**KEEP YOUR FEET ON THE GROUND:—**  
 All the authorities seem to agree that people are buying more carefully than they were a few months ago and with some slight regard for price. This is notably true in the matter of building. The government began it by suspending its building program to a certain extent. Several large building contracts in New York have been held up because of the high cost. This does not mean that there need be any check to prosperity, but it does in all probability point to a much needed readjustment which it is believed, will come gradually, and to the great advantage of all concerned, and to the whole business situation. There must be some limit, and it is well that it should be defined and observed. Men are saying that our dollar is gradually increasing in purchasing power—and who would have it otherwise?—by which it is of course meant that prices are gradually tending downward. If there were no limit observed, there would certainly be a crash sooner or later, for the limit would ultimately enforce itself. Nothing is more encouraging than the growing realization that moderation is a virtue, and that deflation, which shall bring the country back to something approaching "normalcy," is the only thing that can save us from trouble. No one, therefore, should be distressed at the signs that moderation is being cultivated, and at the manifest reluctance and unwillingness of people to plunge. In all this there is a change—and much for the better—from conditions that prevailed in other periods of prosperity, when people seemed to feel that there never would be a day of reckoning. The best way to make

a day of reckoning impossible is to order life from day to day on the basis of wisdom and prudence. That is what the people seem disposed to do.—Indianapolis News.

It's the funniest thing, that we hear so much about how square the postoffice department is run and how careful they are about civil service and how it is all "on the square" and yet the post master general always gets the job of managing the president's campaign for re-nomination and reelection. Harry New is to have charge of President Harding's campaign, Attorney General Daugherty being sick and will probably resign. Mr. New also attends to the appointment of postmasters and the selection of carriers and clerks. Politically alright but from a civil service point of view, kind of a joke, isn't it?

Larry Lyons shows no tendency to resign his job as state chairman of the republican party, it being said that his position is that he doesn't want to be put in the position of being forced out. Well any time it happens in the next year as it is sure to do, he will be in that position and the sooner he gets it over the sooner he will feel the relief. He has put himself in a hole by his K. K. acrobatics and all he can do is to sneak out of public and let them forget him. In the meantime Watson, New and McCray are trying to fix things for his successor and hold on.

Oh well, real summer never did become dependable until about June 1. Each year the season seems late and the cold weather kills the fruit and the wet weather ruins the crop outlook and disaster stares us in the face and then comes June and the fields look fine and in a few months we have a bumper crop and if the prices don't go to pieces, everybody is happy and this year is about like others after all and it doesn't do any good to worry any way.

This is a good time to make arrangements for getting the painting done the first nice day. Don't put it off too long for every one wants the job out of the road before the big crowd comes for Fireman's day.

**NOTICE VETERANS**

There will be a meeting of the G. A. R., W. R. C., American Legion, and Auxiliary to American Legion, at the Legion Hall on North Second street, at 7 o'clock Friday evening for the purpose of formulating plans for a joint observance of Memorial Day, May 30. Members of all four organizations are requested to be present. (Signed) Charles C. Langston, commander of American Legion.

**NOTICE TO BREEDERS**

My Full Blooded Belgium Stallion will make the season of 1923 at my farm 5 miles west of Monroe. Insurance \$12.00.

**PROPOSE ELEVATED SIDEWALKS FOR CHICAGO**

CHICAGO—The above sketch shows how the downtown streets of Chicago would appear if the sidewalks were double decked and all pedestrian travel eliminated from the present ground level, as has been proposed. The view is of Madison street looking east toward Lake Michigan. On the right in the foreground is the Tribune building. This plan avoids the present great danger to pedestrians in crossing streets, and furnishes three times as much sidewalk space. By widening the streets below, half again as much space for vehicular travel would be obtained. This would provide for greater speed, and with all pedestrian travel cared for above and one way traffic rules in effect, practically all crossing delays could be eliminated.

**NEW JERSEY RECORD**

Purdue Jersey Produces 12,530 Pounds of Milk in a Year

Another state production record has been added to those already held by Jersey cows in the Purdue University herd. This is the record for Senior three year olds and was made by the heifer, Lady Clarice May 342,426. She produced in a year 12,530 pounds of milk and 71,616 pounds of fat. The former record for this class was 658 pounds of fat. Not only does this Purdue Heifer establish a new Jersey record but she becomes the highest three year old producing heifer of any breed in Indiana, displacing the former holder of this record, an Ayrshire owned by the Gossard Breeding Estates of Martinsville, which had a record at this age of 714.96 pounds of fat.

