

## GARFIELD HIGH SCHOOL

Basketball Team Expected To Create Another Surprise This Year

By GUY A. BOWSHER  
Written for the United Press

Terre Haute, Ind., Jan. 9.—Will the Garfield high school basketball five create as much surprise in the 1923 state championship as it did last year? The Terre Haute basketball team which went unknown to the state finals and came near upsetting the strong Franklin team proved to be one of the hardest working, fighting teams in the tournament.

The team this year is without practically every man that played in the tournament. Although Garfield has lost these mainstays Coach "Red" Hanna, has probably built a team this year that will go just as far as the team of 1922.

Even at this early date of the basketball season the purple and white quintet has played like a team in mid-season form. It has won in fine fashion all the games it has played.

The loss of "Babe" Wheeler, all-state center, was keenly felt by the Garfield team, but with Armour, captain-elect of 1923, Coach Hanna has probably developed a player who will even be better than Wheeler. Torr, the strong guard, is also lost by graduation; Gault, however, has proven to be a hard working individual and can shift from running guard to back position with ease. The remainder of the Garfield team is composed of "Art" Reinking, whirlwind forward, who succeeded in scoring from the side time and again last year, when rushed in as a substitute; "Bill" Everson, who has been able to play a consistent game at either running or back guard, and "Tubby" Kirchner, who is tall of stature, which gives him great advantages in the center position.

Vincennes, one of the strongest contenders in the state is scheduled on the Garfield chart, and this game should be one grand preamble to those following.

While the Garfield team has not long string of games won, they have the reputation of one of the hardest working fighting teams in the state. It is also just as strong as it was last year when critics said it would have won the tournament if it had had the practice.

## BREAK UP COLDS

Get a box of BULGARIAN HERB TEA. Flush the poisons from the bowels. Hot Medicinal Tea stimulates and refreshes your system. Take it hot to help kill colds. Sold by druggists everywhere.

## INDIANA FARM HOME IS THEME

## Institution Around Which Farming Centers, Discussed At Purdue

Lafayette, Ind., Jan. 9.—The Indiana farm home, the institution around which all the agricultural progress of the state really centers, was the central theme before the annual farmers' short course at Purdue University today. Classes in all other lines of work were suspended during the afternoon while the farm men and women devoted their time to a discussion of the farm home and how it might be improved.

E. I. Miller, of near Lafayette, president of the Tippecanoe County Farmers' federation, and Mrs. Lawrence J. Foster, wife of a prominent Montgomery county stockman and farmer, were the principal speakers. Their talks with the discussion is expected to lead to a well-formed program calling for improvement of the state's farm homes.

"There are no fixed rules for securing a home, but there are three fundamentals—industry, honesty and economy," said Mr. Miller in the course of his remarks. "I would have you to build a home filled with patience, kindness, meekness, commendation and forgiveness. Such a home will radiate to the community and state, service, friendship and good citizenship. The real home is its occupants or builders and in this sense, our homes are what we make them. It can be a home of hatred or a home of love."

Mrs. Foster made a strong appeal for a deeper appreciation on the part of farmers generally for the farm home and how it really signifies rather than "merely a place to eat and sleep."

"More money is a need of the farm home today, and has been for years past. I mean that not a large enough share of the farm income has gone into the farm home, and there has been too little consideration of what it would mean to the farm family to make it a more convenient and attractive place to really enjoy living," said Mrs. Foster.

Mrs. Foster suggested that a farmer butcher one less hog, or eat a fewer number of eggs and chickens and sell the products instead and put the money into home improvements.

The morning program for the men included instruction in corn judging by Prof. M. L. Fisher; judging of stock to be slaughtered, by Prof. F. G. King; judging of dairy cattle, by Prof. L. H. Fairchild; what farm products to produce and where, by L. S. Robertson; how to head off the chinch bug, by Prof. J. Davis; how to bring back the farm orchard, by C. L. Burkholder, and prevention of soil erosion, by C. A. Norman. These talks were followed by organized inspection trips to the university farms and agricultural buildings for both men and women.

The women short course visitors were guests of the home economics department at tea at the close of the afternoon program. J. Clyde Marquis, of the department of agriculture, one of the best known agricultural publicists and economists in the country, will speak tonight on "The New Business of Farming."

The short course gives promises of drawing an unusually large crowd during the wee, despite the snowfall over the state.

OWE MUCH TO THE BRUTE

Physicians Say Humans Owe Much Besides Glands To Brute Animals

By Joseph Wasney

United Press Staff Correspondent  
Philadelphia, Pa., Jan. 9.—Dr. Voronoff, famous surgeon who made the transplanting of monkey glands international conversation, did not tell one hundredth of it, according to physicians in the medical department of the University of Pennsylvania.

