DOINGS OF THE DAY.

SUMMARY OF THE NEWS OF THE WEEK.

THE DEATH OF THE FLAG.

Seventeen Hundred Deaths at Hong Kong.

Hong Kong special: Seventeen hundred Chinese have died of the plague here since its outbreak on May 1. Despite previous reports to the contrary, the European population up to the present has not been attacked by the disease. The stringent precautionary measures taken by the Europeans are the cause of their immunity from sickness. The epidemic is now decreasing in severity. There has been a general exodus from the Chinese quarters. The condemned streets in the native quarter have been blockaded by the authorities. Placards have been posted in the streets of Canton, saying that if the Governor destroys the Chinese quarters of Hong Kong, the British quarters of Canton will be destroyed. The Chinese of Canton are now being driven from the island of Shun-shien, which is all the principal European section of Canton, will be burned.

May Subject It.

Brazil (Ind. special): The miners have received the official report of the action of the Columbus convention. They are greatly dissatisfied, and a mass meeting is called to decide whether to accept or reject the scale. It is believed the scale will be rejected. Vice-President P. H. Penna is in the city and will be present at the meeting. Mr. Penna says that the scale is the very best that could be secured for the miners, as other laborers have been reduced about 40 per cent, while the miners have only been reduced 10 per cent. Mr. Penna is at Newburg, overheard Mr. Penna's remarks and quickly assured the official that the miners in his locality were very indignant at the scale. Dunkerly and Mr. McBride to resign. Mr. Penna promptly replied that it would be unnecessary, as the present officials had already instructed President McBride to tender their resignations.

Constables Higgins and Gallup, of Austin, Pa., endeavored to serve a warrant upon James Spicer, of Galston, for illegal selling of liquor. Spicer shot Higgins in the neck. Higgins returned the fire, killing Spicer instantly.

MULEY HASSAN DEAD.

Belief that Morocco's Sultan was Murdered—Succeeded by His Son.

Muley Hassan, the Sultan of Morocco, is dead. He died in the interior while traveling between the capital and Rabat. Details of his death are very meagre, but the belief prevails in Tangier, where the representatives of the foreign Governments are in consultation, that the murder was instigated by the entourage of the Sultan's son, Muley Abd el Aziz. Thus far, no disturbances have been announced. It is thought that the French, Spanish and English governments will shift their policy in the circumstances of the death of Muley Hassan, and the suspicion of murder is confirmed there may be a forcible joint intervention on the subject of the succession. It is not unlikely that intervention will come before the end of the year. The succession is the greatest prize in the world. It is larger than Spain or France, or the whole German Empire. In the time of the Emperor, it was the granary of Rome, and it retains its fertility to this day. The country is equally rich in minerals. It is worth fighting for. The death of Muley Hassan has been a great blow to the Sultan's entourage, and it has been an open secret in English diplomatic circles that after Muley Hassan would come a "deluge." Should there be combined action between England, Spain and France to drive out the Moor the result would be a holy war. The Moor would not surrender at the first summons. His cry would be taken up along the whole coast of North Africa, and the greatest of all tragedies, a war of races and religions, would assuredly follow.

UNITED STATES MUST ACT.

So Say the Friends of Silver—Point to the Berlin Conference.

The adjournment of the Berlin silver conference without making a definite recommendation on the subject of more coinage among nations and the members who take an interest in the silver question, says a Washington correspondent, in referring to the announcement from London that the conference had adjourned, the fact that no recommendation favorable to silver had been made. "The commission was," he said, "the outgrowth of discontent among the agrarian classes and was appointed by the government in response to the strong pro-silver sentiment in the agricultural section of Germany. I have never understood that it was expected to do more than collect information, and, in regard to the situation, or if it was the original purpose that the commission should make a recommendation. I think that the commission was not to make a recommendation, but to collect information. I think that the commission was not to make a recommendation, but to collect information. I think that the commission was not to make a recommendation, but to collect information."

WHEN IT WILL COME.

DEPRESSION WILL END WHEN DEMOCRACY IS ROUTED.

If the Farmers and Workmen Are Alive to Their Own Best Interests the New Congress Will Settle the Question of Hard Times.

Restore the McKinley Law.

The Dolgoville (N. Y.) Herald has received from one of its readers a letter, inclosing his subscription for another year in which he writes:

"It is harder to get these \$2 I send you than it was to get the two years ago. I am a farmer and out of debt, and I believe my case is a fair sample of all the farmers throughout the State of New York—no property on the brink. Please tell us when the end will come."

We cannot, of course, name the exact date when the prevailing depression will end, says the editor in reply, but it is safe to say that it will last until the farmers and workmen are alive to their own best interests and the new Congress will settle the question of hard times.
