THE DANGER AFTER GRIP

lies often in a run-down system. Weakness, nervousness, lack of appetite, energy and ambition, with disordered liver and kidneys often follow an attack of this wretched disease. The greatest need then is Electric Bitters, the glorious tonic, blood purifier and regulator of stomach, liver and kidneys. Thousands have proved that they wonderfully strengthen the nerves, build up the system and restore to health and good spirits after an attack of grip. If suffering, try them. Only 50 cents. Sold and perfect satisfaction guaranteed by the Holthouse Drug Co.

STOCKHOLDERS' MEETING.

Notice is hereby given that the annual meeting of the stockholders of the German Building Loan Fund & Savings association of Decatur, Indiana, will be held at the office of the secretary of said association in the City of Decatur, Indiana, on Monday, April 8, 1912, at 7 o'clock p. m., for the election of eleven directors of said association to serve for the ensuing year and for the transaction of such other business as may be properly brought before said meeting.

BULLETIN, -HOLLAND-ST. LOUIS SUGAR CO.

TO

PROSPECTIVE BEET GROWERS DECATUR PLANT

BETTER THAN WHEAT.

The old saying "As Good as Wheat" should be changed now to "Better Than Wheat," for sugar beets are better than wheat in the profit to farmers. In fact the returns from an acre of well-tended beets will purchase the product of three or four acres of wheat.

Much of the wheat now looks to be dead or badly injured by the severe winter. Why not put that ground into beets? It will not be necessary to plow it. Just harrow it two or three times and float it with a plank float and the ground will be in ideal condition for beets.

Get ready to put part of your beets in as soon as the ground is warm enough to sprout the seed quickly and then hold back three or four weeks before you put in the balance of your field. In that way you will not bring all the work together, but will give the laborers plenty of time to do the thinning.

In normal seasons you can plant beets from April 15th to June 15th, and we have known of many fields planted in July in Michigan that turned out good profitable crops. Some years the early planted beets are the best, while other years the late planted are best, so if you plant part of your beets early and part of them

if you have not made full arrangements for your labor, do so as soon as possible for the sugar company must have time to get the people located as soon as the beets are ready. F. H. HUBBARD.

ANOTHER MICHIGAN BEET GROWER HERE.

Mr. William Ceaser, of Middleton, Mich., is here with the object of renting a farm on which to raise beets. He is quite enthusiastic regarding beet raising and well he can be. He is showing a certificate of deposit for \$300, which is the net profit on 6% acres of beets after paying for the labor, rent of ground and seed. That beats the ordinary crops a mile.

E. M. Wagner, chief agriculturist for the sugar company, arrived home Friday afternoon, accompanied by fifty-two foreigners, who will do the hand work for a number of the farmers in this vicinity. They were a good looking lot of working people, many of the men being accompanied by their wives and children. There were thirty-eight workers in the crowd, and they created quite a little excitement as they came down to report at Mr. Hubbard's office. They were given temporary residence in the houses at the plant until they move onto the farms.

AT THE CHURCHES

GERMAN REFORMED CHURCH.

9:30, Sunday school; lesson I Cor. 15:1-11.

HORSE TALK.

If you have a horse in which you think there is speed and wish that speed developed, or if you have one and are in doubt as to the speed possibilities and wish to find out just what speed there is in it, I am the man you should see. I am an expert in this line. I say expert, because I have been skilled by experience. And what is an expert, but the finished product of experience? Of course there are some men who don't learn anything from experience, but these men are exceptions. There might be some, some for a man who sells to learn from experience, but when

See the new Maxwell Mascotte—the Great American Family Car

The Maxwell Mascotte is a big, stylish, well-built car for the family man. It meets a long-standing demand for a real family car at less than \$1000.

In its design are embodied the same mechanical construction and materials—the same Maxwell qualities that won the Glidden Tour. This means a dependable car, efficient at all times.

Maxwell reliability and durability are endorsed by 49,000 Maxwell owners. The New York State records also prove these qualities—91 per cent of Maxwell cars registered in 1905 being again registered in

1911, showing seven years' continuous usage.

The Mascotte is just the car required by the family man—and at a reasonable figure. It is unequaled by any other car selling within \$200 of its price.

This price is the result of great purchasing power, unequal manufacturing facilities and genuine production of the United States Motor Company.

Maxwell Mascotte \$980

This year's Glidden Tour furnished the hardest test of automobile efficiency on record. Maxwell was the only team to finish the gruelling contest with a perfect score.

Four Maxwells finished the 1454-mile contest without a penalty, winning all trophies. In competition with practically every other American motor car, regardless of price, Maxwell team was the only one to show 100 per cent efficiency all the way. Through heavy mud and sand, swollen streams, storm-

flooded Appalachian Mountain roads—Maxwell proved its reliability under all conditions.

This is the car for you—the family man, the real backbone of the nation—and we want you and your family to come and ride in it. See for yourself its handsome appearance—its high-grade character. If you cannot call today, make an appointment. In the meantime, write for "The Story of the Glidden Tour," "How to Judge an Auto," and the advance 1912 catalog.
