In the Palatka brewery at Milwaukee is a machine which corks, wires and caps 16,000 bottles per day automatically. The strongest known wood is krajiwood, of Borneo but the Canada rock elm is stronger in proportion to its weight.

Unconscionable thieves stole the roof of a house at Skamokawa, Wash., sawing it off, rafters and all, just below the top of the walls.

More than 28,000 applications for patents were made in England during 1896. About one-third of them relate to inventions appertaining to the bicycle.

The lemon output of San Diego county, California, for the year just closed, foots up 262 car-loads. The estimated yield for the coming year is 400 cars.

For Fish Commissioner

J. H. McCoy circulated a petition in town yesterday, asking Gov. Mount to appoint Joseph Obaver fish commissioner. Mr. Obaver's friends of all parties gladly availed themselves of the opportunity to urge his appointment. No better selection could be made, and we trust the petition will result in giving the appointment to Mr. Obaver. The middle Wabash would seem to be the place for the fish commissioner at this time, when steps have already been taken to restore the fishing of western Indiana. Sugar Creek, Raccoon, Coal Creek, the Tippecanoe river and other streams could be advantageously looked after by Mr. Obaver, and above all he would see that unlawful fishing was stopped. These are strong points in his favor, and should receive the consideration of Governor Mount.—Rockville Tribune.

Gas In Old Wells.

R. J. Leeson, a geologist, has been experimenting with natural gas wells in Anderson. He has been of the opinion that natural gas wells simply choke up. He put the drill down the casings and found, as he has reasoned, that it came in contact with a very heavy, muddy substance about 100 feet from the bottom. This he removed with a great deal of trouble and sent a drill in each case down several feet further. Gas began flowing very sluggishly, but increased rapidly until now the two wells are not only yielding a good supply, but are better than the best of the new wells drilled in.

One reason for forming farmers' insurance companies, nowadays, is the fact that nearly all the old and well known stock companies have withdrawn from all farm risks, and with not take them at any price.
