

Fit as though made to your measure
We claim that feet fit is more essential than good wear. Because the longer ill-fitting shoe wears, the worse it is for you, ruins your feet, people call us cranks on fitting shoes but if you could see the shapen feet, the result of ill-fitting shoes, you would not blame us for wanting to fit people properly. Maybe you've trouble being fitted, try this store next time you need shoes.

ABOUT YOU

If you see three fellows their heads together they're trying to get a few dollars. "I don't use myself, but I usually carry a few my friends," said Lyle Bud. as he gave Tell Binkley a match. Martin, in Indianapolis News.

J. H. Stewart was a buskissitor in Huntington this afternoon this office.

William Klepper and son, of Decatur, spent Monday afternoon and evening in Bluffton, N.C.

Mr. and Mrs. Tanvas are located in their home on R Street. Miss Daisy Reynolds of Ft. Wayne to call on Mrs. Godie at the hospital. She is getting very nicely.

Mrs. Ferdinand Blecke, daughter, Hattie, and Anna, arrived the day in Fort Wayne today. Miss Regina Murtough of Ill.

HEAL SKIN DISEASE

Apply Zemo, Clean, Peeling, Antiseptic Lotion.

It is unnecessary for you with eczema, blotches, ringworms and similar skin troubles, obtained at any drug store for \$1.00 for extra large bottle, and apply usually give instant relief from itching torture. It cleans the skin and heals quickly effectively most skin diseases.

Zemo is a wonderful, penetrating liquid and is sooth the most delicate skin. It is not easily applied and costs little today and save all further skin trouble. The E. W. Ross Co., Cleveland.

at her home and unable to be at her work at the Graham & Walters office; Mrs. C. C. Wilder and Blanch Mumma spent the day with Mrs. Frey in Fort Wayne.

Miss Martha Koldewey is visiting with Mrs. Fred Grote in Fort Wayne. Mahel Deholt of Monmouth was business visitor in the city this morning.

Mr. and Mrs. John Purry and Mrs. Roy Bell of Wren, Ohio, attended the funeral of John Robinson yesterday. Mrs. Lawrence Meyers and Mrs. Henry Meyers spent the day at the Gundersen home east of the city.

C. C. Humphrey made a business trip to Fort Wayne today. Herman Conter is confined to his home on North Second street on account of a severe cold.

The Research club met at the home of Mrs. Eugene Runyon Monday afternoon with Mrs. C. C. Humphrey, leader. Her topic was excellent, an entitled "Life Saving Service" in the different forms. The afternoon meeting was a very profitable meeting. Next week's meeting will be with Mrs. P. B. Thomas and Mrs. Thomas will have charge of the program. Her topic will be "Old Time Songs."

CARD OF THANKS

I wish in this manner to thank the kind neighbors and friends for the sympathy and flowers at the time of the death of my husband. I also desire to thank the K. of P. lodge for their kindness and Rev. Tinkham for his words of consolation.

MRS. JOHN ROBINSON.

CATTLE CENSUS

Slight Increase in Number of Milch Cows and Mules During Last Year

OTHERS DECREASE

Fewer Calves, Sheep and Hogs says Government Annual Reports

A slight increase in the number of milch cows and mules and a moderate decrease in the number of other cattle (calves, steers, bulls and cows not for milk), horses, sheep and swine are the outstanding features of a survey of live stock on farms and ranges of the United States on January 1, as compared with a year ago, made by the Bureau of Crop Estimates, United States Department of Agriculture. Milch cows have increased about 372,000 head, or 1.2 per cent; mules increased 41,000 head, or 0.8 per cent; "other" cattle (as described above) decreased 790,000 head, or 1.6 per cent; horses decreased 373,000 head, or 1.7 per cent; sheep decreased 351,000 head, or 0.5 per cent; and swine decreased 1,675,000 head, or 1.2 per cent.

The total value of all farm animals on January 1 was about \$8,561,000,000, which is a shrinkage of \$266,000,000, or 3 per cent, compared with a year ago. It is an interesting observation in numbers also increased in value per head; whereas all other classes of animals decreased in value per head, as well as in total numbers.