Experiments in rejuvenating youth by the use of glands has been underway by the medical world since the stone age. More than 30 years ago a French doctor compounded an extract of glands that was supposed to be the elixir of youth.

This liquor, however, had only a temporary effect on the patient and the effects of the stimulant soon wore off. The actual transplanting of a live gland to a human is merely the latest step in the experiments.

"It is a regular rule in the laboratory study here that we are unable to transplant from one species of animal to another," one physician said. "This means that if the gland opera-

tion is to be successful, the gland must be sacrificed by a human and not by a lower animal.

"Rejuvenation of youth as the operations are now conducted cannot last more than three or four years, for the transplanted gland will soon die."

Speaking on the subject of glands, the physician told the United Press that for the last few years the various glands of slaughter house animals have been dried and used in the search for the "Fountain of Youth."

Other parts of animals are used in the medical world. The latest uses of animal by-products are:

Extract from salves' brains are used for children who are definitely developed, to stimulate mental activity. The brains are not transplanted, they are dried and an extract or powder made from them. Young calves' brains are also used to prevent hemorrhages.

Bile is taken from the gall bladders of hogs and cattle and used for intestinal indigestion and to promote the absorption of fat.

For neurasthenia, mental disorders, premature senility, tuberculosis and similar diseases, the brain and the substance of the spinal cord of cattle are used.

The red blood cells of cattle are extracted and used in "wasting" diseases, while the kidneys of all slaughtered house animals are dried to use in uremic conditions.

Various forms of the "adrenal capsules" of cattle are used for malnutrition, low blood pressure, melancholia, asthma and other ailments. The glandular layer of the upper eighteen inches of the small intestine of pigs is used for functional indigestion and certain forms of diabetes.

Extracts for the treatment of gout and rheumatism is obtained from the liver of cattle and hogs and labeled "pancremy" by physicians. The lymph nodes of young cattle are used for adrenoids, hypertension of the tonsils.

"There are several thousand parts of the body of animals that are used in the treatment of human diseases," the physician said. "Of course, the ideal material would be of human origin, but it is impracticable as the source of supply is too precarious.

"We use wild animals the same as we do domestic stock. The monkeys do supply extracts for medical use and so do kangaroos and beasts of the jungles."

## GENEVA NEWS

Geneva, Ind., Jan. 9.—Kenneth Whiteman and family are visiting at the home of his parents, Mr. and Mrs. John Whiteman, at present.

Willis Glendening returned to his home in Fort Wayne Monday afternoon after spending the week-end with his father, Willis Glendening, Sr.

Mrs. L. L. Mattax is spending the fore part of this week visiting at the home of her daughter, Mrs. Harry Lynch, at Hartford City.

Mark Stanley, of Bryant, attended to business matters in Geneva Monday.

The small daughter of Mr. and Mrs. Ernest Reicheldeffer, who has been ill with pneumonia for the past several weeks, is greatly improved and is no longer under the nurse's care.

Mrs. Dan Schaneyfelt, of Portland, was a business caller in this city Monday.

Mrs. Tillie Burris left for Albany last Saturday and will spend some time at that place visiting her son Fred and family.

The Methodist Episcopal Ladies' Aid society was delightfully entertained at the home of Mrs. M. E. Hutton last Tuesday afternoon. In spite of the bad weather a large crowd was in attendance, twenty-four answering roll call. After the business session a social hour was spent in chatting, etc. Delicious refreshments were served by the hostess and her assistants.

The Misses Erma Staley and Marie Burdge were shoppers in Portland last Saturday.

Mrs. Louise Blocher returned to the home of her daughter, Mrs. L. L. Mattax, of this place last Friday after spending the holidays with relatives at Portland.

Miss Vilas Burkett, who has been employed here, returned to her home at Bryant last Saturday afternoon.

Miss Virginia Pyle left for Eaton Monday where she will care for her grandmother who is ill.

A. L. Riffle was a business caller in Berne last Friday.

Allowing Mustache To Grow Restores Eyesight

Warsaw, Ind., Jan. 9.—W. P. Beatty, aged resident of Warsaw, is regaining his eyesight, he says, as the result of adopting the advice of a centenarian, who told him to allow his mustache to grow long. After having followed the advice for four months he is now able to read newspapers without the aid of glasses.

Rejuvenation of youth as the operations are now conducted cannot last more than three or four years, for the transplanted gland will soon die."

## YES or NO?

A Test of Your Intelligence

The correct answer to one of these problems is YES, to the other NO.

## STOP TO THINK!

Questions Answered Tomorrow

1.—Is pink a color?

2.—Is the rainbow in the sky more a phenomenon of light and atmosphere than it is an optical illusion?

