

**The double-service tooth paste, keeps teeth clean AND GUMS HEALTHY.**

Keeping the gums healthy and the mouth sweet is very important to health; more teeth are lost through the loosening of the tissue that holds the teeth in place than from decay.

Dental science to-day demands that a tooth paste must keep the gums healthy as well as clean the teeth.

Senreco was formulated to meet this requirement. Hundreds of dentists are prescribing and using Senreco because they have found that it does measure up to that standard.

**SENRECO IS A WONDERFUL CLEANSER.**

In addition to its remedial properties Senreco is a wonderful cleanser; acts directly on the mucin film, the basis of tartar; leaves the mouth cool and clean-feeling. As some one has expressed it—Senreco gives one a new idea on mouth cleanliness.

Get a tube to-day at your druggists or toilet counter—enjoy the healthy, cleanly feeling its use gives your mouth and gums. Notice how brilliantly white Senreco makes your teeth. It performs this two-fold service for you and yet costs no more than the ordinary, old-fashioned tooth paste that simply cleans the teeth and leaves a pleasant taste.

## The Warren M. Sargent Studio

Invites you to call and see their display of Hand Painted Photographs of scenes made from different places of interest throughout the U. S. by Mr. Sargent. High class work is guaranteed in Portraiture.

## Luxury versus Necessity

Webster says that a luxury is anything which pleases the senses and is also costly and difficult to obtain.

He describes a necessity as something indispensable. How many of us have ever tried to list in these two categories the things for which we spend money? It should be out of the expenditures in the luxury column that we should build our "provident fund"—often called a savings account. Certain luxuries should be sacrificed each week so that the sum provided against sickness, loss of work and other emergencies, may be steadily built up to withstand unexpected calls upon it.

We Pay Interest at 4% on Savings Accounts.

This "church-of-the-friendly-hand" will gladly welcome you to any or all of its services.

A. H. SAUNDERS, Minister.

### AUTO TESTING PLANT

Lafayette, Nov. 13.—In the automobile testing plant Purdue university has a unique and interesting piece of apparatus which is attracting considerable attention among manufacturers and car owners. It is so arranged that any automobile can be driven on to the plant where the rear wheels run on wooden pulleys instead of on the ground. Those pulleys are connected with a brake which controls the lead and absorbs the power.

The pull of the machine is measured by a spring dynamometer and with suitable instruments to measure the speed, the power delivered by the back wheels of the car can be accurately determined. That the engine may not overheat the radiator is cooled by a blast of air from a large pressure blower. While intended primarily for instruction the plant has been used for testing a number of commercial cars and investigating various elements in their design. Much valuable information has been obtained in this plant.

General Pershing will be a member of the death of Napoleon, May 5, 1921. Marshals Foch and Haig and General Diaz, of Italy, are the other members of the committee.

### After Chinch Bug

(Continued from page two)

shelterless, the bugs die quickly from exposure to the elements.

The chinch bug is one of the most destructive of all our insect pests. It has greatly increased in number in the last two years, and during 1920, caused severe damage. Weather conditions so far have been extremely favorable to the pest. Unless Indiana experiences severe winter weather, and farmers use precaution in eradicating them, this state may expect serious trouble from chinch bugs next season.

Up until the last two years Indiana was comparatively free of the chinch bug, largely due to continuous war waged against it. In Illinois the insects destroy millions of dollars worth of crops annually.

The insects are about one-fifth of an inch long and black with white markings on the wings. They leave their winter quarters early in the spring, first entering the wheat fields and from there migrate to the corn. Chinch bugs will literally kill a corn crop in a few days if steps are not taken to stop their destructive advance.

### HUNTING NOT ALLOWED

Hunting is positively prohibited on any of the Finner Stock farms. Hunters will please take notice.

269-6t W. P. SCHROCK, Mgr
