## "AMERICAN" TIN.

The alleged manufacture of tin in this country, as announced in such assuring tones by all republican papers as an evidence of the good effects of the McKinley bill, is a fraud, a myth, a false assertion. What has heretofore been turned out as tin is simply a plate manufacture abroad and dipped with a small portion of tin mined in this country. Here is what a large, reliable house engaged in the tin trade sends out to its customers regarding the "American" tin:

OUR POSITION ON AMERICAN TIN PLATE. The numerous inquiries made of us as to how soon we would manufacture or distribute American plates that would be of the same class or high grade of excellence as those which we are now guaranteeing, render it necessary that we should publicly answer and define our position, which we do as follows:

Up to this writing we are not aware of any American maker who can give us the quantity we daily require, and the all important guarantee required by this house, nor is it reasonable for us to expect it at this early period. It must be known that months of time, thought and considerable money were expended by us before the best plates known to the American trade were put upon the market, and we assure the trade—now as we did then—that reputation with us is paramount. We shun misrepresentations just as we avoid their results, viz: unenviable notoriety.

As soon as we can secure American plates equal to those we now guarantee our customers shall have them; but we wish it understood that our idea of manufacturing tin plates is not that of "dipping" a plate made elsewhere and the use and abuse of a stamping machine. Any one familiar with the tin plate business knows full well such a plate can be erected and in operation in a few days.

MERCHANT &amp; CO.

## INDIANA'S SCHOOL CENSUS.

The census bulletins afford interesting reading for those who enjoy delving into statistics and, while there are necessarily some inaccuracies, the figures may be accepted as approximating the actual facts nearly enough to base all necessary calculations upon. In reviewing the school enrollment for Indiana recently, we found the total number of pupils to be 507,264, or something over half a million. It was also learned that this was five thousand less than the enrollment of ten years ago, showing a loss of nearly 1 per cent., although the increase in population during this time was almost 11 per cent. There are 8,498 colored pupils; 4,197 males, of 4,301 females. Of the white children there are 271,333 males, and 245,871 females. This surplus of 15,523 boys might be accounted for by the fact that so large a number of girls are educated in private schools. But the private school statistics show 17,612 pupils, of whom 9,570 are males and 8,042 females; the parochial schools show 25,545, of whom 15,939 are males and 12,596 females. Here we find a further surplusage of 1,871 boys, giving a total of 17,393 more boys than girls in the public and private schools of the State. And yet the roster of graduates will show that many more girls than boys complete the course of instruction. It is generally supposed that the number of woman teachers far outnumbered the men, but the table gives the same proportion of each among the whites, and among the colored ninety males and sixty-five female teachers.

## TRUSTS.

There have been time and again repeated maledictions against the oil trust, twine trust, coffee trust, and scores of other combinations, leagued together to maintain high prices and prevent competition. None were louder in their denunciation of these organizations than farmers. Now farmers' trusts to raise the price of wheat are being formed in the northwest.

A circular, reciting the benefits of combinations, and urging the formation of trusts has been made public. The circular estimates the wheat crop of 1891 in the United States at 500,000,000 bushels. The promoters of the farmers' wheat trust believe that four-fifths of this wheat can be held back by the farmers for from four to eight weeks, by which time, it is thought, prices will have gone skyward.

It makes a wonderful difference whose ox is being gored when it comes to trusts, and probably nine men out ten would favor them when there was money in it to them.

## DECORATION DAY.

The G. A. R. of Indianapolis has passed resolutions censuring college students for playing base ball on Decoration Day, and the students of Wabash and DePauw are especially cited for their offense in this respect. College faculties are to be informed of this, and requested that it be not repeated. Base ball teams have played ball on Sundays in scores of cities and do yet. If it is an offense for them to play on Decoration Day, why not on Sunday also. A great many of the orators on Decoration Day, it has been noticed, make it a point to infuse a certain amount of politics in their addresses. This certainly is foreign to the solemnity aimed to be thrown around Decoration Day, and is certainly as much out of place as the base ball feature of the occasion.

## WHAT THE BILLION CONGRESS MEANS.

Nineteen dollars for every hour since the creation of the world up to the present time; \$50 per hour since the coming of our Saviour on earth; \$100 per hour since the declaration of Independence; \$3,835 for every hour since the inauguration of Abraham Lincoln, or the commencement of the civil war; last but not least by any means, \$5,753 for every hour since the inauguration of Benjamin Harrison up to adjournment of the present congress, or that amount in two years; \$959 for every minute, \$16 for every second, or nearly \$17 per per head for every man, woman and child in the United States. The above is worth contemplating by the young.

THE Brazil Block Coal company, a rich corporation with property of the value of \$600,000, has heretofore been assessed at only \$60,000. The new tax law will compel the company to pay hereafter on what they have instead of about a tenth part of it as heretofore. The wisdom and justice of the new law is shown in this as in scores of other cases.

