For Commissioner, 1st District—O. M. EDDINGFIELD. 2nd District—JAMES GALLOWAY.

**"SHORT" TREASURERS.**

This county would seem to have had more than its share of treasurers that were short in their accounts on final settlement before going out of office. They are said to number no less than six persons who, as treasurers of the county, could not pay up in full the funds collected by them and have been compelled to have their bondsmen make up the shortage, or the county be compelled to lose a portion of it. The people have had enough of this for a long time to come, and hereafter we believe, it is going to be a difficult matter for any one elected to the office to give the necessary bond. The voters are shaky about them, notwithstanding their reputation for business integrity or standing in the community. In fact it would seem that hereafter treasurers elect to save all trouble at home and remove all doubt should secure their bond from some of the numerous guarantee companies of the east. It costs something to secure this kind of a bond, yet if trouble should arise thereafter the friends of the treasurer will not be involved, and neither will the county. If a treasurer is short then it is a matter then solely between himself and the guarantee company.

The treasurer's office in most counties of the State is headquarters of most of the political dead beats of both parties and always has been, and no official, generally speaking, is more imposed upon than the county treasurer. The dead beats time and again fawn upon him for an "accommodation" of \$10 or \$20 which they never expect nor intend to pay. The old farmer of "influence" in his neighborhood frequently requests the treasurer to write out his receipt for taxes before the 10 per cent. penalty is added and he will be in "after harvest" to lift it, yet frequently fails to come around for six months thereafter, and the treasurer is compelled to pay the added per cent. himself. The managers of this or that church festival or charitable enterprise never fail to call on the county treasurer. All these things wear on the treasurer. One of the worst qualifications that a county treasurer can possess is to be a "clever feller." It has proved to be the ruin of many of them. John L. Goben was gifted with cleverness, and was the best electioneer ever known in the county, yet at the same time it is questionable if a more incompetent man ever filled the county treasurer's office. He was "short" and the county lost money by his official conduct. Now here is a contrast. Capt. Herron was not so

"clever." The dead beats got little consolation from him. He had business capacity and the county did not lose a cent when he settled up in going out of office. More business capacity and less of the "clever feller" should be the gauge hereafter to measure candidates for the important office of county treasurer.

**THE ISSUE AGAIN.**

Republican politicians and newspapers quite often assert that as a political issue the silver question is dead and cannot be resurrected. The assertion is not true. The "good times" financially to come, as republicans stated when the gold standard was determined upon by the election of McKinley have not materialized. Times are not at all as good as they were seven and eight years ago. Business with many firms all over the country continues only indifferent and out of the great mass of business men few enjoy the luxury of "making money." The 6,500,000 voters who cast their ballots for Bryan are still of the opinion that free coinage on the basis of 16 to 1, would have been and would yet be a suitable panacea for all our financial woes. The gold standard most assuredly has not been. The monopolists, the money changers, the bond clippers, are still on top and still continue to dictate the financial policy of the government. They do well financially, regardless of the interests of the less favored classes. A policy which will prevent the monopolizing of any money into the hands of a few is the one to be desired and which will give prosperity to the country. The 16 to 1 is believed by millions of voters to be the correct one and it is represented in Hon. Wm. J. Bryan, and should he live he will again be the standard bearer of the democracy and the exponent of those principles in finance which we believe will again bring prosperity to the country. The gold standard theory of the republicans have failed to meet the demands of the people. Let us try the other.

**AN ENGLISHMAN'S VIEW.**

Henry Norman, in the London Chronicle, portrays America as it appears to an Englishman, and his portrayal has the deepest significance. He says that the old America, the America obedient to the traditions of the founders of the republic, is passing away and that a new America, an America standing armed, alert and exigent in the arena of the world struggle is taking its place. He says the change is threefold, as follows:

1. The United States is about to take its place among the great armed powers of the world.
2. By the seizure and retention of territory not only not contiguous to the borders of the republic, but remote from them, the United States becomes a colonizing nation, and enters the field of international rivalries.
3. The growth of good will and mutual understanding between Great Britain and the United States and the settlement of all pending disputes between Canada and American, now virtually assured, constitute a working union of the English speaking people against the rest of the world for common ends, whether any formal agreement is reached or not.

**Deafness Cannot be Cured**

by local applications as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surface.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular, free. F. J. CHENEY & Co., Toledo, O. Sold by druggists, 75c. Hall's family pills are the best.

In Portugal married women retain their maiden names.

**A Strong Nation.**

Consists of strong men healthy women, and health and strength depend upon pure, rich blood which is given by Hood's Sarsaparilla. A nation which takes millions of bottles of Hood's Sarsaparilla every year is laying the foundation for health, the wisdom of which will surely show itself in years to come.

