If you want something worth your money and something to keep warm under you are the one to buy this comfort. Mecca Theater TONIGHT "THE SPITE BRIDE"

Another big Select production extraordinary featuring the delightful little screen actress,

Olive Thomas.

The little star of "Up Stairs and Down." Here is one as equally as good. Miss Thomas is at her best in this picture and you will see romance—what we all crave and most of us have only in small doses. This picture is chock-full of romance—the stage, kidnapping a sweetheart, a shipwreck, adrift in a small boat, bazaars, the love of a young man for a beautiful girl—and a touch of mystery. Don't miss it.

Carrying a Ton a Mile for less than a Cent

Freight rates have played a very small part in the rising cost of living.

Other causes—the waste of war, under-production, credit inflation—have added dollars to the cost of the necessities of life, while freight charges have added only cents.

The average charge for hauling a ton of freight a mile is less than a cent.

A suit of clothing that sold for \$30 before the war was carried 2,265 miles by rail from Chicago to Los Angeles for 16½ cents.

Now the freight charge is 22 cents and the suit sells for \$50.

The cost of the suit has increased 20 dollars.

The freight on it has increased only 5½ cents.

Other transportation charges enter into the cost of the finished article—carrying the wool to the mills and the cloth to the tailors—but these other charges amount to but a few cents more.

The \$10 pair of shoes that used to sell for \$5 goes from the New England factory to the Florida dealer for a freight charge of 5½ cents—only one cent more than the pre-war rate.

Beef pays only two-thirds of a cent a pound freight from Chicago to New York.

American freight rates are the lowest in the world.

ROCK
ISLAND
N. 3.
SULKY

WITH THIS PLOW YOU CAN BACK FURROW SUCCESSFULLY

Back furrow, turn a square corner and keep the plow in the ground, this is the feature desired for years by farmers in this locality and now realized only in the Rock Island No. 3.

Both the rear wheel and front furrow wheel caster.

The rear wheel of this sulky is unlocked automatically by the team turning in either direction. It can follow the plow; it is closer up to the bottom, so when you turn to the left you don't force the bottom away from the bank—the wheel never leaves the furrow, doesn't jump out, nor is it forced out in turning a corner. The strain on the rear wheel, axle and bracket is relieved, thus insuring longer life to the plow.

TURNS A SQUARE CORNER
The pivot of the vertical clevis on the front end of the beam permits the team to be turned in either direction, or to turn a square corner without "slewing" the ground.

The rear wheel, being located very close to the rear of the plow bottom, will caster automatically, and is brought back to place by a spring trip, which relieves the plow of lense-side pressure as soon as the turn is completed.

Another reason which allows you to turn a square corner is because you can caster the front furrow wheel at any angle desired.
