

MAP SHOWING 3,000 MILE RELAY OF RADIO

Radio fans in the eastern half of the United States who thought they were dreaming when they heard, over the radio, "Hello, America, this is the Hotel Savoy broadcasting from 5 Savoy court, London, England, station 5XX," a week ago, were really listening to an epoch making event in the history of wireless broadcasting.

What the American fans heard, and it is estimated that more than 100,000 tuned in to at least part of the English program, was an experiment in rebroadcasting which demonstrated that the day when the whole world can listen to one program is not far distant. The music they heard originated in London, but, following the original broadcast, it was received, rebroadcast, received again and again and rebroadcast before it was picked up by the American listeners.

Just how the London music was brought to the American receiving sets is a noteworthy example of radio engineering and co-ordination of radio facilities. Indeed, never before has a message or music been broadcast from one station to be picked up by another station and broadcast from there to be picked up by a third station for rebroadcasting to the radio audience.

The concert from England has its original in the Hotel Savoy, London. The signals were sent over land wires to the high power station at Chelmsford, England, with call letters 5XX. There the signals were transferred to a 20,000 watt radio telephone transmitter for transmission on a 1,600 meter wave. On this side of the Atlantic these signals were intercepted by a super-heterodyne receiver operating in conjunction with a ten mile wave antenna, located at Belfast, Me., thus spanning the Atlantic ocean, or a distance somewhat less than 3,000 miles.

Open War On Those Who Desert Pets And Abuse Their Horses

Fort Wayne, March 31.—The automobile driver who ousts an undesirable dog or cat from the door of his automobile on a lonely road and then speeds away to permit the former pet to stray about the country, and the owner of old, unfit horses, forced to do laborious duty, are to be the objects of a campaign by the Fort Wayne Humane society, it was announced Friday night during a meeting of the society in the chamber of commerce.

Violators will be prosecuted, Mrs. R. A. McCulloch, secretary, asserted. Humane Officer Harry Deams was instructed to patrol the streets of the city and to deal forcefully with persons he found guilty.

"From February 1 to March 28, we collected 278 stray dogs and 113 cats," Mrs. McCulloch asserted. "It is taxpaying time and owners who do not desire to remit the required tax are seeking to get rid of their pets. They use extremely cruel measures."

"The animals are taken far away from their homes and are turned loose. That works a hardship on residents of the outlying districts, and in many cases the animals wander back to the city where they are collected by our society."

"Many times, we find good homes for them, but sometimes it is necessary to destroy the homeless creatures."

The Humane society also was aroused by the practice of a few owners in forcing their horses to work when incapacitated.

"The man who harnesses and works a poor old horse that he has

bought for \$1, \$2, \$5 or slightly larger sums, will be prosecuted," the society's secretary declared. "Mr. Deams has received instructions to patrol the streets and take action against owners of that type."

The type of horses driven by local truck and the larger hauling firms is admirable, Mrs. McCulloch stated. Fort Wayne has more beautiful horses in active service than any other city in the state, it was pointed out. Praise also was given for the treatment of horses by the trucking and hauling concerns.

It was reported that 100 cases of cruelty to dumb animals were investigated during March by humane officers.

Plans for Humane week, April 13 to 18, were discussed. Ministers of local churches will be asked to observe Humane Sunday, April 18, with appropriate sermons.

Fifteen minute programs will be conducted in schools of the city and county. A parade in which the finest horses of the city and children with dog and cat pets will take part, will be held during the latter part of May.

Hammer And Axe Used In Murdering Woman

Lagrange, Ill., Mar. 31.—(United Press.)—The mutilated body of Mrs. Mary Weller, 62, "mother" to the school children of Lagrange for the past 25 years, lay in the morgue today while police hunted for her husband, Frank. Mrs. Weller was murdered, a hammer and an axe being used by the slayer.

A little school girl brought about the discovery of the crime last night, when after futile efforts to gain entrance to the tiny candy shop conducted by Mrs. Weller, she called her

brother. He called the police. Under blankets on the back room floor the body was found. Police believe the murder occurred Saturday.

Ted Wichman, a roomer at the Weller home, told police he had found a note in his room Saturday night saying the Wellers were in the city and asking him to look after the fire. It was signed "Frank."

"He was drunk Saturday morning and demanded money," Wichman said. "He wanted \$300. He said he would go away and leave her free if she would give it to him. She refused to do so."

Mrs. Weller was reported to be wealthy. Reports around the village were that she had a fortune of about \$100,000.

Lieut. Osborne Wood Arrives Back In U. S.

Tampa, Fla., March 31.—(United Press.)—The freighter West Chetac arrived off Tampa Bay early today, bringing Lieut. Osborne Wood, son of the governor of the Philippines.

Young Wood left Cadiz, Spain, aboard the West Chetac three weeks ago, virtually penniless, having lost

a fortune in various European resorts. The fortune was made by long distance trading in Wall street while Wood was stationed with his father in the Philippine Islands.

It is expected Wood will set foot on United States soil some time this

afternoon. The distance from Tampa Bay to the mainland is 40 miles and is a six hour run.

Shoals.—Charles Summers and three other persons riding in his machine narrowly escaped death when,

with presence of mind, he turned and ran his automobile parallel with a B. and O. passenger train as he was about to cross the track.

Laporte.—Forty new members were initiated into the Moose lodge here in one evening during the membership campaign now in progress.

Springtime is the Time to Plant Seeds

in the ground. You watch the tiny plant grow from a tiny sprout to a full grown stalk.

Likewise, this is a good time to plant dollars in the bank; you may start with a tiny deposit, but give it the same attention you do the growing plant and you will eventually have a substantial bank account.

Plant a few dollars with us TODAY—the harvest is sure to come.

Eveready Columbia Hot Shot Batteries contain 4, 5 or 6 cells in a neat, water-proof steel case.

"I want Eveready Columbias"

BECAUSE they have a snap and vim that you notice at once. I can use them for all general purposes around the house and they're great for radio. The Hot Shots are fine for gas engine ignition. Easy to get. Sold everywhere, at radio, electrical and hardware shops, general stores, marine supply dealers and garages. Fahnestock spring clip binding posts on the Ignitor at no extra cost to you.

Manufactured and guaranteed by
NATIONAL CARBON COMPANY, INC.
New York San Francisco

Popular uses include—

gas engine ignition
telephone and telegraph
doorbells buzzers
motor boat ignition
heat regulators
tractor ignition
starting Ford's
ringing burglar alarms
protecting bank vaults
electric clocks
radio "A"
firing blazes
lighting tents and
outbuildings
running toys
