

## NEW SET OF RULES FOR GOVERNING BOXING IN INDIANAPOLIS PUBLISHED

(By Heze Clark, written for United Press)

Indianapolis, June 1.—A complete set of rules governing boxing has been prepared and published by the boxing commission of the city of Indianapolis. The laws, rules and regulations, prepared by the commission are very complete, and already requests from officials of other cities have been received for copies of the rules as the council of other Indiana cities plan to pass ordinances placing boxing and wrestling under the control of a boxing commission.

The commission protects first the public that supports the athletic contests and the athletes in a financial way. Then by limiting the number or passes the promoter of the bout is assured that his best seats will not be filled to over flowing with

persons who do not pay.

Over matching is prevented by the boxing code. A scale of weights sets out the class of the contestants, and varies from the junior flyweight which is 109 pounds to the heavyweight which is over 175 pounds.

The rules state that the chief official of the boxing exhibition shall be the referee, but that the referee shall render no decision. The code goes into details as to the conduct of seconds for the boxers, the clothing worn by contestants, the time of weighing in and requires a physical examination of each contestant. All gloves used must weigh at least five ounces. Only soft cotton or linen bandages are permitted and these are confined to three thicknesses and one thickness of adhesive tape.

No boxing exhibition of over ten rounds are permitted. All boxers who contest in matches in Indianapolis must be in the city at least ten days prior to the match. Contests

or exhibitions between negroes and white persons otherwise known as mixed bouts are strictly prohibited. All boxing exhibitions whether given in connection with any theatrical performance, circus, picnic, side shows at fairs, club smokers, lodges, stag parties or benefits are governed by the rules of the commission.

## FIGHTING CATTLE T. B. IS SUCCESSFUL BY AREA PLAN

In addition to systematic eradication of cattle tuberculosis by the accredited herd plan, interest in the "area plan," as it is called, has lately developed in many States, according to the report issued by the United States Department of Agriculture describing progress during March. The eradication of tuberculosis under the comprehensive plan generally includes a county as a unit and all the cattle in the county are tested. The report shows that in States where the eradication work was concentrated in certain localities in an effort to wipe out the disease entirely, a great many more animals were tested than in States where the area plan is not yet followed to any appreciable extent.

In one month, Nebraska working on the area plan, tested 21,000 cattle. A number of other states made high records as a result of the concentration of effort in a few counties. During March, Michigan tested 19,817 head; New York, 13,076; Missouri, 12,799; Indiana, 11,932; Wisconsin, 11,778; Iowa, 11,250; and Tennessee, 8,455. The total number tested in all the States during the month was 228,779.

The area plan of testing is a valuable supplement to accredited herd work which has resulted in the eradication of many thousand head of tuberculous cattle and the establishment of more than 13,000 herds accredited as free from the disease.

There are now more than 305,000 accredited cattle in the country; over 1,250,000 tested once and found free of tuberculosis; more than 2,133,000 under supervision; and about 408,000 on the waiting list. Wisconsin leads in number of accredited cattle with 36,183, and Minnesota follows with 33,759. However, the rate at which the work is going on in some other States these two will have to keep very busy to stay at the top.

## 131-YEAR-OLD NEGRESS DIES

Louisville, June 1.—Milly Mulligan, negress, died here Tuesday at the reputed age of 131 years, it was learned today. Records of the family that owned the woman as a slave are said to establish her age at 131. She leaves survivors to the fifth generation, six great-great-grandchildren.

## SUCH PAINS AS THIS WOMAN HAD

## Two Months Could Not Turn in Bed. Lydia E. Pinkham's Vegetable Compound Finally Restored Health

Seattle, Washington.—"I had dragging pains first and could not stand on my feet, then I had chills and fever and such pains in my right side and a hard lump there. I could not turn myself in bed and could not sleep. I was this way for over two months, trying everything any one told me, until my sister brought me a bottle of Lydia E. Pinkham's Vegetable Compound. I took it regularly until all the hard pains had left me and I was able to be up and to do my work again. The hard lump left my side and I feel splendid in all ways. I know of many women it has helped,"—Mrs. G. RICHARDSON, 4640 Orcas St., Seattle, Washington.

This is another case where Lydia E. Pinkham's Vegetable Compound brought results after trying everything any one told me" had failed.

If you are suffering from pain, nervousness and are always tired; if you are low spirited and good for nothing, take Lydia E. Pinkham's Vegetable Compound. You may not only relieve the present distress, but prevent the development of more serious trouble.

## PUBLIC TO PAY LESS FOR COAL DURING STRIKE

(Continued from page one)

In Alabama where a \$2.45 price will predominate.

Logan, Kanawha, Williamson and Northern West Virginia field committees met Hoover to fix a fair price sale for those areas.

The field committees, representing Northwestern Pennsylvania, Somerset county, Pennsylvania, Maryland and Upper Potomac and Utah will conclude negotiations with Hoover some time next week. The Utah negotiations will be conducted by mail as no representatives from that field were present at the meeting. Bituminous coal operators averaged a profit of fifteen per cent a year from 1916 to 1921, the Federal Trade Commission reported to Congress today. The biggest profit, 29 per cent, was made in 1917, the next largest 25 per cent in 1920 and the lowest two per cent was in 1921.

## RADIO WEATHER REPORTS TO BE ISSUED ON GREAT LAKES

Following the establishment of the Pacific coast radio weather reporting program by the Weather Bureau of the United States Department of Agriculture in March, this service has been extended since April 15 for the benefit of shipping and aviation on the Great Lakes. This completes the service to all shipping interests in waters about the United States—in the Atlantic, Gulf of Mexico, Pacific, or Great Lakes. Heretofore this type of service was only in operation along the Atlantic and Gulf coasts and in the Caribbean Sea.

In a circular available to those interested this new service is described in detail. Twice daily at noon and 11:30 p. m., seventy-fifth meridian time, between April 15 and December 20, the Great Lakes Naval Radio Station will broadcast on 1,988 meters wave length a message giving surface weather conditions as observed at 8 a. m. or 8 p. m., and aerological observations taken in the morning or afternoon of the date of distribution; the message will include also a synopsis of general conditions, wind and weather forecasts for the upper and lower Buffalo, N. Y.; Chicago, Ill.; Cleve-
