The New Theory Exploded.

It is reported that there is a new theory in the Pettit case. The theory takes the form and figure of what is known as "ground poisoning." The story is told that the wife of Rev. W. F. Clark, who recently died at Shawnee Mound, in the same house in which Mrs. Pettit died, betrayed the same symptoms as those that characterized Mrs. Pettit's last illness. And upon this the theory of "ground poisoning" is based. But there is nothing in it. A Journal representative had a conversation with Dr. S. S. Clark, of Logansport, last week. When the new theory was mentioned, Dr. Clark said: "That whole story is absolutely groundless. Rev. Clark is my brother and I know all about the death of his wife. She died of cancer of the liver. A post mortem was held and this fact established beyond a doubt."—Delphi Journal.

Who Owns the Monon?

The Lafayette Leader asks: "Who owns the Monon?" and continues: "With in the last few weeks large blocks of stock of the Louisville, New Albany & Chicago road have been changing hands, and mention was made recently that the holders of stock in Boston had entirely unloaded. Now the report comes with some degree of authority that a syndicate has been formed, with John B. Carson at its head, which has secured a controlling interest in the road, and that they will in a few days show their hand. When the Breyfogle management took control the Carson syndicate was with little ceremony thrown overboard, and indications now are that he is about to turn the scales in favor of the Carson people."

MURPHY'S MISSION.

Work of an Agent of the Agricultural Department in Europe.

THE APOSTLE OF AMERICAN CORN.

He is Engaged in the Work of Teaching Foreigners the Value of the Cereal as an Article of Human Food.

MAKING GOOD PROGRESS.

WASHINGTON, Oct. 16.—Cables from Berlin indicate that Charles J. Murphy, special agent of the United States agricultural department, is receiving much attention in Germany in his efforts to introduce Indian corn. This recognition of Murphy comes very tardily. For the last five years he has been laboring at the European capitals to induce people to use Indian corn as a food. He spent his own money and reduced himself almost to the point of beggary. Murphy turned up at the Paris exposition with plans of a "corn palace," but Director General Franklin and the American commissioners snubbed him and declined to have anything to do with the corn project. The treatment he received made many believe Murphy was a crank, and he was treated accordingly. After getting the cold shoulder from American officials he turned his attention to the American tourists in Paris. With his wife and cook he visited the hotels which Americans patronized and surprised them at their dinners by laying before them generous supplies of American "johnny-cake," American cornstarch pudding and other corn foods.

When Secretary Rusk took hold of agricultural affairs he was greatly surprised that no official effort had been made in Paris to show the value of American corn as a food. He heard of Murphy and wrote to him just about the time that the "corn crank" was on his last legs. Later Mr. Murphy was commissioned as special agent for the agricultural department at \$2,000 a year. He wrote to the agricultural department a short time ago, saying that if it had not been for the appointment coming in the nick of time his entire labor of years would have been thrown away, for the money he had squandered and the kicks and snubs he had received had at last driven him to desperation. Commissioned as the representative of Secretary Rusk he now goes to Germany with prospects that his labor will at least be recognized.

Samuel J. Tilden was the first to propose that foreigners should be taught to use American Indian corn as food. He got Abraham S. Hewitt to introduce a bill in congress giving \$100,000 toward introducing this article abroad, but the bill failed to pass. After twenty years Secretary Rusk takes up Tilden's idea and is putting his best efforts into making it a success. Up to the present time only 4 per cent. of our entire corn product has been sent abroad and even this insignificant export has been used by the foreigners as cattle feed. But with Europe urgently pressed for breadstuffs, to take the place of her short crops, Secretary Rusk believes that the time has come to open this foreign market for corn as a human food, and that "corn cake" will be the apostle of corn in Europe.

THE WATERWAYS.

Resolutions Adopted by the Convention at Evansville, Ind.

EVANSVILLE, Ind., Oct. 16.—The waterways convention met promptly at 9 o'clock Thursday morning. Permanent organization was effected by the election of ex-Gov. E. O. Stannard, of Missouri, as chairman; T. W. Venneman, of Evansville, secretary, assisted by J. W. Bryant, of Louisiana, and E. M. Sharon, of Iowa. On taking the chair Gov. Stannard made a speech in favor of river improvements, which, he said, were demanded as a menace to the high rates of railroads. C. A. Fiecke, of Iowa, made an appeal for the Hennepin canal, showing its necessity and the work already done in its behalf. J. F. Dravo, of Pennsylvania, spoke of the improvements needed in the Ohio river. Resolutions were adopted asking congress to make fixed and continuous appropriations for improving waterways; to make it a penal offense to encroach upon the channel of rivers by dumping refuse; urging that navigable rivers be obstructed as little as possible by bridges; recommending continued appropriations for the upper Mississippi and commending the action of congress in appropriating \$500,000 for the Illinois and Mississippi canal.

Ceremonies at Fort Recovery.

FORT RECOVERY, O., Oct. 16.—Notwithstanding the wet weather and the cold there were fully 10,000 people here Thursday. The interest was in the rows of coffins in the church containing the remains of the soldiers who fell in the battle of Fort Recovery. These remains will be buried to-day in the new federal cemetery. David Baker, of Indiana, delivered an address in the forenoon and made a plea for the erection of a monument. In the afternoon Gen. Gibson, of Tiffin, spoke on the history of St. Clair's defeat.

Thousands of Fish on Dry Land.

DURQUE, La., Oct. 16.—There are thousands of dead fish along the banks of the Mississippi. The river fell suddenly, and is lower now than it has been for twenty years. The fall left a large number of fish in pools, which gradually dried up, and the fish have since died on their bed of scorching sand. This state of affairs exists for miles along the river.

Dual Murder in Kentucky.

MOUNT STERLING, Ky., Oct. 16.—George Cupps shot and instantly killed George and James Howard, brothers, who lived in Bath county. The Howards were the leaders of a gang of masked men who went to Cupps' house for the purpose of doing him bodily injury. A woman with whom Cupps was keeping company is said to be at the bottom of the trouble.

MRS GRAHAM'S

Cucumber

AND

Elder Flower

Cream

Is not a cosmetic in the sense in which that term is popularly used but permanently beautifies. It creates a soft, smooth, velvety skin, and by daily use gradually makes the complexion several shades whiter. It is a constant protection from the effects of sun and wind and prevents sun burn and freckles, and blackheads will never come while you use it. It cleanses the face far better than soap and water, nourishes and builds up the skin tissues, and thus prevents the formation of wrinkles. It gives the freshness, clearness, and smoothness of skin that you had when a little girl. Every lady young or old ought to use it as it gives a more youthful appearance to any lady, and that permanently. It contains no acid powder or alkali, and is as harmless as dew and as nourishing to the skin as dew is to the flower. Price \$1.00, at all druggists and hair dressers, or at Mrs. Gervase Graham's establishment, 103 Post Street, San Francisco, where she treats ladies for all blemishes of the face or figure. Ladies at a distance treated by letter. Send stamp for her little book "How to be beautiful."

Sample Bottle mailed free to any lady on receipt of 10 cent stamp to pay for postage and packing. Lady agent wanted.

CHEATING
IN HORSE
BLANKETS

Nearly every pattern of $\frac{3}{4}$ Horse Blanket is imitated in color and style. In most cases the imitation looks just as good as the genuine, but it isn't the *same* threads, and so lacks strength, and while it sells for only a little less than the genuine it isn't worth one-half as much. The fact that $\frac{3}{4}$ Horse Blankets are copied is strong evidence that they are THE STANDARD, and every horse owner should see that the $\frac{3}{4}$ Horse Blanket is sewed on the inside of the blanket.