Makes Money with Canning Outfit. Two boilers fitted with trays, two tubs, two wire baskets, two paring knives, a small dipper, a measuring cup, a kettle, and a can sealer comprised the equipment that a young Washington school-teacher used to an enough peaches to clear \$600 in two weeks last fall.

One of the things which the home demonstration agents, sent out by the United States Department of Agriculture and the state colleges, teach is the use of inexpensive equipment where it is impossible or inadvisable to buy expensive utensils. In the Yakima Valley, Washington, there is a high percentage of waste peaches in the orchards that supply the commercial canneries. It is impossible for them to use tree-ripened Alberta and Slappa peaches because they will not stand up well under the high pressure used in processing. A young school-teacher, living in the vicinity of these orchards, and her aunt decided, with the advice of the home demonstration agent of that county, to utilize these tree-ripened peaches. With a stove made of bricks and the above equipment they were able in two weeks to make a profit of \$600. They found little sugar was necessary with the tree-ripened peaches. They also made 600 quarts of peach and grape conserve and 215 quarts of grape and apple jelly. Special recipes were worked out for the pear butter.

Fumigation Charge Reduced. The fumigation of railway cars entering the United States from Mexico can be done at less cost than was originally thought and the United States Department of Agriculture, through the Federal Horticultural Board, has ordered a reduction of the fee from \$5 to \$4 a car. The fumigation, for the purpose of preventing the entry of the pink boll worm of cotton, is performed at the various border points of entry in houses especially constructed for the purpose. Fumigation was taken over by Federal agents October 1 last year. The effort was to make a charge for the service that would just cover the cost of chemicals and labor involved. Three months' experience has proved that the charge of \$5 more than does this and the new ruling, effective on February 1, gave to the shippers the benefit of the savings. Unused fumigation coupons previously bought at \$5 will be redeemed at face value.

Opportunity in Sheep Raising. Results of a farm sheep experiment reported by the United States Department of Agriculture show clearly the possibilities of a profitable sheep-raising business upon eastern lands. At the government farm, Beltsville, Md., a study is being made of specialized intensive sheep raising with complete reliance upon forage crops for summer pasturage. In 1916 a 30-acre area did not produce forage enough to feed satisfactorily 44 Southdown ewes and 33 lambs. This field is now capable of furnishing sufficient summer feed for 100 ewes with their lambs. The improvement is due in part to the application of manures, lime, and phosphates, but chiefly to the fact that leguminous crops were largely used and all crops were fed upon the ground, the unused residues being plowed in. Under the system followed forage crops are seeded in rotation and the sheep are allowed such frequent changes of pasture as are necessary to prevent troubles from

SCORES OF PEOPLE HAVE FOUND TRUTONA UNFAILING AS PREVENTIVE OF "FLU"

"This Medicine Saved Me From Having Influenza," Mrs. Sears Declares—Many Similar Statements Furnish Unquestionable Proof

Since reaching the definite conclusion that as yet no cure for influenza has been found, health authorities are practically unanimous in their opinion that PREVENTION is the one best means for stamping out the dreaded disease.

As to the best means of insuring effective prevention the answer is to be found in Surgeon Blue's recent statement in which he says, "It is important that the body be kept strong, and able to fight off disease germs." Public statements from scores of people have proven that there is no better agency for providing body strength and vitality to withstand attacks of disease than Trutona. Many will remember the remarkable work done by Trutona last year when, in innumerable cases, serious after-effects of influenza were quickly overcome by the perfect tonic. In only a slightly lesser measure has Trutona been declared to have prevented attacks of the malady.

One of the Many Cases

parasites. **Oregon Fights Rodents.**

Typical of the work of the Biological Survey in western states is that which has been carried on in Oregon during the past year. A total of over 20,000 pounds of poisoned grain was spread on 150,000 acres of government land by Biological Survey experts or by farmers and stockmen working under the direction of field assistants. In addition, 100 ounces of strychnine and 2,000 pounds of poisoned grain were furnished the county agent in Walla Walla county. This was used in fighting squirrels as they began to gather from the public lands to the cultivated lands and was sent as temporary relief until the government could undertake a more systematic campaign in that county. Seventeen counties joined in the cooperative campaign against ground squirrels led by Biological

Mrs. Josephine Sears, 2803 Portland avenue, Louisville, after gratefully describing the many remarkable benefits she gained from Trutona, says: "I really believe this medicine saved me from having influenza."

