

**Senreco**  
The  
double-service  
tooth paste,  
keeps teeth clean AND GUMS HEALTHY.

Keeping the gums healthy and the mouth sweet is very important to health; more teeth are lost through the loosening of the tissue that holds the teeth in place than from decay.

Dental science to-day demands that a tooth paste must keep the gums healthy as well as clean the teeth.

Senreco was formulated to meet this requirement. Hundreds of dentists are prescribing and using Senreco because they have found that it does measure up to that standard.

**SENRECO IS A WONDERFUL CLEANSER.**

In addition to its remedial properties Senreco is a wonderful cleanser; acts directly on the mucin film, the basis of tartar; leaves the mouth cool and clean-feeling. As some one has expressed it—Senreco gives one a new idea on mouth cleanliness.

Get a tube to-day at your druggists or toilet counter—enjoy the healthy, cleanly feeling its use gives your mouth and gums. Notice how brilliantly white Senreco makes your teeth. It performs this two-fold service for you and yet costs no more than the ordinary, old-fashioned tooth paste that simply cleans the teeth and leaves a pleasant taste—

**Harry F. Vice Says It Re-  
lieved Him of Six Years  
of Stomach Trouble**

"After years of suffering I'm now feeling as well as I ever did in my life, and I can't find words good enough for Tania," Harry F. Vice, proprietor of Vice's restaurant, 112 S. Illinois street, Indianapolis, Ind. "I suffered from stomach trouble for six years and seemed to have cramps and pains all the time which often became so severe I could hardly stand up. My appetite was so poor I just hated to go to the table, and at times I became so nauseated I could scarcely retain a thing on my stomach. I was so nervous that a night's sleep was out of the question. I was continually paying out money for all kinds of medicines, and even bought a farm so I could live in the country, thinking that this might improve my health, but it all failed to do me any good.

"Some of my friends advised me to try Tania, so I began taking it, and I could feel a big change in my condition right away. Well, I kept on taking the medicine until I have finished by fourth bottle and am feeling simply fine. In fact, I never felt better in my life. I have an excellent appetite, eat anything and everything I want without my stomach troubling me a bit and without a pain of any kind. I don't know what it is to suffer any more and am at my place of business every day in splendid health. My friends notice the big change in me, and I tell all that it was Tania that made such a sound, healthy man out of me."

Tania is sold in Decatur at Smith, Fager & Falk's; in Berne at Stengel & Craig's; in Geneva at F. C. Deitsch's and in Monroe at O. O. Hocker's.

**FIREMEN TO MEET**

Decatur volunteer firemen are requested to meet this evening at the city building at 7:30 o'clock. Firemen are all asked to attend this meeting.

**JUST GOT OVER A COLD?**

Look out for kidney troubles and backache. Colds overtax the kidneys and often leave them weak. For weak kidneys—well, read what a Decatur woman says:

Mrs. Frank Bogner, 1104 W. Monroe St., says: "I can say that Doan's Kidney Pills is a most excellent remedy because I have used them. Whenever I have caught cold my kidneys would become disordered. My back would get sore and stiff and sharp twinges would go through me when I would get up from a chair. I suffered a great deal before I used Doan's Kidney Pills. They soon put a stop to the trouble. It has now been some time since I have needed a kidney remedy." (Statement given Nov. 7, 1915.)

On Oct. 23, 1920, Mrs. Bogner said: "I have had very little trouble with my kidneys of late. Occasionally I use Doan's for slight attacks and they always give prompt relief."

**A DIME WILL DO IT**

**If Every Man, Woman and  
Child in the State Would  
Contribute That Sum**

**FOR CHRISTMAS SEALS**

**Wonderful Results Would  
be Shown, Says State  
Executive Secretary**

Indianapolis, Ind., Dec. 15. — "Ten cents per capita for protection against tuberculosis in Indiana." That is the appeal issued jointly by Dr. William Lowe Bryan, chairman of the seals committee, and Murray Auerbach, executive secretary of the Indiana tuberculosis association, in behalf of the state-wide Christmas seal sale now on.

"If everyman, woman and child in Indiana will give a dime in support of the campaign against tuberculosis," they said today. "We can promise in return the most effectual program to check the spread of the terrible disease that the state has ever had. All but five per cent. of the money contributed will be used in Indiana and most of it will be expended in the counties where it is donated. This seal sale is in behalf of a work that must be done right here at home to protect the health, the very lives of our own people."

Seal sales chairman in all the counties have been asked to work toward a sale of ten cents per capita; although it is realized that many contributors will buy larger amounts. Purchases from five to five hundred dollars worth of the little stickers have been made regularly in past years by persons familiar by intimate contact with the work of tuberculosis prevention.

On the other hand, there are still numbers of citizens who do not know or appreciate what is being done to safeguard the community, and hence do not buy seals. Every effort will be made to place seals in every family to the state headquarters, two benefits will result. In the first place, the funds will strengthen the prevention program, and in the second place, the funds will strengthen the prevention program, and in the second place, knowledge of the menace of tuberculosis will help the public in checking its spread.

The ten cents per capita goal is not high, but it is higher than last year's average sale. Mr. Auerbach announced. In 1919 Indiana's purchase of the Christmas seals was at the rate of only 3.9 cents per capita. That was an improvement over preceding years, but even so, the state was outdone by twenty-two states in the union. Indiana has shown a steady increase in its purchases of the penny seals that are devoted to the stamping out of tuberculosis, but the amount devoted to the campaign every year is still ridiculously small by comparison with the task to be performed.

"In proportion to the increasing amounts contributed by the state for seals," said Mr. Auerbach, "The death rate from tuberculosis has been decreasing. As the budget for state prevention work goes up, the death rate comes down. Our problem is to bring down the death rate to a point as nearly zero as can be reached, and to do this, we must ask continually for more substantial contributions. That is the reason we are seeking a goal of ten cents per capita. We must have more visiting nurses, more clinics, more educational work in the schools, and so on."