## COULD NOT HIDE THE PROPERTY.

One of the good effects of the new tax law was fully illustrated at Lawrenceburg, this state, the other day. The three banks of the town refused to report for assessment a large amount of personal property held by them, the old law, as they supposed, being still in operation and which enabled them heretofore to not list the property for taxation. They were informed that the new law would fit their case exactly and that they must report at once. Still refusing they were informed they could either report the property or go to jail. This brought them to time, and \$300,000 worth of property was at once listed. Why they could avoid the listing of property any quicker than the mechanic, hod carrier or laboring man was not apparent to the assessors, and the prompt manner in which they acted in the matter is commendable.

THERE are people who can easily be led to believe almost anything. A man named Melbourne at Springfield, Ohio, has for some weeks been operating with a machine and some chemicals by which he asserts he can draw rain from clouds at any time. He has set several times when he is to bring the rain, but heretofore his success has not been brilliant, yet there are many who think his machine is or will be a grand success. It is not at all probable that the work by any man of drawing rain from the clouds can be accomplished, and if it could be done there would be a constant call for him from many parts of the country. We could give him a good paying job now in this portion of Indiana.

## CAMPBELL'S OPPONENTS.

The fact that Gov. Campbell, of Ohio, was opposed in his re-nomination by a small coterie of corrupt scoundrels of Cincinnati should endear him that much more to the honest portion of his party through the state and induce them to labor that much more energetically to secure his re-election. His dispatch to one of them, "demand your resignation, as you are a dishonest official," or words to that effect, will be remembered and indicates the spirit of the man. Gov. Campbell, we judge, is one of those politicians who will do right as he understands it regardless of policy or expediency, and should be upheld in his efforts in that line.

OHIO is a great producer of wool, and the effect of the tariff on this commodity will cut quite a figure in the present campaign in that state. When McKinley made his campaign for congress last year his bill had but recently passed, and he told the farmers that there had not yet been time for them to feel the effects of what he had done for them, but that if they would wait a year they would find they would be getting 3 or 4 cents per pound more on their wool. They have waited, and are now getting 2 or 3 cents per pound less. The Ohio wool grower is a bigger fool than we think, if he will allow himself to be caught twice with the McKinley bait.

THE Minnesota authorities had the right conception of prize fighting and do not propose that such disgusting and brutal affairs shall occur in that state. Fitzsimmons and Hall, two two-legged bull dogs, had arranged for a \$12,000 fight at St. Paul last week, and the skum of western states known generally as "sports," began to gather in to witness the exhibition. It did not come off. The governor of the state and others in authority promptly squelched the affair, as they should, and the "sports" are much disappointed in consequence.

NEW MEXICO, with a population of 150,000, is refused admission as a state into the Union because its electoral vote would be democratic. Nevada, with a population of less than half of Indianapolis, has one senator and two representatives in congress, all republicans of course. Nevada should be taken out of the list of states and put back into the territorial condition as it is short in population, and New Mexico should be admitted as a state. That would not suit the republican gerrymander, and matters, unjust as they are, will probably remain in their present condition.

ON the presumption that Ohio will have a republican legislature at its next session, scheming for the U. S. senatorship has already begun among the three republican leaders of that state, viz: Sherman, Foster and Foraker. Sherman, by having possession of the office, will be a difficult man to overthrow, besides having the most influence among the solid substantial men of his party, but Foraker is a wonderful hustler, and may make the race decidedly warm for Sherman. Foster will probably be lost in the shuffle.

THE secretary of the treasury answers the complaint of the Democratic and Independent press against the billion-dollar congress, by saying that we are a "billion-dollar country." Admitting that this is true, from whom is the aid appropriated by the billion-dollar congress raised, the income of the "billionaires" or the hard earnings of the farmers and laborers? An investigation will plainly show the inquisitive mind that the owners of the billions and the men who pay the taxes for congress to spend are different persons.

SOME correspondent who has lately visited James O. Blaine says that he has Bright's Disease of the Kidneys, a disease that is incurable. It looks like his party was more troubled with that disease than he, judging from the conduct of its leaders for months.

DUDLEY and Quay will neither, it is asserted, remain with the national republican committee next year. As the party is prolific in scoundrels of like instinct there will perhaps be little difficulty in supplying their places.

ONE thing that will cast a gloom over the otherwise cheerful prospects of Gov. Campbell's re-election in Ohio is that the Cincinnati Enquirer gives indications of supporting him.

TERRE HAUTE has a base ball club that by hard work has been enabled to win two games out of thirty this season. This is a great record indeed.

If potatoes are as plenty as heirs to the Edwards estate in New York seem to be there will be no short crop this season.

Thirteen thousand mules are sold at Marshall, Mo., every year.

Recently a mirage was seen directly westward up Lake Erie.

