GETTING GRAY?—USE SAGE TEA TO RESTORE NATURAL COLOR OF HAIR.

Says Sage and Sulphur Darkens Hair Beautifully and Ends Dandruff.

Hair that loses its color and luster, or when it fades, turns gray, dull and lifeless is caused by a lack of sulphur in the hair, says a well known local pharmacist. Our grandmother made up a mixture of Sage Tea and Sulphur to keep her locks dark and beautiful and even today this simple preparation has no equal. Millions of women and men, too, who value that even color, that beautiful dark shade of hair which is so attractive, use only sage

tea and sulphur.

Nowadays we are not bothered with the task of gathering the sage leaves and the mussy mixing at home. Simply ask any drug store for a 50 cent bottle of the ready-to-use preparation, called "Wyeth's Sage and Sulphur Hair Remedy." Customers like this best because it darkens so naturally; so evenly, that nobody can possibly tell it has been applied. Besides, it contains ingredients which take off dandruff, stop scalp itching and falling hair. No, it isn't a dye or even like it. You just dampen a sponge or soft brush with "Wyeth's Sage and Sulphur" and draw it through your hair, taking one small strand at a time. By morning the gray hair disappears; after

another application or two it is restored to its natural color.

What delights the ladies with Wyeth's Sage and Sulphur is that besides beautifully darkening the hair they say it brings back the gloss and lustre and gives it an appearance of abundance. Holt house Drug Co. m-w-f
