satisfaction.

ASK FOR 'EM EVERYWHERE

SPEECH OF ACCEPTANCE

(CONTINUED FROM PAGE TWO)
We believe, moreover—who that looks about him now with comprehending eye can fail to believe—that the day of Little Americanism, with its narrow horizons, when methods of "protection" and industrial nursing were the chief study of our provincial statesmen, are past and gone and that a day of enterprise has at last dawned for the United States whose field is the wide world.

We hope to see the stimulus of that day draw all America, the republics of both continents, on to a new life and energy and initiative in the great affairs of peace. We are Americans for Big America, and rejoice to look forward to the days in which America shall strive to stir the world without irritating it or drawing it on to new antagonisms, when the nations with which we deal shall at last come to see upon what deep foundations of humanity and justice our passion for peace rests, and when all mankind shall look upon our great people with a new sentiment of admiration, friendly rivalry and real affection, as upon a people, who, though keen to succeed, seeks always to be once generous and just and to whom humanity is dearer than profit or selfish power.

Upon this record and the faith of this purpose we go to the country.

EAST BUFFALO.

Mrs. Dona Thompson and Mrs. Charles Morris of Fort Wayne were Thursday visitors of Mr. and Mrs. John Coots, in Decatur.

We are here in the city with our feather renovating wagon. We clean

your feathers at your homes. Work guaranteed.

2036

A Line of Champions

In every type of contest—on road, track and hill—Paige cars have consistently demonstrated their "stamina," speed and reliability.

To be sure, there are specially built racing cars that can travel *faster* than the Paige, but there is no car on the American market that will travel *further* at sustained speed—and that is the real test of automobile efficiency.

We have never attempted to build a car that will go faster than 65 miles an hour. But we have *always* taken pains to build a car that will go twenty-four hours in the day—seven days in the week.

You see, we are old fashioned enough to believe that rugged strength—staying power—is the best thing that a manufacturer can put into his car. And, so do you.

Are you interested in proof—the kind of proof that is based on actual performance? Then, consider the recent mountain climbing record established by a Paige "Fairfield Six-46" at Mount Hood, Oregon on July tenth.

Starting with a large field of competitors, the "Fairfield" was the first car of the year to reach Government Camp where it was awarded the Pridemore Silver Trophy. This is a grueling climb in itself—the classic event of the north west.

Despite the dire warnings of everyone at the Camp, that same Paige then turned its nose toward the clouds and battered its way to an elevation of 9500 feet above the sea level,—more than a quarter of a mile beyond the timber line—*three miles farther* up Mount Hood than any motor car had ever climbed before.

There never was a more terrific battle in the annals of mountain climbing. At times, the "Fairfield" was completely sheathed in ice, and, when it finally came to a halt, that stout-hearted champion was resting on a *sixty percent grade*.

Impossible, you say. Then, please consult the official records as published in every newspaper on the coast. And a little bit later, perhaps, you may have an opportunity to actually witness this thrilling climb on the screen at your favorite moving picture theatre.

But, best of all, make it a point to see this New Series Paige "Fairfield" at the salesroom of the local dealer. One glance will convince you that it is a thoroughbred. A single demonstration will settle your particular automobile problem for all time.

For Paige owners are *satisfied* owners. They have "arrived."