Hood's Pills are prompt efficient, always reliable, easy to take, easy to operate. 25c.

There is more exertion used in running 200 yards than in riding a bicycle four miles.

# FACING THE FEVER.

HOW TO KEEP WELL IN THE CAMPS OF TROPICAL CUBA.

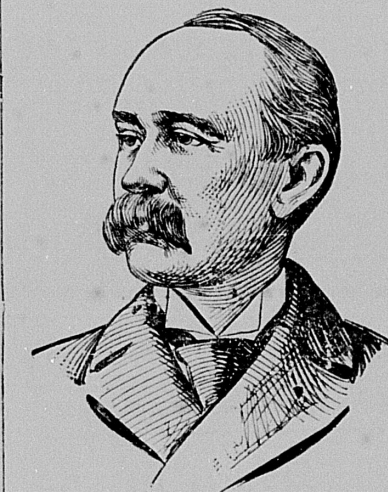

Death Lurks In the Streams and Lakes, and Fruits and Nuts Must Not Be Eaten by New Arrivals—Precautions For the Preservation of Health.

While the authorities are taking every possible precaution to preserve the health of our soldiers in Cuba there is no disposition to belittle the actual dangers that exist. Surgeon General George M. Sternberg calls attention to the fact that in the last week of April last year there were 17 deaths and 70 new cases of yellow fever in the city of Havana. Now, suppose that we had a similar number of cases at the same season in New Orleans and that 20,000 strangers from the north should go there to spend the summer. What would be the result? All past experience supports the belief that a majority of them would have yellow fever and that from 20 to 40 per cent of those taken sick would die.

"If," says Dr. Sternberg, "our troops could be encamped upon high land in the interior and circumstances were such as to enable them to comply with all the exactions of modern sanitary science, I am of the opinion that our loss from yellow fever would not be serious, but in time of war military commanders are expected to take their troops to the points occupied by the enemy, and a picnic in the interior, with frequent changes of camp, etc., is perhaps not exactly what we may expect. I am not an alarmist, but I believe in looking facts fairly in the face."

Cleanliness is absolutely essential to health and life in Cuba, but all baths must be medicated. A plunge in the fresh water of Cuba means sure sickness to the person who takes it. The water is polluted with all the malaria of the soil, and typhoid and cholera are in every drop, not to mention typhus and other harmful influences. The proper drugs for the medication of baths are put up in tablet form and are supplied to the army free of cost.

In the matter of eating inability to resist temptation means death. Cuba abounds in fruits and nuts, but they must not be eaten at first. The first day on the island the soldier must abstain from everything except coffee and bread if he is going to keep his health. The bread is the hard, army bread, and the coffee may be only a supply of the ship's coffee, but he must be contented with it; otherwise he will certainly be ill. The second day he can look around and take a further chance, but let him only eat that to which he is accustomed.

DR. GEORGE M. STERNBERG.

Canned goods, potatoes, dried fish, crackers and such simple food as he has seen upon his own table every day at home are the only ones which he must venture upon.

The matter of clothing is important. Thin garments are essential, but the army blanket should be used at night. Shoes trouble the soldier shortly after his arrival. He finds that his feet are swollen and that his shoes are painful. He has not been accustomed to being on his feet so much nor is he used to the dampness and mud of the wet ground. To use his shoes let him soak them in cold water until they are thoroughly wet, then let him put them on and march in them until they dry upon his feet. He will not take cold on the march. When the shoes have dried, they will have formed themselves to the feet and will be comfortable.

Water is something the soldier must not drink. This he must put down in his notebook as an absolute rule. If he drinks water, he will die of Cuban fever. He can be positive of this, for not one water drinker out of 50 has ever escaped the fever in Cuba during the rainy season unless he be a native.

Instead of plain water a medicated water must be taken. This is boiled water with a drop of acid in it. Boil the water, let it cool and squeeze in a dash of lemon, orange or other tart fruit. It is not necessary to add over three drops, only just enough to give acidity to the water. At first this warm water will be unbearable, but in a few days it will taste as good as ice water.

No soldier during the rainy season in Cuba can eat a heavy breakfast and march after it. He must eat lightly and often. It will also be necessary to take a siesta after lunch. Even the rough and tumble insurgents do this, and they are men who fight to the death. They find it necessary to sleep two hours in the afternoon even though they march at night.

**Keeping the Bank Safe.**

One of the largest banks in New York makes a searching examination of each department at least three times a year. No one but the president knows when these may take place. He summons three heads of departments, and they take charge of the clerks' books and firm assets so quickly that nothing can be changed or concealed. Since this system was adopted, several years ago, no trace of dishonesty has been found. Those clerks who get through a year without an error receive a premium.