The onion originally came from Egypt.

SUICIDE BY AMMONIA.  
The Terrible Agony Does Not Prevent Its Use.

No poison brings death with more maddening agony than ammonia, but that fact does not seem to discourage the suicide. The man Harrowitz, who deliberately swallowed a fatal dose of the drug in New York recently, is only one of the many who have gone the ammonia route to death in spite of the excruciating pain. Dr. Blyth has recorded thirty cases of ammonia poisoning in the small London district of which he is health officer; Professor Mitchell mentions twenty-two cases, and four have occurred during the short time Dr. Jenkins has been connected with the coroner's office in New York.

Cases of slow poisoning from ammonia are of constant occurrence among men who work in its manufacture, or even in decomposing substances which give it off in considerable quantities. Ammonia, slowly and from day to day taken into the system, causes the complexion to lose its freshness, and the skin of men who get heavily impregnated with it has a disagreeably blotched and discolored appearance.

Taken into the stomach from day to day in even the small quantities used to adulterate food, such as baking powder, it not only injures the complexion but attacks the lining of the stomach, and is the source of much general ill health.

The recent rapid increase in the use of ammonia for various purposes, and the consequent increase in its manufacture, have made it one of the most easily obtained poisons and, although everybody is familiar with it in some form, there is a surprising amount of ignorance of its dangerous qualities. Its use as an adulterant in any food preparation is simply a crime, and as a crime should be punished.

It is interesting and somewhat startling to learn from Prof. Maunder that the star Arcturus has a diameter of 70,000,000 miles.—New York World.

## Merit Wins.

We desire to say to our citizens, that for years we have been selling Dr. King's New Discovery for Consumption, Dr. King's New Life Pills, Bucklen's Arnica Salve and electric Bitters, and have never handled remedies that sell as well, or that have given such universal satisfaction. We do not hesitate to guarantee them every time, and we stand ready to refund the purchase price, if satisfactory results do not follow their use. These remedies have won their great popularity purely on their merits Nye & Co. Druggists.

The Grand Army men of Bangor, Me., have set a movement on foot for a monument to the late Vice-President Hamilton, to be erected in that city.

## Vintage of Grapes for Invalids.

The Port Grape wine of New Jersey is the best medical wine in the market, and it is said that the vintage of Alfred Speer far exceeds any other produced. It is heavy in body rich in flavor, and well adapted for sickly persons and for general family use. It makes new blood and gives color to the pale and sickly. Leading physicians prescribe this wine in their practice, and use it at their own homes. Druggists sell it.

A runaway horse at a funeral in Verona, Md., knocked a boy into the grave on top of the coffin. The animal barely escaped going in himself.

## Why It Is Popular.

Because it has proven its absolute merit over and over again, because it has an unequalled record of cures, because its business is conducted in a thoroughly honest manner, and because it combines economy and strength, being the only medicine of which 400 Doses One Dollar? is true—these strong points have made Hood's Sarsaparilla the most successful medicine of the day.

Three prospectors in Death Valley were nearly dying of thirst when their mule started off on his own hook and soon led them to water.

After diphtheria, scarlet fever, pneumonia, or any other severe illness, there is no better tonic than Hood's Sarsaparilla.

George Schweich, a merchant of Richmond, Mo., owns the table upon which the Book of Mormon was written. He values it at \$5,000.

I have had nasal catarrh for ten years so bad that there were great sores in my nose, and one place was eaten through. I got Ely's Cream Balm. Two bottles did the work. My nose and head are well. I feel like another man.—C. S. McMillen, Sibley, Jackson Co. Mo.

The Italian government will revive the medieval Venetian custom by wedding all its future warships with the Adriatic.

"A god-send is Ely's Cream Balm. I had catarrh for three years. Two or three times a week my nose would bleed. I thought the sores would never heal. Your Balm has cured me."—Mrs. M. A. Jackson, Portsmouth, N. H.

The largest bay in the world is Hudson bay, which measures 550 miles north and south by 600 miles in width.

## A Safe Investment.

Is one which is guaranteed to bring you satisfactory results, or in case of failure a return of purchase price. On this safe plan you can buy from our advertised Druggist a bottle of Dr. King's New Discovery for Consumption. It is guaranteed to bring relief in every case, when used for any affection of Throat, Lungs or Chest, such as Consumption, Inflammation of Lungs, Bronchitis, Asthma, Whooping Cough, Croup, etc., etc. It is pleasant and agreeable to taste, perfectly safe, and can always be depended upon. Trial bottles free at Nye & Co's Druggists.

The thickness of human hair varies from the two hundred and fiftieth to the six hundredth part of an inch.

Ex-Congressman Cannon, of Illinois, has acquired three newspapers in the district he formerly represented.

Macon, Ga., dealers have begun shipping watermelons direct to Liverpool.

Berlin women have formed a league to wage war on the corset.
