Entered at the postoffice in Decatur, Indiana, as second-class matter.

Senators Watson and New voted against every proposition suggested by President Wilson. Let that soak in and let them make it an issue next year as they evidently propose. We are willing that the people decide which is right.

A better city plant cannot hurt the town and on the other hand it cannot help but benefit. Better have too much power than not enough and right now is the time to make the change if we are ever going to do it. The improvement can be worked out so that it will not prove a burden to any one and as a business investment cannot be beaten.

With the big new plant of the General Electric company assured Decatur many important problems will arise. We must and will meet them. Among these will be the housing

question, just now a serious one, but even this can be met if we try hard enough and we know our people are going to do it. The sooner you catch the spirit of this new and better Decatur, not a boom, but a steady, healthy, solid growth and improvement, the better it will be for you and the town.

The dedication of the new athletic hall last evening was far more important than most people imagine. It was the declaration that this community has advanced and is keeping up with the times. Too much credit cannot be given Mr. Worthman who has worked so consistently and who had a right to smile last night and he did. No finer spirit can be found anywhere than that existing here now. Keep it going. Back the home team, not only the basket ball and foot ball teams but every team in Decatur, every worthy project, every good business and every proposition behind which is a motive that will help this city and county. One of the best ways to do this is to make the children like to study and learn and think and athletics sure helps. The school band and the glee clubs made their first appearance last evening and won a place in the hearts of every one.
