basement floor will be on a level with the street, as shown above. Projecting from the center of the building and extending west 58 feet from the west line of the main part of the building and taking in 28 feet of the main building, the gymnasium and auditorium will be located. Under this projection there will be a basement which comprises the gymnasium. The gym will be 50 by 81 feet in the clear with a gallery on each side. Under the west gallery there will be a bowling alley and under the east gallery there will be two shower rooms and rooms for athletic equipment. On what is called the basement floor will be located the domestic science, manual training office, a hospital room and first aid equipment, a place for bicycles, and one or two assembly rooms. The Auditorium is on the first floor and is provided with a gallery off the second floor. This will be 64 feet by 81 feet in the clear, with a stage 20 by 60 feet. Thirteen class rooms, seating 35 to 40 pupils each and two recitation rooms and seven toilet rooms will be located on the first and second floors, exclusive of what is called the basement floor. The halls and toilet rooms will have terrazzo floors and the balance will be of maple.

The high school, grade and commercial classes will be located in this building and when completed the old school buildings on Madison and Fifth streets will be removed. A separate building which will house the heating plant for the school building and any new buildings which might be erected by the congregation will be erected at the south-west corner of the lot. This building will be 28 by 55 feet and separate coal bins will be constructed, also.

The front view as shown above shows 80 windows on the east side thus giving plenty of light to all the rooms in the building. It is estimated that at least 800,000 bricks will be needed to construct the building.

FLEES KIDNAPERS

MISS MINNIE VALPE

Chicago—A girl's quick wit saved her from a forced marriage at the hands of kidnapers here. When a closed car with four men dashed up, two of the men leaped out and flung her into the car.

"You and I are going to be married," one of the men told her.

"All right," she replied, "but this is so sudden, I never expect to be married but once, and I certainly cannot be married in these old clothes. You must take me to a store where I can buy some pretty things."

When they reached a store Miss Valpe ran to the nearest policeman. Her abductors, seeing themselves in a trap, stepped on the gas and roared away.

ITCHING ECZEMA
DRIED RIGHT UP
WITH SULPHUR

Any breaking out of the skin, even fiery, itching eczema, can be quickly overcome by applying a little Rowles Menth-Sulphur, says a noted skin specialist. Because of its germ destroying properties, this sulphur preparation instantly brings ease from skin irritation, soothes and heals the eczema right up and leaves the skin clear and smooth.

It seldom fails to relieve the torment and disfigurement. Sufferers from skin trouble should get a little jar of Rowles Menth-Sulphur from any good druggist and use it like a cold cream.
