Get out of the rut. Don't use one kind of fertilizer for all kinds of crops—but systemize the work, using our oats fertilizer for oats, wheat fertilizer for wheat, lawn fertilizer for lawn, and corn fertilizer for corn. Each plant needs different kind of plant food and you cannot get it out of one kind of fertilizer for all plants. There is some waste somewhere. The brand I handle has been on the mar-

ket since 1881 and is tried and proven. A fertilizer of different characteristics for the different plant necessities. Better come in and talk over the proposition.—H. H. Bremerkamp,
