

Publishing Company To Help Boys In College

To help develop leadership for the future among grammar school boys of today, The Curtis Publishing Company, of Philadelphia, has offered \$250,000.00 to be loaned to boys who desire to attend college.

To any boy who qualifies under the terms of this College Loan Plan, The Curtis Publishing Company will loan amounts up to \$1,500.00 until the total of \$250,000.00 is outstanding.

The security for each loan will be the boy's character as developed in his home, in his school and in his work in delivering the Curtis publications.

The plan has been perfected with the advice and counsel of more than fifty of the country's leading educators and business men. It has their unanimous approval on the ground that American business needs better trained executives and is finding it increasingly difficult to obtain them.

Camouflaged Auto To Hunt Big Game

London, Nov. 3.—(United Press)—A camouflaged automobile designed especially for tiger and big game hunting, and costing \$35,000 has just been delivered in London to the Maharajah of Patiala.

"The Magnificent Maharajah," as he has been called since he swept into London some weeks ago and started all England with the barbaric splendor of his appearance and his expenditures, will use the machine for tiger hunting in his Indian state.

Among the items of special equipment to the car are a searchlight for pursuing game at night; gun rests on the side of the car so designed that the guns can be brought into instant use and an exhaust "whistle" to frighten off tigers from springing on the car from behind from an overhanging branch. The body has been camouflaged for effective concealment in jungle hiding places.

Tiger hunting from an automobile, according to the Maharajah, is one of the most exciting sports in the world.

OBITUARY

J. T. JOHNSON

J. T. Johnson was born in Tuscarawas county, Ohio, August 7, 1834, son of James and Eliza Johnson, and departed this life October 30, 1925, having reached the advanced age of 91 years, 2 months and 23 days. Thus, he had passed by more than another score the three score and ten years allotted to man.

When a boy of three, with his parents he came to Adams county, Indiana, where he has resided for the past 53 years. For 87 years he lived in Washington township. When he came to Adams county, there were no houses built in Decatur; and he helped to clear away the forest where the Adams county court house now stands.

When a young man, he was married to Minerva Reynolds, who preceded him in death eight years ago. Ten children were born to them, five of whom preceded him in death. His life was spent on the farm up to about 15 years ago, when he came to Decatur to spend his last days. He is the last of a family of five children to die.

Mr. Johnson, shortly after coming to the city identified himself with the M. E. church of Decatur, remaining a member until his translation. In the fullness of years God took him.

The children who preceded him in death are: Willis, Mrs. B. F. Maples, Edward, Stella and May.

There survive, to mourn their loss, the following children: Mrs. A. B. Hedricks, Ypsilanti, Mich.; Mrs. Adda Haley, Muncie, Ind.; Mrs. Geo. Turkman and Charles Johnson of this city; and Mrs. E. Weldy of Mishawaka. There are also fifteen grandchildren and ten great grandchildren. God grant that they all with Browning may say—"Mist in death your daylight finish? My sun sets to rise again."

"The stars shall shine for a thousand years,

A thousand years and a day;
But God and I will love and live
When the stars have passed away!"

The funeral was held from the M. E. church, Sunday, November 1, with the Rev. R. W. Loose officiating. Text: Luke 2:29-30.

Fewer Cases Of Venereal Diseases

Indianapolis, Nov. 3.—The number of cases of venereal diseases in the state are decreasing according to Dr. William F. King, secretary of the board of health.

Last month, figures in the office of the secretary show, there were only 4,934 cases in the state.

Of this number only 276 were new cases, and 175 persons were cured.

In September, 1924, there were 5,231 cases under treatment, with 339 new cases and 126 dismissed.

Dr. King stated that during the past year the decrease in the number of

Storm Wrecks 17 U. S. Planes

In the sixty-mile gale that swept the Patapsco River, near Baltimore, naval planes were wrecked or so badly damaged that there is little chance of salvaging them. The storm caused general havoc along the coast.

cases in the state has caused the board to abolish one clinic.

Syphilis leads the venereal diseases in the state according to statistics.

Dr. King declared that the only definite check on the disease came through the clinics of the state because while physicians are required to report all cases many fail to do this through oversight.