Lady Clarice May is bred to the

Junior Jersey sire in the Purdue herd, Fawcett's Juggler, and is due to freshen in June and at this time will qualify for both the American Jersey Cattle Club silver and gold medals.

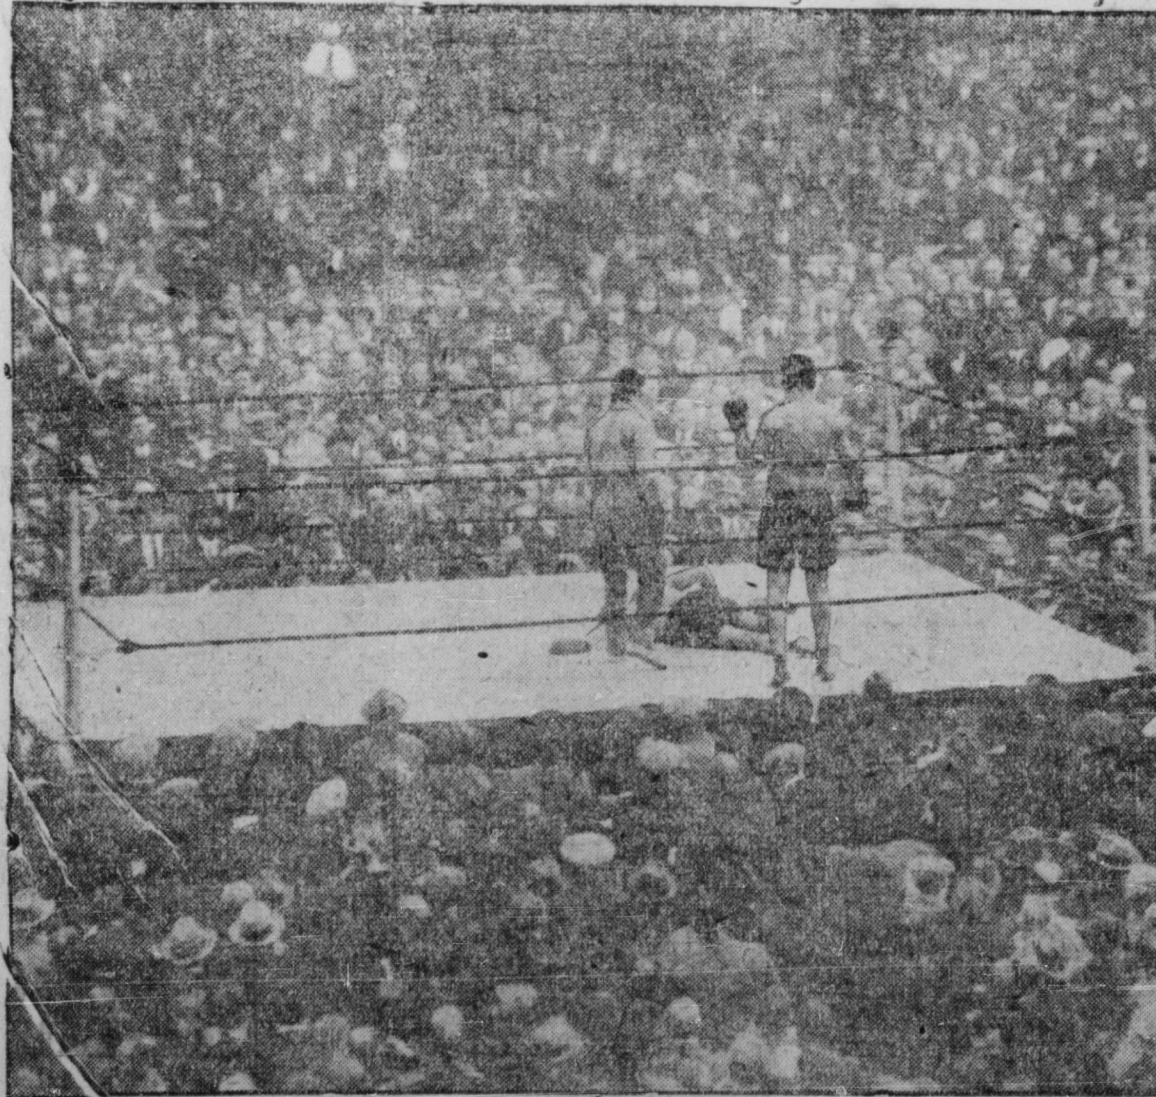

This heifer is one of the best individuals in the University Jersey herd and comes from some high producing ancestry. While she is her sire's first daughter to freshen, she at least gives indication that his other daughters should be high producers. Her sire's dam has a yearly record of 14,492 pounds of milk and 853 pounds of fat. The dam granddam and great granddam of Lady Clarice May were all bred in the Purdue herd and the former two are in the herd today. Her dam has a record of 530 pounds of fat as a three year old; her granddam produced 523 pounds of fat as a ten year old; her great granddam produced 447 pounds of fat as a two year old, a state record at that

time, also 504 pounds of fat as a five year. It can be seen here fore that this heifer comes from high producing ancestry.

This heifer was given good care and good feed during the year. Her daily ration was made up as follows: 10 pounds of alfalfa hay, 24 pounds of corn silage, and 12 to 16 pounds of a grain mixture made up of ground corn, ground oats, wheat bran, linseed oil meal and gluten meal. During part of the year she also received 2 to 4 pounds of beet pulp daily.

The record made by this heifer is another example of what the three essential factors for high production can bring about in the way of milk and butterfat records. These factors, good feeding, good breeding and good care bring results in dairy production an dwithout all of them maximum milk and butterfat production cannot be obtained.

**FIRPO KNOCKS OUT McAULIFFE**

NEW YORK—The above photo shows Firpo, the Argentine Wonder, just after he had administered the finishing touch to Jack McAuliffe in the third round of their fight here Saturday. The contest was held in the New York stadium before a crowd of 60,000.

**Missouri Synod to Meet in Fort Wayne in June**

Fort Wayne, May 15.—At the congregational meeting of the Concordia Lutheran church Sunday afternoon a committee was appointed to look after this congregation's part in quartering the several hundred delegates who will come to Fort Wayne next month to attend the annual meeting of the Missouri synod.

