is both vulgar and foolish. By stepping first on the ball just back of the toes, the cushiony muscles act as a spring, and make of walking a double pleasure.—Harper's Young People.

A student matriculated at the college in September, 1890, for his first course. At the close of the session he went to Louisville, where in June, 1891, he was graduated by a Kentucky school of medicine, thus receiving the degree of M. D. nine months after beginning his medical studies. Such occurrences show how little regard some professing institutions have for the elevation of the standard of medical education, and such are the obstacles thrown in the way of the institutions which like the Medical College of Ohio, are earnestly endeavoring to elevate the standard.—Ohio Medical Journal.

They are now printing a great deal about Florence, the actor. All his stories were good and out of the usual run and he was entitled to all the fame accorded him, but nothing that he ever uttered off the stage had so much grim humor and sound sense as this letter which he once wrote to a bibulous friend:

MY DEAR.—One gallon of whisky costs about \$3, and contains about 65 16-cent drinks. Now, if you must drink, buy a gallon and make your wife the bar-keep. When you are dry give her 15 cents for a drink, and when the whisky is gone she will have, after paying for it, \$6.75 left, and every gallon thereafter will yield the same profit. The money she should put away, so that when you have become an inebriate, unable to support yourself and shunned by every respectable man, your wife may have money enough to keep you until your time comes to fill a drunkard's grave.

Ind. Farmer: The Voice, New York, and Printer's Ink, are having trouble with the postmasters in different parts of the country. Bundles of the Voice have been sent back to the publishers, endorsed "papers not called for." Upon sending letters of enquiry to many of the subscribers whose papers were thus returned, the reply has been made in a large number of cases that no order was given the postmaster to return their papers, but that on the contrary they were disappointed in not getting them. These letters have been sent to the Postmaster General. Some of the postmasters seem to think that it is their duty to punish the people for being alive, judging by their arbitrary conduct. It is time to teach them a few lessons.

ORIGIN OF A LOAFER.—In the beginning God created heaven and earth and all things therein. He then created man and woman and left the loafers on the corners, and in due time they multiplied and spread into the depots, post-office and stores. In the latter place they sit and explain state and national problems that have vexed great minds, and exist partially by sampling goods. While he is thus engaged his wife is out washing for the neighbors, and the poor, helpless children are left at home to take care of themselves as best they can. There is nothing more noticeable than a loafer.—Callao (Mo.) Courier.

How Pepsin is Procured. [From the Chicago Journal.] The pepsin sold in the drug stores is the veritable product of the animal stomach, and generally of the stomach of the hog. One factory in New York has the odd method of preparing the article that ever entered the human mind. A number of perfectly healthy hogs are fattened for market, and for thirty-six hours before killing time are deprived of all food, not even being allowed a drop of water. Then the trough from which they are accustomed to eat is covered with strong wire netting, and the most surprising snips and hog delicacies, smoking hot, are poured into the trough. The fumes ascend with grateful fragrance to the porcine nostrils, the hogs all run to the trough and stand over it, ravenous with hunger, squealing and fighting with each other for a chance to get at the food. The

iron netting prevents them from tasting the food, and while they are still thinking about the matter they are killed, and their stomachs being taken out are found perfectly full of gastric juice, from which the pepsin is prepared.

On every horse will be found, on the inside of each foreleg, a dry, gray wart about the size of a silver dollar, apparently of no possible use. When the weary, over-taxed animal, sweating at every pore, and covered with foam, can reach down and rub with his wet nose this all-ways dry, hard substance, he is instantly refreshed with an odor, like geranium.

The Progress will be sent to any address till after the November election for one dollar.

Mr. Springer's Bad Case. Faris Bros., Gentlemen: For a long time I despaired of getting any relief from my attack of rheumatism—I suffered day and night, and was only without pain or unconscious of it when asleep. Hearing of the South American Nervine you are selling, and being assured of its worth by the testimonials of Mr. Mills, who had used it, I at once ordered two dozen bottles. To this fact I perhaps owe my life, and am so grateful to you for keeping the medicine, as I am that I send no more bottles. I intend to keep it in the house hereafter.
