

# DR. EVANS Says

Dr. Evans a noted Chicago physician, in an article in the Chicago Tribune, says, that 65% of the foot ailments in grown people were caused or contracted before the age of sixteen.

A shoe that is causing a bunion on a growing child's foot may not cause the child any pain because the bones of the child's feet are plastic, but the real pain comes when the bones are hardened in after years. Relieving foot troubles is a big business with us but we would rather fit the growing feet so that the next generation will HAVE NO FOOT TROUBLES.