Other Lutheran congregations of the city have or will name within the next two weeks committees to act with the general committee in quartering the several hundred visitors who will come to the city on this occasion.

The Missouri synod is one of the largest organizations in the country and a large number of delegates are expected to attend the Fort Wayne meeting. There are 25 districts in the synod, made up of over 800 congregations. In addition to many congregations immediately in the Missouri synod, there are also districts in South America and Canada which will be represented at this meeting, which almost amounts to a national meeting.

The Fort Wayne meeting will open on June 20 and will continue until Saturday evening June 30, being a 10-day session.

Andrew Welfley, insurance man of this city, has been confined to his home for the past three weeks on account of sickness. During his illness his insurance business will be taken care of by Miss Rose Voglewede.

**Indigestion Unchecked Leads to Poisoning!**  
 If you suffer from indigestion it is a sure sign that your system is being slowly poisoned by the fermentation in the intestines. This condition produces heartburn, choking sensations in the chest, a feeling of heaviness or drowsiness, irritability, discouragement and despondency. These symptoms call for Dr. A. W. Chase's K-L Pills, which, taken in time, will offset the poison in the system. Read what one former sufferer has to say:  
 Mrs. Lottie J. Dewitt, No. 167 Front St., Fort Jervis, New York, writes:  
 "I am glad to say your medicine is wonderful. For over three years I had kidney and bladder trouble and a most worried feeling and I spent hundreds of dollars for treatment and failed to get any relief.  
 "When I saw your address in the paper I sent and got Dr. A. W. Chase's K-L Pills and today I feel like a new person.  
 "Your medicine is wonderful and the best in the world for kidney and bladder trouble."  
 You can buy Dr. Chase's remedies at all drug stores. To be sure of getting the genuine, see that portrait and signature of A. W. Chase, M. D., are on each box—your protection against imitations.