There are scores of other similar statements, too numerous to mention, and they prove conclusively that Trutona is truly a remarkable agency for the prevention of influenza as well as an unequalled reconstructive tonic for overcoming bad after-effects of the disease. Trutona's healthful action reaches every portion of the body. Performing its work faithfully and efficiently, Trutona rebuilds diseased nerves and tissues, creates a healthy appetite and assists in digestion and assimilation of food, the results of which are invariably to be seen in the rosy cheeks and sparkling eyes of those who have taken the perfect tonic.

Don't take a chance—take Trutona! Trutona is sold in Decatur at Smith, Yager & Falk's.

Survey men. Over 7,500 farmers took part in the work and treated 697,000 acres of their own lands, using 85,480 pounds of poisoned grain prepared under direction of the Biological Survey representatives and county agents.

Before the war, 100,000 people in Greater Berlin registered as having no religion. Now there are 1,000,000. It is the moral slump of Germany that worries its government more than anything else.

Kentucky tobacco lands have increased from \$150 an acre to \$2,000. The state's crop of the "weed" last year was valued at \$100,000,000.

NEGLECTING THAT COLD OR COUGH?

Why, when Dr. King's New Discovery so promptly checks it

IT'S natural you don't want to be careless and let that old cold or cough drag on or that new attack develop seriously. Not when you can get such a proved successful remedy as Dr. King's New Discovery.

Cold, cough, gripper, croup does not resist this standard reliever very long. Its quality is as high today as it always has been—and it's been growing steadily in popularity for more than fifty years. Only \$1.20 a bottle at all druggists. Give it a trial.

Constipated? Here's Relief

Not that often harmful, always violent and temporary help that comes from harsh purgatives, but the comfortable, gratifying, corrective regulation of stubborn bowels so pronounced in Dr. King's New Life Pills.

Tonic in action, they promote free bile flow, stir up the liver, thereby but gently cleanse the system of waste matter and fermenting foods, and give you keen zest for hard work and beautiful recreation. All druggists—25c.

William Hollenzollern has written a letter to Prince Furstenberg in which he complains that the former crown prince borrows money from him, that the German people have mistreated him, that it is a "dirty practice" to publish his correspondence, and that the few kings who hold their thrones have lost "the monarchical feeling of solidarity" and hope to secure their own throne by leaving him to his fate. Japan is in great fear of Bolshevism breaking out and destroying the monarchy. The cost of living is up 200 per cent.

Succeed with a "Successful"

The incubator with many advantages.

We invite strict comparison.

A few points of merit in the Successful incubator:

1. Hot water heated, has a larger water capacity than any other incubator.
2. 12 ounce copper tank with round corners.
3. Safety attachment on lamp burner preventing smoking.
4. Case made of non-warpable California Redwood.
5. Two glass doors instead of one.
6. Has a larger and better regulating device than any make of incubator.
7. Every Successful is positively guaranteed to give satisfaction and lasting service.

Come in and get our free booklet "Success with the Successful," it has many useful tips for the poultry raiser.

HENRY KNAPP and SON

DECATUR, INDIANA

A Message to Mothers About Our Boys Spring Clothes.

Most mothers are having a hard time keeping up with their young sons these days. The boys are into everything; one day it's a wireless outfit; the next, a new kind of flying machine.

And if it's a matter of clothes, son is probably asking for a new suit the kind we're selling this spring. They are the very latest and just what the boy wants, the kind that are built for hard wear and have just as live styles as the older brothers; quality that mothers will appreciate. In all sizes from four years up to eighteen.

Come in and make your selection while the spring stock is complete.

HOLTHOUSE, SCHULTE & CO.

GOOD CLOTHES SELLERS FOR MEN AND BOYS

Mr. Auto Owner--

Summer months will soon be here and you will want your car equipped with the best possible tires. Vacuum cup tires have a reputation of their own, and are one of the high class tires on the market today.

Special Offer Until April 1st.

With every Vacuum cup casing we will give free one Pennsylvania inner tube. Remember the factory is making this campaign on Pennsylvania tires and the time is limited until April 1st.

Get Yours Today.
