### Champion Hot Dog Eater Is Found; Breaks Own Record

The champion "hot dog" eater has been found.  
One day during the first part of this week, a certain young man of the long, lean and lanky type, residing near Chattanooga, Ohio, visited Decatur and ate 13 hot dog sandwiches and drank 11 bottles of pop in thirty minutes, at a local restaurant. Before eating the hot dogs and drinking the pop, he had eaten one pound of pressed ham and a half dozen rolls.  
When the above record was recounted to a well-known Decatur young man, who takes much pride in his abnormal appetite, he remarked that he could beat the Chattanooga youth in a race. Yesterday, the young man from Chattanooga visited the city again and started in to make a new record. Between 2:30 o'clock yesterday afternoon and 10:30 o'clock last night, he ate 24 hot dog sandwiches and drank 23 bottles of pop, the flavors being varied. The Decatur young man is hunting some method of working up an appetite.

## "Red" Grange To Try Skill Against Butler

Champaign, Ill., Oct. 10.—Once upon a time, Pat Page, coach of Butler college, brought to Illinois a team that upset and shocked Illinois followers. Page will try to repeat history today.

Harold "Red" Grange, who has been suffering a cold, has recovered and will try again today to break away from some of the fleshy fans that terrorized the conference for four

years.

Coach Bob Zuppke has been toiling the Illinois line. What progress he has made will be recorded against Butler.

## Another Victory For Notre Dame Expected

South Bend, Ind., Oct. 10.—Another victory for Coach Knute Rockne's Irish was expected today from the game between Notre Dame and Beloit college.

Unless there occur reversals, which even the visitors do not expect, the Irish should have no trouble in disposing of their last foe before the Army game.

Rockne had no tricks for Beloit, all his energies having gone to preparation for the service conflict.

## Earthquake Shock Is Felt In New Hampshire

Manchester, N. H., Oct. 10.—(United Press)—A slight earthquake shock was felt in several sections of New Hampshire at 8:55 a. m. Friday. In the vicinity of Ossipee, the shock was distinct. It sent people scurrying into the streets and caused minor damage to property.

Cambridge, Mass., Oct. 10.—(United Press)—A slight earthquake shock was recorded on the seismograph at the Harvard university at 8:56 a. m. Friday.

## Rehearing Of Blackford Election Contest Refused

Indianapolis, Oct. 10.—The state supreme court today denied a petition for a rehearing in the Blackford county election contest suit over the office of county auditor.

Walter Hughes, defeated democratic candidate, sought the rehearing, asserting that the court had erred in its original decision permitting the inclusion of absent voters' ballots which gave the victory to Ruth Werber, republican.

The case was "appealed from the Blackford county court, which had awarded the office to Miss Werber and the decision of the lower court was sustained by the supreme court in a decision last spring.

Hughes immediately appealed for a rehearing and the appeal was denied today.

Mrs. Amos Fisher has returned from South Bend where she spent a few days visiting with relatives.

## Where Men Use Brains and Skill —More than Muscles

The General Electric Company has plants in forty-two cities and towns in the United States; the nearest one being at the address given below.  
Employment is usually steady in these plants; and wages and hours are good. If you are seeking a place where you can earn and grow, call on the employment manager. You will find him friendly and helpful.

General Electric Company

It is worth your while to know how completely the most modern of manufacturing plants have substituted electric motors for human muscles.

The average G-E worker commands a giant's strength, but is called on for so little physical exertion that he can give free play to his mental powers and cultivate his natural skill.

General Electric says to every industry "Do it electrically," and it practices what it preaches. In its own factories electricity is used for light and power in all branches of production—machine drive, railways, hoists, welding, punching, and for a thousand other purposes.

Work in a General Electric factory is a vastly different thing from swinging a sledge.
