

PATENT

BATHING MACHINE.

BATHING, its necessity and expediency from the structure and functions of the skin, the cuticle is cast off in minute powdery scales, many of which are retained upon the surface by the pressure of clothing. These scales, if they are not removed, will form a thin crust. This crust, on account of its adhesiveness, collects particles of dust and soil from the atmosphere, and particles of foreign matter from our dress, so that, in the course of the day, the whole body becomes coated with impurities. If this coating remains it becomes thick and established upon the skin, and will produce the following effects:

First, the pores will be obstructed, consequently perspiration impeded, and the influence of the skin as an excretory organ prevented, and produces the following diseases: Indigestion, Biliousness, Acidity, a sense of oppression in the pit of the stomach, depression of the spirits, Headaches, Cold hands and Feet, Numbness of the limbs, and other disorders. Vertigo, Nausea, Difficulty of Respiration, Stupor, Irritability, Drowsiness, Debility, Extreme Languor and Exhaustion, Restlessness, Costiveness, Head-ache, Extreme Nervous Agitation, Palpitation of the Heart, an incapacity for the slightest exercise, dull, heavy pain and sense of weight in the Head, a temporary loss of memory, a sense of Crustiness, Pulse less frequent and more feeble than usual, Dependence on medicine, and extreme debility. A film of foreign substance on the skin will inevitably become the seat of deleterious infectious vapors. This is one reason why filthy persons contract infectious diseases more frequently than individuals of more cleanly habits. Bathing is useful to promote cleanliness.

This bath which the undersigned have the right to manufacture and sell is one of the most convenient imaginable, and can be used equally well for warm or cold water bathing, and only takes one bucket of water to supply it for any length of time. The water is poured into the lower part of the Bath; the person bathing stands upon a platform above the water, and by a slight movement of the body, the water is drawn up to the level of one foot to the other, the water is forced up into the sprinkler, from which it comes down on the bath with much force, the water passing into the pump at the fulcrum, gives great power to the double-acting force pump, and under the foot of the bath, causing the water to shower down with any desired force; indeed the bath has it in its power to produce a violent shock or gentle sprinkle by his own action. One bucket of water will answer every purpose, (as one wash-bowl answers the same purpose) the same water being thrown over the bath repeatedly in a constant current; but it is so arranged that where it is not desirable to use the water more than once, it can be replaced with fresh water, with very little trouble. These Baths are warranted to be durable in every particular. Persons desiring Baths, who live at a distance can be supplied immediately, by sending their address and twelve dollars. The strictest care will be taken in shipping Baths. All orders promptly attended to.

W. ROBERTSON, Manufacturer. The Bath can be seen at MICK'S Dry Goods Store, Crawfordsville, June 16, 1853. 4v51n6m.

DRUGS & MEDICINES.

SLOAN & MORGAN.
