where the weather suits him. He has just returned from a delightful trip to Jacksonville during which he had many interesting experiences with mud, sand and southern hotels. One strip of deep sand for 70 miles, from Waycross to Jacksonville, termed "The Oasis" was reported to be the terror of the south. Mr. Merz was warned not to attempt to negotiate it. While he admits it was tough going and that he does not care to attempt it again, his Good-year tires gave such traction that he came through with flying colors. He met three automobiles that were in difficulty and says the driver looked at him in amazement for his apparent hardihood.

## The After Effects of Pneumonia

This is No. 2 of a series of advertisements, prepared by a competent physician, explaining how certain diseases which attack the air passages—such as Pneumonia, Influenza, Whooping Cough, Measles or even a long continued Cold—often leave these organs in an inflamed, congested state, thus affording a favorable foothold for invading germs. And how Vick's Vapo-Rub may be of value in this condition.

Pneumonia attacks the air cells of the lungs. An inflammation is set up and matter is thrown off which causes the air cells to solidify, thus preventing the natural flow of blood thru the lungs. This "backing up" of the blood causes the heart to pump harder, just as stepping on a hose increases the water pressure, which is the reason why, during this disease, the physician watches the overburdened heart so carefully.

After recovery the lungs are filled with a mass of wreckage—the debris of the battle—which must be gotten rid of by a process known as resolution. Frequently, inflamed spots remain, congestion persists, cough hangs on, and the least exposure brings on a cold that is hard to get rid of. If neglected, such damaged air passages may easily develop serious disease of the lungs.

Such cases should always continue under a physician's care and frequent examinations should be made to see that nature is

properly continuing the rebuilding process.

Nightly applications of Vick's Vapo-Rub will aid nature in this work. Because Vick's acts locally by stimulation thru the skin to draw out the inflammation, attract the blood away from the congested spots and relieve the cough. In addition, the medicinal ingredients of Vick's are vaporized by the body heat. These vapors are breathed in all night long, thus bringing the medication to bear directly upon the inflamed areas.

Vicks should be rubbed in over the throat and chest until the skin is red—then spread on thickly and covered with hot flannel cloths. Leave the clothing loose around the neck and the bed clothes arranged in the form of a funnel so the vapors arising may be freely inhaled. If the cough is annoying, swallow a small bit of Vick's the size of a pea.

Samples to new users will be sent free on request to the Vick Chemical Company, 232 Broad Street, Greensboro, N. C.

## BOLSHEVISTS BLAMED FOR PROPAGANDA

Bolshevists are blamed for the hysteria-breeding propaganda which has been sweeping through parts of Africa and from which the native population is only now recovering.

An account of the circumstance has just been received by Northern Baptists at their headquarters in this city, from Dr. W. H. Leslie, Baptist Missionary of Vanga.

"A report came that a new fetish-spirit animal was abroad in the land, coming from the west," writes Dr. Leslie. "It was said to have the face of a white man, the forelegs and breast of a cat, and the cry of a bird. It brought sure death to the towns it visited."

"White was a special attraction to it, so word was sent throughout the whole country to get rid of everything white. Beads, bracelets and guns were also attractions and must be disposed of. This sounded quite Bolshevik. Yet strangely enough it was accepted as truth almost everywhere and people slaughtered or sold goats, ducks, chickens, dogs; in fact all animals or fowls that had any white on them. Some even came from the inland towns to throw their guns into the Kulu river. The people in the villages nearest us inquired about the spirit-animal, were reassured and saved their livestock. When some villages refused to credit the rumor, the mania was stayed and the country is becoming rational once more."

The readiness with which the native Africans give their ear to all manner of superstition has been of the most difficult obstacles in the path of the mission worker, according to Dr. Leslie. In the New World Movement program, for which Northern Baptists will raise \$100,000,000 on April 25 to May 2, provision has been made for a campaign of education which will eventually bring enlightenment to every corner of the Dark Continent.