Yesterday's Questions Answered

1.—Is chalk a vegetable product?

Answer—NO. Chalk is quarried like marble or granite.

2.—Does our Federal government provide for death penalty for any other crime than murder?

Answer—YES. Treason is punishable by death by the regular process of the courts and applies to civilian as well as military offenders.

## BLIND IN PARLIAMENT

(United Press Service)

London—There is one blind man among the newly-installed members of the British Parliament. He is Frederick Martin, Liberal member for East Aberdeenshire. Mr. Martin is blind as the result of his war experiences, yet he is able to do most things, including the following of his favorite habit of fishing, as though his sight were unimpaired. He is the third blind man to sit in parliament during the past fifty years.

## STANDARD AMERICAN ANNUAL

The World Almanac is presented to the American public for the thirty-eighth year of its publication improved in form, handier to consult, easier to read, better printed and on better paper.

Readers who in constantly increasing numbers have testified to its value as a book of a daily and constant reference will find the tables of statistics revised up to the latest possible date by heads of departments in the National Government, in the States, in the cities (and particularly in New York City), and by men of authority in banking, trade and industry, and in social, educational and religious activities throughout the country.

New statistical tables present the latest census figures regarding population, vital statistics and industries, which are supplemented by those of the Departments of Agriculture, Commerce, Labor and the Interior, all setting forth in clear form the material growth of the Republic.

In addition, The World Almanac presents this year description of the several States of the Union and its dependencies, and descriptions of all the foreign countries with their colonies and dependencies, carefully prepared in most condensed form from the best available authorities here and abroad. Much of this material has been furnished or revised by the embassies, legations and consulates of the countries concerned and by The World Almanac's correspondents abroad.

The record of the year 1922 is given with greater fulness than heretofore. The reader will find the carefully compiled chronology or diary of the year, the death roll, the benefactions, the record of scientific progress, the tariff law and the other new and important laws, the full election returns, and the complete sporting events and records to which he is accustomed. He will also find new features in authoritative reviews of the financial world and bond market, with the range of prices for stocks on the Exchange up to December 1, 1922; also special reviews of labor and strikes, American relief work in Europe, the great progress made in aviation, the creation of the Irish Free State, the rise of the Fascist; the platform of the British Labor Party, and in another field, reviews of the year in the book world, art, music and the drama, and in wireless telephony and telephony.

The World Almanac is published by The New York World. Price 50 cents, postpaid.

SUPER-SHEIK IS IN JAIL

Griffith, Indiana, Man Charged With

Auto And Three Wives

(By The United Press)

Chicago, Jan. 9.—Martin Durkin, "super-sheik" of Griffith, Ind., was lodged in jail here today, charged with stealing an automobile and three wives.

According to police, Durkin stole a flivver and departed for a tour of Florida with Mrs. Margaret West, Mrs. Anna Linpell and Mrs. Mabel Savant, all of Chicago.

Durkin and his companions returned today. Durkin told police the Florida trip was marred by frequent stops to quell quarrels between his three companions.

"I brought 'em back. I'm glad I did. The women are glad I did and the husbands ought to be glad I did," Durkin told police.

## McSociety

OLD DIRECTORS  
ARE REELECTED

Stockholders Of American Security Company Hold Meeting Yesterday

At a meeting of the stockholders of the American Security company held in the offices on East Monroe street yesterday, the board of directors, which served during the past year, was re-elected. The board consists of H. J. Conroy, W. A. Kuebler, L. C. Waring, H. M. Gillig, C. J. Lutz, W. A. Klepper and John Clark. The officers for the ensuing year will be elected at a meeting of the directors, probably next Friday.

A good number of the stockholders in the company attended the meeting yesterday. All were greatly pleased with the success with which the company has met since its organization on March 2, 1922. Although the organization is less than one year old a large amount of business has already been handled and the outlook for a good year is excellent.

NEW SECRETARY OF INTERIOR  
TO COME FROM FAR WEST

Washington, Jan. 9.—President Harding has assured the leading members of congress that the new secretary of the interior to succeed Albert B. Fall, who retires March 4, will be a man from the territory west of the Mississippi river. This eliminates the possibility of the appointment of Senator New, Indiana, or Carmi Thompson, Ohio, both of whom have been prominently mentioned. It narrows the race down to Senator Poindexter and Representative Mondell, both of whom were defeated in the last election, and Joseph Dixon, former bull moose leader of Montana.

NO DECISION MADE IN  
FRED KOHLER CASE YET

Judge E. C. Vaughn, of Bluffton, who heard the case against Fred Kohler, Adams county farmer, charged in the Bluffton city court with violation of the liquor law, had not made a decision in the case yet this afternoon. He is working on his findings but is expected to announce a decision soon.
