How
Much
Longer
?

IF it's a Maxwell, the official registration in New
York, under the Callan law, will give you some
idea. The Callan law requires motorists to register
old as well as new cars each year. The records show:

768 Maxwells registered in 1905 made in that year.
702 of these 768 registered again this year.

Thus 91% of all the Maxwells sold in New York
State in 1905 are still in service after five years.
It is fair to assume that of the 9% (66 cars) many
have been sold and are used in neighboring states.

A low estimate of the mileage attained would be 10-
000 miles a year, 50,000 miles per car, aggregating

35,100,000 Miles

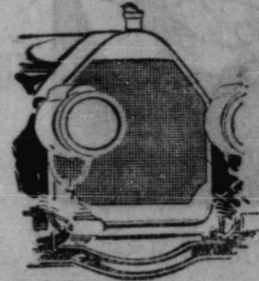

WHAT does this prove? It proves that a moderate-priced car, built the
Maxwell way, is durable and lasting and just as serviceable as a high-
priced car—the excess in price in costlier cars is for non-essential luxuries
of equipment.

These official figures prove beyond doubt the superiority of the Maxwell—
demonstrate that it is the most durable, economical and reliable moderate-
priced car built.

Let us tell you more about Maxwell cars. Their performance and the
company's inspection service. We will gladly wait upon you to tell you
more or to demonstrate the car. This service involves no obligation.

Our catalog and "How to Judge an Automobile" will aid you in making
your motor-car investment. Write for them today. A postal will do.
Just say, "Mail Books."
