

# POLICY OF CAREFUL BUYING

Washington, Aug. 30.—The people in many parts of the United States are virtually in league with the profiteers, according to William Mather Lewis, director of the savings division of the treasury department, who has just returned to Washington after visiting the various federal reserve districts.

"A veritable orgy of extravagant buying is going on," he said. "The reaction from the careful use of money during war time is widespread and distributing. Retailers are securing goods from jobbers without arguing about prices, if they can only be assured of immediate delivery. They know their customers will scramble for the goods, regardless of cost. Thus, with an abnormal demand and a limited output, nothing else can be expected than high prices. It is natural, though deplorable, consequence that profiteers abound.

"The people must return to the policy of careful buying and regular saving if they wish to help the situation.

The treasury department in order to combat this artificial situation, is intensifying and speeding up its thrift campaign. Statements on the principles of finance and the laws of investment and budgetary are being brought to workers in factories; to farmers; to business and professional men, and members of women's organizations by means of printed publicity and the spoken word. A nationwide attack upon swindlers who are persuading people to dispose of their Liberty bonds and War Savings Stamps is also being inaugurated.

"Throughout New England, savings and thrift organizations already are exerting their combined efforts to combat increased cost of the necessities of life. Saving directors and hundreds of officers of savings societies are to king the lead in disseminating information as to fair prices.

"In their communities they are aiding the determination and publication of fair prices and in curbing unjust profits. They are following the

plan of campaign recently outlined by Governor W. P. C. Harding of the Federal Reserve Board, to promote regular and efficient work to increase production and insure reasonable economics to devote to necessities rather than extravagances or luxuries.

"Steps are being taken to insure similar efforts throughout the other federal reserve district."

# PURDUE DAY AT FAIR TO BE SEPTEMBER 4

Lafayette, Ind., Aug. 30.—Thousands of men and women who have attended Purdue university are expected to be present at a reunion to be held at the State Fair on Purdue day which an announcement from Prof. G. I. Christie has designated as Thursday, September 4.

In view of the fact that a large number of the faculty members will be present at the fair in connection with the Purdue exhibit which is to occupy the Purdue and Oliver buildings, this will offer an excellent opportunity for members of the institution and the men and women of the state to get together to renew acquaintances and go over many of the matters of common interest.

The association of Purdue students, of which Norris McKenry of Elizabethtown is president and J. A. McCarty of Fort Branch is secretary, will hold a reception between 10:00 A. M. and 1:00 P. M. at the Purdue building. Large numbers of Purdue students who have been in the military service and many of the faculty members will be present at this meeting. All men and women who have attended Purdue are urged to attend the State fair and take part in the exercises.

# THE FARMER'S OPPORTUNITY.

Description of the method of borrowing money on farms on the government plan through the First Joint Stock Land Bank of Fort Wayne, Ind.

The idea is to loan money on farms for longer periods than is the existing practice now, as authorized under the Federal Farm Loan Act, effective July, 1916.

This law makes it possible for the farmers to make money by borrowing money. It is the intention to place money within the reach of the farmer on such terms as to convert the farm mortgage into a source of profit.

The money may be loaned you to buy land for agricultural purposes, to purchase equipment, such as teams, machinery, live stock, to provide beneficial improvements, structure, tiling, drainage, fencing, buildings, etc.

The money is loaned on the "amortization plan" which means the paying off of the indebtedness by installments of a fixed amount, throughout a period of years.

As an example—On a loan of \$1,000 payment would be \$70 a year, which payment applies upon interest and principal, paying off loan in 33 years.

Upon a Ten Thousand Dollar loan, the payment each year would be \$700. Borrower may pay off part or all of loan after five years.

Loans made up to one-half of the value of the land and 20 per cent of the insurable value of the improvement.

NO COMMISSION—LOANS MADE TO BORROWER AT COST.

No restrictions are placed on the use of the money you borrow and your affairs are not subject to the scrutiny of others.

You are not worried about a renewal, not the trouble and expense of one. You have no uncertainty about interest rates. You have liberal prepayment privileges after five years. You do not tie up yourself or your land.

Every payment you make reduces your principle as well as the interest, so that at the expiration of the loan the entire debt has been discharged.

Such an opportunity as this should give courage to an enterprising farmer to buy more land, to improve his farm and live stock and have the use and profits therefrom.
