CROUP

THERE IS NOTHING that strikes terror to the hearts of parents more than to be awakened in the night by the ringing cough which accompanies an attack of croup. The child may retire with nothing but a slight cold and a few hours later the family be aroused by the ominous symptoms. Every home where there are small children should be prepared for these sudden attacks, as prompt treatment is necessary. Do not experiment with remedies of doubtful value, but get

CHAMBERLAIN'S COUGH REMEDY

that has been in use for nearly forty years and never known to fail.

Mr. Homer Krohn, of Lisbon, Iowa, in a letter to the manufacturers of Chamberlain's Cough Remedy, says W. M. Parish, Palmerston, Ontario, "Out of the many bottles sold last winter not one was returned. We recommend it especially for children with croup." Chamberlain's Cough Remedy is famous for its prompt cures of coughs, colds and croup. When given as soon as the child becomes hoarse an attack of croup may be averted. This medicine is entirely free from narcotics or injurious substances of any kind and may be given to the little ones with absolute safety.

Attacks of croup are most likely to occur during the early winter months, and every family with young children should be prepared for it. Keep a bottle of CHAMBERLAIN'S COUGH REMEDY in your home. It only costs a quarter, large size 50 cents. Your druggist sells it.
