NEXT CONGRESSIONAL NOMINEE.

Candidates for the nomination for
Representative in Congress on the democratic
ticket in this district may be scarce
this year, but that is no reason that
the party should be indifferent regarding
it, or fail to nominate a candidate
who will be satisfactory. The candidate,
whoever he is, should be in full accord
with the party on the tariff, financial
and other questions, and be a democrat
in all that the name implies. This
matter of policy in the selection of
candidates for the nomination to important
offices most generally reacts on the
party that adopts it. It most generally
implies insincerity, cowardice and the
want of fixed political belief. Although
the prospect for success may not seem
the most encouraging, if you desire to
increase lukewarm voters just nominate
a man on the policy plan and not as an
exponent of your political belief, thought
and action. Suppose you nominate a
policy man and elect him, what then have
you gained? A very doubtful victory. He
may stay with you on some things, and on
others act the opposite from what you may
desire. The duty of the delegates at the
next Congressional convention is plain.
Nominate a democrat, true and tried,
and go before the people without any
evasive declaration. Let the verdict be
what it will, it will be more satisfactory
than any other.

HANNA'S VICTORY.

Mark Hanna, the manager of the
McKinley campaign, was elected U. S.
Senator from Ohio for six years last
week by the legislature by a majority of
one vote. It may be said truly to be
the dearest purchased victory ever known
in a contest for a like position before
the legislature of any State. For the \$30,000
salary attached to the six years position
he has probably spent three times that sum
of money to obtain it, and although the
position of a U. S. Senator is looked upon
as one of honor, conservative, honest people
will wonder where the honor comes in as
applied to this man and his methods. Where
can such a man give honor to the place
whose whole political life smacks with
the odor of bribery and corruption, bargain
and sale. He will always have been considered
as having purchased his office, and as having
secured it through any wish of any but
a small portion of his constituents. There
is no question but that he bought
members of the legislature of his party to
vote for him. The emoluments of his
office he can retain, but that is all. If the
people of his State, knowing the man as
they do, can have any respect for him
then their estimation of decency, honor
and honesty is surely of a very low grade.

TO HIM PROSPERITY IS NOT EVI- DENT.

The republican editor at Petersburg,
Indiana, unlike the Journal man of this
city who edifies his readers almost daily
with matter aiming to show that prosperity
is here, says: "During each month of the
year we furnish our readers with republican
prosperity supplements—no more such
supplements will be sent out with our paper.
The supplements are a fraud, a delusion and
a lie. We are ashamed of them, sick and
sore at the idea of sending out such
'Prosperity Supplements,' when at the same
time we are unable to collect enough money
to meet our bills, after having made them." That
fellow is sincere, does not speak only as he
sees things, and will not probably hereafter
be cajoled into the support of such false
promises as the republican platform gave
out last year.

MCARDLE FOR REPRESENTATIVE.

The name of John McCardle, of
Frankfort, formerly of New Richmond,
has been favorably mentioned as a candidate
for Representative in Congress. Mr. McCardle
has the qualifications of being a good business
man and a reliable democrat, voting with
and acting with the party from the time he
was eligible. The voters of the party will
not this year be satisfied with any man
as a candidate unless he is with it in all
its principles and declarations, and it will
be a useless work of the delegates to aim
to place any man in nomination who in any
respect differs from them. Mr. McCardle,
we believe, would prove a satisfactory
candidate.

CITY OFFICES.

Crawfordsville citizens should take
time this year to select good men for
councilmen, mayor and other officers of
the corporation. We want taxes reduced
before any improvements are placed under
way. Much of the material now offered
for nominations to city offices is poor and
worthless. It is of interest to your pocket
books to elect good men to these places, and
to kick out any whom you may consider as
incompetent or in the least liable to be
tainted with any corrupt scheme.

The republicans about Bloomington
sent a letter to Congressman Landis
approving his course in his speech
against the civil service law. While this
does not at all indicate that the law is
wrong it clearly demonstrates that there
are many hungry republicans in that town
who would do almost anything to get office.

The readers of this paper will be
pleased to learn that there is at least
one dreaded disease that science has been
able to cure in all its stages and that is
Catarrh. Hall's Catarrh Cure is the only
positive cure now known to the medical
fraternity. Catarrh being a constitutional
disease, requires a constitutional treatment.
Hall's Catarrh Cure is taken internally,
acting directly upon the mucous surfaces of
the system, thereby destroying the foundation
of the disease, and giving the patient
strength by building up the constitution
and assisting nature in doing its work.
The proprietors have so much faith in its
curative powers, that they offer One Hundred
Dollars for any case that it fails to cure.

