The Indiana legislature will close in about ten days. Well, that will be one worry off of the minds of the people, anyway.

Bob Tucker, Indiana correspondent for the Cincinnati Enquirer, predicts that every large city in the state will elect democratic officials at the city elections next November, as a rebuke to the republican legislature. Sure, and then at the next state election, the democrats will take over the rest of the jobs.

A peal of thunder, the twitter of birds and a patter of rain this morning were the first signs of spring. Don't think that this means that the winter is over and it's time to change to apparel of lighter weight, for the probabilities are that there will yet be more days when we will acknowledge that the ground hog knows his business, and knew it well.

It transpires that the clean-up made by Tom Lawson in the December bear raid—an amount so vast the Boston plunger said he couldn't for the life of him tell within a half million dollars how much it was—netted him about \$40,000, according to one of his brokers. At that, Tom Lawson's romancing on the amount of his winnings was not half so wild and weird as the fictions he invented concerning the great "leak" and the persons involved in it.—Fort Wayne Journal-Gazette.

Add to the mess already cooked up by the legislature under the direction of Governor Goodrich, the excise bill, which places a tax upon every corporation, big or little, varying from a few dollars to \$1,000 on a telephone company which has a gross income of \$100,000, and you will agree that much of the governor's talk about economy, as a candidate, was pure and unadulterated "bunk." The democrats left about five million dollars in the state treasury and the average business man of the state is wondering just why this extraordinary effort to raise money is necessary. The answer is that the money is needed for the operation of the highway commission and it would seem that the law makers ought either to do away with the commission or else charge every one proportionately. Why load all the extra expense on

the corporation? It scarcely seems fair that one concern should pay a tax of fifty or a hundred dollars, while his competitor, who has not incorporated, pays nothing.

NEW FACTORY FOR JIFFY-JELL.

The Model Food Plant of America.

Right in the midst of the famous Waukesha Springs, the makers of Jiffy-Jell have completed a white enameled kitchen, the model food plant of the country.

The entire building is devoted to Jiffy-Jell, the new grade gelatine dessert. Otis E. Glidden, the famous gelatine expert, directs every operation. This new dessert, with fruit flavors in vials, has captured the country in less than six months. Nearly 19 million packages have been offered free to housewives in the women's magazines. As a result of these tests, this Jiffy-Jell plant is overwhelmed with orders. And millions of homes have already adopted this fruit, quick dessert.

A large announcement appears elsewhere in this paper.

TO THE VOTERS OF DECATUR, IND.

GENTLEMEN:

At the beginning of the time before mentioned, we had a very poor fire department. A hand-drawn apparatus with volunteer men who had to go to the department and pull the hose to the fire, and if the distance was very great, they were exhausted when they arrived at the fire and could not do very much. At most fires they arrived after the fire had gained such headway that there was not much to do but try and save adjoining property. Although the property owners of the city were asking for better fire protection, it was impossible for the city to furnish it to them as the city was so far in debt that it had no credit, but it being our desire to give the people of this city the best service we devised a way where by co-operating with the business men we have been able to build a building and install one of the most up-to-date fire apparatus in use in this part of the state. These improvements with a proper amount of good fire hose cost over \$19,000.00, and with two paid firemen and the volunteer men we have done good service and as I believe by judging conditions and places where he have had fires, we have saved property which had a value far in excess of what it cost to have this fire department and we will still be able to furnish this service. In three more years we will have this all paid for.

C. S. PETERSON & COMPANY ANNOUNCE THE FIRST OFFERING OF OWNERSHIP AND PUBLICITY POOL STOCK OF

The Burro Grande Copper Company

The Initial Offering of Which Consists of 250,000 Shares at

15c PER SHARE

PROPERTY:

The Burro Grande Copper Co's property is located in Grant county, New Mexico, in the famous Burro Mountain district, and is on the same mineral ore bearing fault or contact as the great Burro Mountain Copper Co., which is owned and being developed by the Phelps-Dodge Company. The Phelps-Dodge Company is making over five million dollars on their property and is making at Tyrone, the model mining camp of the world.

The Burro Grande property has been reported on favorably by Mr. T. W. Carter, E. M. of Silver City, N. M. Mr. Carter is one of the foremost mining engineers of the entire southwest and is the man who developed and sold the Burro Mountain property to the Phelps-Dodge interests.

The Burro Grande property consists of three claims, having a total length along the mineral bearing ledge of a full 4,500 feet. There is a shaft 150 feet deep on the property that has entered good grades of miling copper, silver and gold ore. One shaft of 55 feet in depth has exposed a vein all in ore to the width of 14 feet. This entire vein has an excellent grade of ore and two feet on the hanging wall of the vein is shipping ore that runs from six to ten per cent copper. A selected sample from this two feet assays 25 per cent copper, 12.80 in silver and 3.90 in gold.

The Burro Grande Company proposes to enter upon the active development of this property immediately by placing a shaft of men at work mining and shipping the high grade copper ore and by sinking the deep shaft now on the property to a total depth of 300 feet and cross-cutting to the vein. For this purpose and for the further purpose of exploiting the company by publicity the primary offering of stock is made.

The next offering of Burro Grande Copper Co. stock will be made at

50 CENTS PER SHARE

Steps will be taken to list the stock on the New York and Boston Curb Markets as soon as the company is sufficiently financed to carry out its development work, and a market will be made and supported for the stock.

INSIDERS MAKE THE GREATEST PROFITS

Pooled stock of Green Monster sold for 20 cents per share. When the stock was released, the market was better than \$5.00 per share. Verde Combination sold for 35c. Now better than \$1.00. United Verde Consolidated sold for 10c; now around \$1.00. Every investor in pooled stock in the past year has been able to cash in for many times his original investment. Why not be an "Insider" yourself? Burro Grande Copper is your next best bet and maybe your last chance.

If Burro Grand Copper was located in Arizona, you would not have a chance to be an "Insider."

In the very same county in New Mexico in which "Burro Grande Copper" is located, are the following big mines: CHINO, BURRO MOUNTAIN COPPER, EMPIRE ZINC, HANOVER MINING, REPUBLIC MINING, CHINO DEL NORTE, and the last BIG SENSATION:

THE AUSTIN-AMAZON, which is just over the hill from the Burro Grande and on the north flank of the Burro Mountain vein. The day. Sixty days ago it was a prospect.

We believe that we have a better mine than the Austin-Amazon and Mr. Carter says: "Before the Austin-Amazon opened this body of ore, I would not have traded the center claim of the Burro Grande for the entire Austin-Amazon holdings."

Remember, Mr. Carter practically discovered this whole district and he knows what he is talking about.

Reservations for thousands of shares have already been made for this stock and we advise that you wire at our expense the number of shares that you want reserved and follow with a draft for the amount by first mail.
