## IF BACK HURTS BEGIN ON SALTS

Flush the Kidneys at once when Back-  
ache or Bladder bothers—Meat  
forms uric acid.

No man or woman who eats meat regularly can make a mistake by flushing the kidneys occasionally, says a well-known authority. Meat forms uric acid which clogs the kidney pores so they sluggishly filter or strain only part of the waste and poisons from the blood, then you get sick. Nearly all rheumatism, headaches, liver trouble, nervousness, constipation, dizziness, sleeplessness, bladder disorders come from sluggish kidneys.

The moment you feel a dull ache in the kidneys or your back hurts, or if the urine is cloudy, offensive, full of sediment, irregular of passage or attended by a sensation of scalding, get about four ounces of Jad Salts from any reliable pharmacy and take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia and has been used for generations to flush clogged kidneys and stimulate them to activity, also to neutralize the acids in urine so it no longer causes irritation, thus ending bladder disorders.

Jad Salts is inexpensive and cannot injure; makes a delightful effervescent lithia-water drink which all regular meat eaters should take now and then to keep the kidneys clean and the blood pure, thereby avoiding serious kidney complications.

## FIRST DISPLAY OF 1915 AUTOS

MAKERS AGAIN SELECT ST. LOUIS FOR AMERICAN DEBUT OF NEW MODELS.

## SHOW VEILED PROPHET WEEK

Climatic Conditions Help Keep Great National Annual Event at St. Louis, Wishes of New York and Chicago Notwithstanding.

America's first display of 1915 models of automobiles will be at St. Louis Oct. 5 to 10, inclusive, Veiled Prophet Week. The New York and Chicago shows will trail along months later, as has been the case for several years.

This difference in time is perhaps mainly responsible for the nationwide interest that centers about the St. Louis autumn show. But the uniqueness of the setting likely also is a factor in the coast-to-coast and lakes-to-gulf interest, as probably is the centrality of St. Louis, where North, South, East and West meet, and which has been described as geographically the most central great city in the United States.

Forest Park Highlands, one of the city's largest and most popular summer gardens, where America's initial display of new models has been staged for several years, will be the scene of this, the eighth annual show. This, like its predecessors, will be under the auspices of the St. Louis Automobile Manufacturers and Dealers' Association.

## Why Always at St. Louis?

"Why do New York and Chicago allow St. Louis to get ahead of them year after year in this way?" is a question frequently heard. It may be answered easily and without humiliating either of those cities, according to the show manager, Capt. Robert E. Lee, who also is editor of an automobile publication. They are hindered, he explains, by conditions that they cannot control, but that rest with the Ruler of the Universe. These conditions are climatic. The open fall and winter in the South and Southwest indicate to the automobile manufacturers a chance for a multitude of early sales. And so they hurry the new shapes to St. Louis and thus give the Southerners and Southwesterners an opportunity to compare the latest patterns of many manufacturers before buying, not a model of the season that is passing, but one of the season that yet is to begin to pass.

## Whole Auto Industry Affected.

The St. Louis autumn show has practically changed the geography of the automobile industry. Largely as a result of it, the first consignments and shipments of 1915 models of all of the leading manufacturers are made to the South and Southwest. It also has meant the motorizing of this great section of the country and marvelous road improvement.

According to the advance announcements of the exhibitors, a large number of the cars shown will be of the enclosed-body style for fall, winter and early spring use. These will include the limousines, berlines, coupes, cabriolettes and town cars.

The accessories department of the show will contain all the latest motor accessories, automobile parts and smart automobile toggery. A full line of modish motorizing coats, chic motorizing hats and bonnets and bewitching veils will be displayed on manikins.

## Cycle-Cars a Feature.

The sensation of the show will be the display of the cycle-cars and voltmeters which are attracting the attention of automobilists and the public. Six different makes of these little cars, now represented in St. Louis, will be shown for the first time.

The Show Committee, in selecting the plan of decoration, has adhered strictly to the al fresco idea, as this is one of the distinctive features of the St. Louis Automobile Show and has been commended by manufacturers, dealers and visitors from every part of the United States, Canada and Europe. It is believed to show the cars off to better advantage than an indoor display. It affords a natural setting alike for the handsome pleasure motor vehicle or the rakish roadster. The ensemble is more pleasing and gives the prospective purchaser a more comprehensive picture of the car in actual use.

## The Decoration Scheme.

The motif in the decoration this year will be a "Park Driveway." The large rotunda at the entrance will be transformed into a conventional landscape garden, with a large conventional flower bed of blooming plants. The east wall will be built of fissured or water-worn rocks, topped with a mass of autumn foliage; tiny streams of water will trickle down over the rocks, forming a spring at the base, around which will be growing aquatic plants. The ceilings, beams and wood work of the pavilions and theater will be covered with a mass of oak foliage, through which myriads of electric lights will wink and blink like stars.

The exhibitors' ball will be given Thursday evening, Oct. 8, in the big dance pavilion of the Highlands. Admission will be by card.

### AN INVESTMENT THAT COMPOUNDS INTEREST.

When you invest your money in a Savings Account at the First National Bank every dollar for every day it is here earns you 3 per cent. Every six months that interest is automatically compounded—is added to your account and starts in to earn interest.

There are a few, if any, other forms of investment that will earn you compound interest automatically. Isn't that so?
