Big Four Salaries.

The following figures are said to represent the salaries of the leading officials of the Big Four railway system. MANY PERSONS PERISH IN A FLOOD.

Texas Town Overwhelmed by a Rush of Waters from an Artesian Basin in the Hills—Property Damage of a Million and a Half.

SAN ANTONIO, Texas, Sept. 1.—An earthquake burst the earthen walls of an artesian water basin in the hills near Uvalde, a thriving town, the county seat of Uvalde county, Texas, at 2 o'clock yesterday morning. The flood overwhelmed the town, submerging and wrecking houses and drowning a number of people. It is feared that 200 or 300 people may have been drowned in the lowlands south of Uvalde.

Among those known to have perished are the following:

EDWARDS MATTIE, MISS.
HATCH JOE, MRS.

MALEY, —infant.

TWO MEXICANS.

THREE FAMILIES, names unknown.

It was 2 o'clock in the morning when the flood came. The weather had been threatening and there were ominous clouds to the northeast of the town. The atmosphere had been close during the evening and predictions of a storm were freely made. The dark clouds rose higher and higher. Just as the storm broke over the city in all its fury a torrent of water rushed down the Leona river, overflowing the banks of that stream and flooding the low lands on either side to a depth of several feet. It was at first supposed the flood was caused by a cloudburst.

An earthquake shock of some seconds' duration was distinctly felt during the night. At one place near the city a quarter of a mile of heavy cracks appear on each side of the Leona river, having apparently no bottom.

The east side of Uvalde is built on lowland and was directly in the path of this water. All the houses in the heart of the town were submerged, and in the darkness and throughout the downpour of rain that was falling could be heard the cries of distress from the ill-fated inhabitants in their wild efforts to save their lives and those of their families and loved ones.

There were a number of miraculous escapes, and the rescuers and the rescued performed many heroic acts.

As soon as those in the higher part of the town were made aware of the terrible flood and its dire consequences the work of rescuing was begun and carried out as rapidly as possible in the darkness of the night.

Great apprehension is felt for the families living on the ditch south of Uvalde, where from seventy-five to one hundred families live, and the land lying fifteen feet lower than Uvalde. It is feared they have been destroyed. One Mexican family living on the ranch of L. Schwartz, five miles below, is supposed to have been lost, no vestige of the ranch buildings being left. It is feared that Indians' history is reported.

A track walker of the Southern Pacific, after wading through water up to his neck with his lantern elevated above his head, succeeded in feeling his way far enough east to intercept a westbound train and prevent its plunging into the raging river where the railroad bridge had been destroyed.

News reached Uvalde that three families living below town were drowned. The names have not yet been learned.

The loss to the Southern Pacific company is enormous, forty miles of track and many bridges having been washed away. Over one hundred carloads of material and 300 laborers left San Antonio for the scene of the wreckage. The damage to the Southern Pacific extends eastward about seventy-five miles from Uvalde.

A rough estimate of the loss to property in general and the railroad company will, as far as known, reach \$1,500,000.

The other defendants Armstrong and Mullins are held to the United States grand jury in the sum of \$500 each.

WRECKED IN A NATURAL GAS EXPLOSION.

INDIANAPOLIS, Ind., Sept. 1.—By an explosion of natural gas yesterday afternoon the West Washington street power house of the Citizens' Street Railway company was demolished, incurring a loss of about \$20,000. Engineer Egan and Fireman J. H. Gallagher were struck by flying missiles and injured.

PECULIAR TO ITSELF.

Hood's Sarsaparilla is peculiar to itself, in a strictly medicinal sense, in three important particulars, viz: first, in the combination of remedial agents used; second, in the proportion in which they are mixed; third, in the process by which the active curative properties of the preparation are secured. These three important points make Hood's Sarsaparilla peculiar in its medicinal merit as it accomplishes cures hitherto unknown.

But it is not what we say but what Hood's Sarsaparilla does that tells the story. What Hood's Sarsaparilla has done for others is reason for confidence that it is the medicine for you.
