Registration this year is permanent. After this unless they change the law in some way you won't have to bother with registering unless you move to another precinct from the one in which you now reside. By all means qualify this year and be done with it.

Register and be quick about it if you intend to take your part in selecting officers who will spend your money the next two years. Of course if you don't care anything about it, you won't need to worry and of course you won't complain whether it suits you or not if you don't register. The last day is Monday and after nine o'clock that evening it's too late.

The Adams County Witness says that eighty-eight per cent of the taxes are used at home and that high taxes are therefore due to the local officials. It's true that most of the tax money is used at home but the rest of the statement is not true. The cause of the high taxes is the new law which permits it. The people will spend money so long as they can under the limits of indebtedness and that's the real trouble. Your valuations were tripled and the limits left as they were. Consequently your taxes were doubled or tripled. Talk as you may the facts remain that the taxes are much higher than they could have been under the old law and there is just one cause—the new tax law. You won't get relief until it is changed and a limit fixed on the amount which can be spent.

Adams county has never sent a representative to congress. We have the opportunity this year and we believe the voters of this section will do their part by voting for John Tyndall. He has lived among you always, has played the game straight, believes from the soles of his feet to the crown of his head in those things of greatest benefit to the people. He knows the farmer's battle, the laborer's trouble, the business man's uphill fight. He knows the tricks played against the people and he will if sent to Washington, devote his time to fighting for you. If that's what you want and you do, why not vote for John Tyndall? He will report back to you and he will make good if given the opportunity.

He is entitled to a vote of confidence from this county and we feel sure from all reports that he will receive it.

Some of the republican political speakers, anxious to discuss something other than their own records are repeating much of their speeches of two years ago and as they reach the climax, proclaim in dramatic fashion: "If we were in the league of nations now we would be sending our boys alongside the Greeks and the British against the Turks." To any one with a grain of common sense this ought to be sufficient to convince of the bankrupt condition of the orators. Canada is in the league and you haven't heard of them sending any men across, Argentina and Sweden and fifty other nations are members but not a man has been sent to the front. Even Great Britain is only defending her own. However they should mention the fact that the United States which is not a member of the league is the only nation in North or South America which has sent armed forces to Turkey. We have dispatched twenty American destroyers there. A lot of political speakers think the only way to win a campaign is to misrepresent the facts to the voters. The league of nations is not an issue in this campaign. The real question is the record of the administration and the "Do nothing congress."

A four page circular headed "The truth about your taxes" was sent to one of the voters of this county this morning declaring that only twelve per cent of the entire total of money raised goes to the state which doesn't mean a thing. Of course if your ownship builds school houses and roads you must pay for it. The circular shows that from this county we send \$118,265.12 to the state. Think of it and this is one of the small counties of the ninety-two in Indiana. For the expenses of the county and county government the circular shows we spend \$114,405.90. In other words we conduct the county for less money than our assessment for state government. In addition to this the expenditures at home are largely increased because the new law permits it. The circular does not explain why they are building a two million dollar palace for prisoners, wasting great sums of money in various ways, spending eight times as much to maintain each mile of state roads as is used in Adams county on other roads or the other charges of misgovernment. The people understand this tax question better than the tax commission and the republican state committee give them credit for and they are sick and tired of high taxes and poor excuses.

### MEXICAN TRAVELERS KILLED BY PANTHERS

Guides brought reports that three families of travelers were devoured by a pack of about fifty panthers. They stated that they had found the pack devouring the remains which consisted of three women, two men, two boys and a baby. When found by the guides the panthers put up a hard battle. ## The People's Voice

### YOU SHOULD VOTE

Editor Democrat:

It has often been asked, "what are our ideals of citizenship, individually, collectively and nationally?" Or haven't we any. Argue we that self-centered? Does the world mean anything to us? Do we mean anything to the world except the money bags of Shylock? Is that the extent of our Christianity? Does it measure the depth of our civilized veneer? Are we our brothers keeper or is that limited to individuals?

True, our ideals should begin at home in our home community but that's no reason they should be confined there. Every citizen should take a positive attitude and do his duty however humble. The little things are as essential as the big although perhaps not as important on their face. We can't all be leaders, some must be pushers. Some people are too interested in chasing the almighty dollar to perfect or fulfill their franchise. Is money their ideal, is it their object in life, their god? Some are just careless, others imply apathetic, in regard to voting. Would not a few of us kick like the proverbial hay steer if we could not vote? What is the accounting for this cross current and contradiction of human life?

One of the causes of the Revolutionary war was taxation without representation. Haven't we taxation now? Confiscation would be more apt. Can we induce the political profiteers to respect us and give us what we want if we remain at home on election day? No matter how many clubs you belong to; how often you attend church; I will not say you are not a good citizen unless you vote, but I do say you are a better one if you do vote conscientiously. Although not only from a humanitarian standpoint I believe this country should not refrain from lending its moral influences to the old country. A few years ago Wilson brought across the water one of the greatest human documents of modern times and we were opening a new epoch for America that of scratching elbows with the Europeans and an era of great prosperity was ushered in. The Republicans have reversed this policy, built a wall around us and here we are almost like the China of olden times.

I believe a mistake was made in putting the league in politics. It's too big for partisanship. The American public should examine it calmly, feel it, taste it, touch it and smell it if necessary, then after thoroughly analyzing and dissecting the child put on the clothes deemed necessary.

Yours Respectfully  
JOHN SMITH, Farmer.

### MR. PATTERSON EXPLAINS

I take this method of expressing

myself in regard to certain petitions of which some of you are very familiar with, at presentation of said petition, assure you that I was unaware of any such action that might be placed within. My thought and object in so doing was to accommodate those in High School work. And giving those the privilege within their rights and donot care to be charged with any intent that might discomode others I would ask that the responsibility be placed on the responsible ones.

I wish to say to those that are placing me as being in favor of centralizing this township with already our goodly number of school buildings are entirely wrong and without foundation whatever. I wish to make it plain to you, as one of the petitioners of school building in district No. 4. Am very much displeased with the action which prolonged the construction of our much needed school building. I feel that this matter however should be ruled by the state laws as well as trustee and taxpayers of Blue Creek township, and for any official that has deprived as from the use of said school has placed nothing to his credit.

I wish it to be understood that I am positively no guarantee of any such action or any expenses that may be in connection. And to the interest of our people we feel that justice will rule these few remarks I care to make in defence of myself which may be of interest to you and as a candidate for trustee will pledge myself if elected to merit the confidence thus placed within to make any community greater we should strive to cooperate.
