MARGUERITE CLARK

"GIRLS"

Another of the famous Paramount pictures.

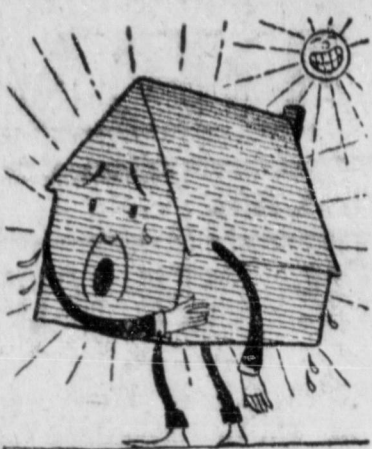

By the sacred hatpin they swore it—to see no man, to hear no man, to kiss no man. And they meant every word! Until one night a mere man—But it wouldn't be fair to tell! You'll have to see Marguerite Clark in this rollicking picturization of Clyde Fitch's famous play. Lips that grew whiskers should never touch theirs! Then one night a poor innocent man dived right through into their apartment and faced them—three raging furies in their nighties!

## This House is Sunburnt

Buildings suffer from sunburn as much as people do, when they're not protected from Old Sol's grilling rays.

Few could afford enough cold-cream to soothe a blistered barn, but we all can afford a coat or two of paint to keep the barn from blistering.

Good paint gives the sun's rays no chance to warp and crack the wood, so that rain may drive in and start decay.

The school term ended at the Steele school, one mile east of Decatur, yesterday with a regular, old-fashioned "last day of school" dinner and good time. The dinner was planned by the school patrons as a surprise for the teacher, Miss Ruth Gilbert. In appreciation of the successful term just brought to a close. At 11:30 o'clock the patrons, who had met at one of the homes near the school, walked in, completely surprising Miss Gilbert and, taking possession of the school room. At 12 o'clock one of those picnic dinners for which "the Little Brick School Houses" have long been noted, was enjoyed by a large crowd of pupils, friends and patrons. In the afternoon the pupils rendered a most pleasing program consisting of songs,

readings, dialogues and an interesting little playlet. Eleven rolls of honor and a number of reading circle certificates were given to pupils who had earned them. Talks by the patrons revealed their appreciation of Miss Gilbert's work in the school and their desire to have her returned to Steele school for another year.

## Doing the BIG things FIRST

HERE is the first tire that ever was given a whole factory to itself!

Firestone Plant No. 2, with a capacity of 16,000 tires per day, is devoted solely to the production of the 3½ inch size.

It was a problem made to order for Firestone—big volume production of a high grade article.

Firestone met it with a typical Firestone answer—a separate \$7,000,000 factory.

Buy Firestones.

Most miles per dollar is a Firestone pledge, to the big car owner as well as to the owners of light cars. See the new Standard Oversize Firestone Cord.