LONDON SHOW EXHIBITED DOGS VALUED AT MILLION

London, Nov. 3.—(United Press)—Over \$1,000,000 worth of blooded dogs were exhibited at the recent Kennel Club show here.

Several were valued at more than \$5,000 each.

Large as were the entries, nearly 6,000 dogs were "benched," and the show was but a small and highly selected segment of England's immense stock of pedigreed dogs.

Tuberculosis Costs People Of State \$10,000 Annually

Indianapolis, Nov. 3.—(United Press)—The people of Indiana \$10,000 a year it was estimated by officials of the tuberculosis association today.

Fort Wayne Man Heads Associated Credit Bureau

Muncie, Ind., Nov. 3.—(United Press)—A. J. Biebold, of Fort Wayne today heads the Indiana Associated Credit Bureaus.

Other officers elected at the closing session of the convention yesterday were Miss L. Linder, Hammond, vice-president; J. E. Deetz, Peru, secretary-treasurer.

Wayne County Banks Have Vigilantes Organized

Richmond, Ind., Nov. 3.—The organization of a band of vigilantes, sworn in as deputy sheriffs for the protection of Wayne county banks was completed today.

The vigilantes will work under the direction of the County Bankers Association and will cooperate with the county and city officers.

Discredit Suicide Theory

South Bend, Ind., Nov. 3.—(United Press)—Relatives of William Deavel, 65, retired farmer, today discredited a theory of suicide in his death.

He was found asphyxiated in a rooming house. It is believed he did not know how to turn off the gas and blew it out.

Seeks Permanent License Plate That Is Permanent

Indianapolis, Nov. 3.—Secretary of State Frederick Schortemeier wants somebody to tell him when a permanent license plate is permanent.

Schortemeier has under consideration plans for the use of permanent license plates for automobiles in this state but to date he has been unable to find a plate which he believes will stand up under the wear and tear of driving.

It was pointed out that to result in a saving to the state the license plates would necessarily have to last at least three years.

At present the state pays seven cents a pair for plates.

The cheapest "permanent" plate offered the secretary sells at thirty cents a pair.

The secretary is authorized by law to use "permanent plates in his discretion."

Indications are that Indiana will work along with the present type of annual plates for some years.

Number Of Building And Loan Associations Grows

Indianapolis, Nov. 3.—Because of the large increase in the number of building and loan associations in Indiana, T. D. Barr, bank commissioner today recommended the creation of a separate department to handle the affairs of the associations.

The business of the building and loan associations of the state is now administered under the direction of A. L. Guthrie, chief clerk in the building and loan division.

In speaking of the recommendations Barr pointed out that there are now 481 associations in the state of Indiana.

During the fiscal year, which ended September 30, eighteen new associations, with a capitalization of \$10,700,000 were incorporated in the state.

Forty-one associations were given permission to increase their capital

stock \$48,500,000.

"Indiana can well feel proud of having the largest building and loan association in the entire world, the Railroad Men's Building and Savings Association of Indianapolis, capitalized at \$100,000,000," Guthrie said.

Guthrie pointed out that the volume of work necessary to administer the affairs of the associations in Indiana is so great that a separate department is absolutely necessary.

Fourth Attempt At Suicide Is Successful

Brazil, Ind., Nov. 3.—(United Press)—County authorities today are attempting to discover a motive for the suicide of Mrs. Anna Zinko, of Carbon.

The woman saturated her clothing with kerosene, applied a match and then rushed out into the yard where the body was discovered by a son.

It is said to have been Mrs. Zinko's fourth attempt at suicide.

Gary To Have New Civic Hall And Gymnasium

Gary, Indiana, Nov. 2.—(United Press)—Gary is to have a new civic hall and gymnasium which will seat 4,000 persons as the result of the gift of a \$75,000 site in the heart of the city by Judge Elbert H. Gary, of the U. S. Steel corporation.

The structure will be paid for from the proceeds from athletic contests.

Britain Plans Two Airships Twice As Large As Shenandoah

By Keith Jones
(U. P. Staff Correspondent)
London, Nov. 3.—(United Press)—Far from being dismayed by the fate of the Shenandoah and the disasters which have fallen its own airships, Great Britain is about to start the construction of two dirigibles each more than twice the size of the Shenandoah. "England has never lost faith in di-

rigibles," declared a high official of the British Air Ministry in an exclusive interview with the United Press today. "To prove this statement I will say that designs have been completed and construction is about to be started on two dirigibles each of 5,000,000 cubic feet gas capacity. These are more than twice the size of any dirigible ever heretofore constructed."

