ECLIPSE OF SUN
ON SEPT. 10Weird Spectacle Scheduled
To Be Visible In Indiana
During The Afternoon

If Monday September 10, is a day of clear skies in and around Decatur, the people of Adams county will be afforded opportunity to behold that always interesting and impressive spectacle, a solar eclipse.

On the afternoon of that day will

occur a total eclipse of the sun. At 10 he was engaged. The next morning he invited about 160 guests for a champagne party.

At six in the evening the police arrived.

At 7 o'clock the count's identity was revealed. He was a locksmith named Ranusch.

At 8 o'clock he was not engaged any more.

Rausch had stolen an automobile which he sold for a couple of hundred million marks.

He blew in his money on his party and couldn't pay his fine.

At 10 p.m. he was given free lodging in the city jail.

The path of totality, according to John Candee Dean, who has furnished the Indianapolis News with a diagram showing the course the eclipse will take, will leave the Pacific ocean and cross the southwestern corner of California. So that San Diego, Point Conception, and the Santa Barbara Islands will see the sun totally eclipsed. From there the line swings into Mexico cuts in a southwesterly course across its upper section and passes on to the Atlantic ocean.

In central Indiana the eclipse will begin at 2:26 p.m. and will end at 4:23 p.m. The period of greatest obscuration will come about 3:30. The sun will be in a good position to be observed. When the eclipse begins it will be about half way between the zenith and the western horizon, and when the last trace be nearly two hours high.

In this article Mr. Dean says that the nearest approach of a total eclipse of the sun to Indianapolis, was on August 7, 1869. The southwestern part of the state was in the path of totality and a special train was run from Indianapolis to Greencastle to carry passengers to see the total phase.

"The line of totality, in the coming eclipse," says Mr. Dean, "will be a little more than 100 miles wide. It is not to be supposed that this line is a streak of darkness. The shadow of the moon on the earth's surface is a dark circular spot, a little flattened. This circular dark shadow, about 100 miles in diameter, moves eastward over the surface of the ground with the speed of a cannon shot, being about 1,050 miles an hour.

"During the eclipse the moon's globe, black as ink, is seen hanging in mid-air surrounded by a corona of soft silvery light such as is depicted by painters around the heads of saints. Besides this crown, tongues of rose-colored flames of fantastic arms shoot out at many points from behind the black moon. Some minutes before the totality the weird darkness begins to be felt, and the light of the corona is altered to an electrical effect. Animals are perplexed and fowls go to roost."

On the afternoon of that day will

MONEY TALKS

You have often heard this expression and it certainly is true. In fact it fairly "YELLS" during the present strenuous times. Therefore, anyone is foolish not to get the best and most for what they spend.

ECONOMIZE

By CENTRALIZING your indebtedness with us you will find it real economy for you can borrow and pay cash for what you buy. This will enable you to start anew and on a cash basis with only one bill to pay instead of a DOZEN floating around here and there. Old debts destroy your peace of mind and the merchants' confidence. Ready cash will make everyone concerned comfortable.

LOANS

From \$10.00 to \$300.00 on your household goods, pianos, live stock, etc., at the lowest rates and at the greatest length of time it is possible to obtain money from a Chatte Loan Company.

CLUB CALENDAR

Saturday
Tri Kappa Pastry Sale—Schmitt's Meat Market, at 9 o'clock.
Wednesday
So Cha Rea—Mrs. F. J. Schmitt.

Mrs. D. E. Studebaker entertained with a slumber party last evening in honor of her sister, Miss Martha Bowman, of Indianapolis, who has been her guest for the past several days. Those present were the Misses Victoria Mills, Florine Michaud, Veronica Anwer, Gladys Butler, Katherine Kocher, Mary Suttles and Naomi Harkless.

A very delightful picnic was held at Belmont Park yesterday evening by the girls of the Cloverleaf Creamery and a few invited guests. The girls built a large bonfire over which they cooked roasting ears, coffee, eggs and other food. The girls from the Creamery were Misses Esther Miller, Catherine Omor, Catherine Christen, Ethel Erwin, Marcella Lengerich and Ruth Frisinger. The invited guests were the Misses Cecil Miller, Velma Erwin, Florence Holthouse, Regina Murtaugh and Marie Murtaugh.

Mr. and Mrs. Luther Walker, of Card well, Missouri, are in the city as guests at the J. W. Vail home, on Madison street. Mr. and Mrs. Walker are combining business with pleasure on the trip, as Mr. Walker is manager of Mr. Vail's egg crate and slave factory at Cardwell. Mrs. Walker is a former Decatur girl, being a daughter of J. E. Thomas, now of Urbana, Ohio. Mr. and Mrs. Walker are on their way to New York where they will visit. Tomorrow the will go with Mr. and Mrs. Roy Runyon to Urbana where they will visit with Mr. Thomas.

In central Indiana the eclipse will begin at 2:26 p.m. and will end at 4:23 p.m. The period of greatest obscuration will come about 3:30. The sun will be in a good position to be observed. When the eclipse begins it will be about half way between the zenith and the western horizon, and when the last trace be nearly two hours high.
