WESTERN CANADA

320 Acres Instead of 160 Acres
As further inducement to settlement of the Wheat-raising lands of Western Canada, the Canadian Government has increased the area that may be taken by a homesteader to 320 acres-160 free and 160 to be purchased at only \$3.00 per acre. These lands are in the grain-raising area, where mixed farming is also carried on with unequalled success. A railway will shortly be built to Hudson Bay, bringing the world's markets a thousand miles nearer these wheat fields, where schools and churches are convenient, climate excellent, railways close to all settlements, and local markets good. "It would take time to amply state the revelations that a visit to the great empire lying to the north is unfolded at every turn." Correspondence of an Illinois Editor who visited Western Canada in August, 1908. Lands may also be purchased from Railway and Land Companies at low prices and on easy terms. For complete maps and information as to low Railway Rates, apply to Superintendent of Immigration, Ottawa, Canada, or to the authorized Canadian Government Agent.

Out of all this the promoters hope for one thing-that the need of a tariff commission will be shown and that steps will be taken to obtain the necessary legislation.
