INDIANAPOLIS is complaining of a lack of gas during this cold snap.

FORAKER takes defeat so gracefully that he should continue in the business.

The Bartholomew county Democrats smothered a resolution endorsing Gray, for President.

The Department of Agriculture has estimated that the cereal crop of 1891 is the largest in the history of the country. Everything points to another four years of Republican administration.

The last step in the proceedings against the city of Crawfordsville doing commercial lighting has been taken and the city is again on top. The supreme court has denied a rehearing of the case.

A NEW base ball league has been organized and Indianapolis is "not in it." That city will not be in the contest for the Democratic National convention either unless it does some lively hustling.

JUDGE A. J. LEAY, the new governor of Oklahoma, is a resident of that territory, very popular with the people and a man of unquestioned integrity and ability. You can bank on all of President Harrison's appointees being capable and honest.

REPUBLICANS, don't leave the business of the convention to-morrow to others, but go yourself and see that the best things are done for the party. We are getting ready to carry Indiana next November and it is important that the first steps should be wisely taken.

SENATOR PEPPER has introduced a bill to inflate the currency by issuing \$100,000,000 worth of paper money to Indiana land owners in the shape of loans at two percent interest. The preamble of the bill is an arraignment of the recent Democratic legislature, as it says the people of the State are suffering from a lack of money, the direct result of laws made to favor the rich capitalist.

Rehearing Denied.

The case of the city of Crawfordsville vs. Hector S. Braden came up in the supreme court yesterday on a motion for a rehearing. The motion was overruled and a rehearing denied. This ends forever and evermore the question of commercial lighting by the city as far as this municipality is concerned.

The city council can furnish light to all that it will.

DEAFNESS CAN'T BE CURED

by local applications, as they cannot reach the diseased portion of the ear.

There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that we cannot cure by taking Hall's Catarrh Cure. Send for circulars free.

COAL WAS IN DEMAND.

INDIANAPOLIS, Ind., Jan. 8.—The cold weather caused many uncomfortable houses on the south side of the city. The well-to-do and working people alike suffered as natural gas in its short supply made no distinction. Some homes had small supplies of coal to draw on, but these were shared with the less unfortunate. Notwithstanding this there were many hundreds of places without fire. Cold breakfasts and dinners were the rule. Several of the schools were closed, the pupils going to their homes only to find them without warmth and worse, if anything, than the school buildings. There was such a demand on the few coal dealers that it was impossible to get enough teams and men to fill yet, and the 300 miners are idle.