When wear begins to exceed repair in
your body you are going to fall sick.
The signs of it are: loss of flesh, pale-
ness, weakness, nervousness, etc. The
repair needed is food. You think you eat
enough, and yet you feel that you wear
out more tissue, energy, nerve-force,
than your food makes for you. The difficulty
is that you do not digest enough. And this
is so serious it is worth sitting down seriously
to think about. If you can't digest what you
eat, take a few doses of Shaker Digestive
Cordial. The effect of it will be to increase
your flesh and make you feel stronger. You
won't fall sick. Proof that it is in control of
your repair apparatus. It's easy enough to
test this for yourself. Take a few bottles of
Shaker Digestive Cordial.

ASCENT OF MOUNT RAINIER.

Of the Seventy-Three Who Started Only
Fifty-Eight Reached the Crater.

The Mazamas—an organization of
mountain climbers on the Pacific coast
—made their first ascent of Mount
Rainier, near Tacoma, in July. The
party numbered seventy-three, many of
them inexperienced mountaineers. Of
the seventy-three who started, fifty-
eight reached the crater. The others
were compelled to return. Those who
were successful accomplished a feat
which many have tried and failed.
While the successful ones were en route
to and from the summit, three distinct
parties that left Paradise Valley with
the intention of spending a night in the
crater were compelled to give up in de-
spair after reaching an altitude of
about 12,000 feet. It may be said that
but for the presence of a half dozen or
more experienced mountain climbers,
some of the amateurs of the Mazama
party would not have seen the summit
of Rainier. Life lines were kept out
during the entire trip, and, as one
climber said, "the experienced members
of the party ascended several times,
while the amateurs hardly reached the
summit." All the weak ones had to do
was to hold on to the life lines, and
they were safe. On the return trip
Prof. Ernest McClure, of Oregon, met
his death. He was in advance of the
main party when he slipped on a high
precipice of snow, striking head first
on rocks 200 feet below. Death must
have been instantaneous. Had he gone
fourteen feet further east he would
have missed the rocks entirely, sliding
down the mountain for perhaps one-
quarter of a mile, but in all probability
in safety. His death is the first
fatality to occur on Rainier. Two
other men slipped and fell into the
crevice, being rescued with extreme
difficulty.

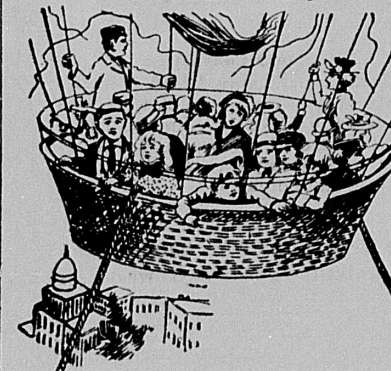

TO EAT WHEN SNOW FLIES.

Peaches One of the Most Delicious of
Winter's Preserves.

Preserved peaches make one of the
most delicious of the winter preserves,
and are said to be particularly good
when a sliced pineapple is done up
with them. When the fruit is skinned,
quartered, and the pits extracted,
weigh it, and allow the customary
"pound for pound" of sugar. Crack
one-quarter of the stones, take out the
kernels, which break in bits, boil in a
little water, and then set aside to steep
in a covered vessel. In the bottom of
a preserving kettle, put a layer of
sugar, then one of peaches (mixed with
pineapple or not, as desired), and so on
alternately, until all are used. Set over
the fire, where it will heat through
slowly. Strain the kernel water and
add to the mixture. Then boil steadily
for half an hour, or until the peaches
are quite clear and tender. Skim out
the fruit and lay it on flat dishes. Boil
down the syrup almost to a jelly, tak-
ing off all the scum. Fill the jars two-
thirds full of peaches, then fill to the
top with the boiling syrup. When
cold, lay brandy tissue paper on top
and screw on covers, or seal over with
cloth and then heavy paper tightly tied.
Spiced peaches go nicely with roast
meat. The fruit must be peeled,
halved, and stoned. Then to nine
pounds of peaches put four pounds of
sugar and a scant cup of vinegar. Boil
the fruit in water until soft, then pour
off and add the sugar and vinegar, in
which should be immersed a few whole
cloves, half a dozen sticks of cinnamon,
and a little mace. Boil all together for
half an hour.—Philadelphia Times.

PLAN TO GIVE TOTS FRESH AIR.

Balloons are again up for discussion
in London. A most interesting scheme
is to utilize them for providing the
poor of the east end districts with fresh
air. Two minutes' perpendicular jour-
ney in a balloon will take any one to
air that is fresher than any that can
be had at the end of forty-eight hours
traveling in a train. It is, therefore,
suggested that gigantic captive bal-

Weight of the Brain.

Prof. Sir William Turner, in an ad-
dress at the recent meeting of the
British Association for the Advance-
ment of Science in Toronto, recited
some interesting facts about the hu-
man brain. The average brain weight
in man, he said, is from 49 to 50
ounces. In women the weight is from
44 to 45 ounces. A few men, includ-
ing the great naturalist, Cuvier, have had
brains exceeding 60 ounces in weight,
but equally heavy brains have occa-
sionally been obtained from persons
who had shown no sign of intellectual
eminence. Among infant children the
average brain weight is for girls 10,
and for boys 11.67 ounces.