These will be known, he said, as the "R-100" and the "R-101". The over-all length of the new machines will be 750 feet and the diameter 130 feet. Less than 100 feet longer than the Shenandoah or the R-33 which has recently made test trips over London, the increased gas capacity of the new air liners will be obtained by a marked increase in their diameter.

"Yet despite the increase in the diameter of the new dirigibles," continued the official "model tests in wind-tunnels have shown that the new design actually presents less resistance to the air than the present dirigibles of half their carrying capacity."

"In addition an entirely new type of construction will go into the making of the new airships. Instead of the framework of the dirigible being based on aerodynamic principles of construction as previously used the new frameworks will be built on principles followed and developed through long years of steam-ship construction.

"By keeping the length of the machines approximately the same as in the largest of the present dirigibles and getting the increased capacity by increasing the diameter we are able to construct a machine of much greater strength than has been possible in the past."

Neither the Shenandoah nor the R-33—both of which were torn from mooring masts during storms last year—had been designed with a view to use in connection with mooring masts, he said. But in the new R-100 and R-101 the designers were planning the mooring masts of the airships with special reference to their attachment to mooring masts.

The new dirigibles will have a speed of about 70 miles an hour and will be propelled by seven 600 horsepower engines of the Diesel type, using heavy fuel oil instead of gasoline. The dirigibles will be constructed in the Royal Airships Works at Cardington, England, where workmen are already busy enlarging the present sheds in anticipation of the commencement of the work on the new machines.

After extensive tests of work completed arships have been made, said the official, it was the intention of the

Air Ministry to lease the ships to a commercial company for use in transporting mails and passengers between London and India. Work on a new mooring mast 195 feet high and em-

bodiment new principles of construction is about to be started at Cardington, and a similar one will be erected at Karachi, India, the other terminus of the route.

Have a heart for your stomach!

Don't overwork it by "stuffing" and eating between meals.

Try WRIGLEY'S when you want "just a snack"

It will soothe and satisfy your taste craving, allay thirst and feverish mouth, calm the stomach, ease your tired nerves.

Teeth are kept clean, throat refreshed, the craving is satisfied and—when regular meal time comes, you're ready!

Then "AFTER EVERY MEAL" it aids digestion.

Running a home is a business

NO PURCHASING AGENT in a business office could hold his job unless he kept abreast with new products and the progress of money-saving merchandise.

Women are the purchasing agents for the home. They can always do their work more efficiently by knowing of new articles that save money and time; that add new ease to life.

The advertisements tell you of these products. They are reliable sources of information that keep women abreast of the time.

Read the advertisements. They will make the business of running a home easier. They will save you money and assure faithful quality in all that you buy.

-:-

Advertisements in the Decatur Daily Democrat tell you what is best to buy and where to get it.

Jiffy for Corns

WILL TAKE OFF CORNS.

We know you will be surprised and justly so, too. We were surprised when we tried them.

They positively will take that Corn off.

THE HOLTHOUSE DRUG CO.

ALSO JIFFY FOR BUNIONS AND CALLOUSES

You must say "QUICK QUAKER"

To get true Scotch flavor—famous Quaker Oats flavor—in quick cooking oats

THE difference in breakfast oats is flavor. Oats, originally a Scotch dish, must have Scotch flavor.

Quick Quaker has the toasty Scotch flavor that's so wonderful . . . famous Quaker Oats flavor.

No other brand has it. None successfully imitates it. It's due to exclusive Quaker milling of the finest, plumpest oats. Milling methods which

took some 50 years to perfect.

Makes all the difference in the world. Quaker Oats spoils folks for ordinary brands of oats. Cooks in 3 to 5 minutes. No kitchen muss busy mornings.

Due to Quaker milling methods, it supplies, too, the "roughage" you need to make laxatives seldom necessary.

Look for the picture of a Quaker on the oats you get.

2 Kinds { The Quaker Oats you have always known and Quick Quaker—cooks in 3 to 5 minutes
