Town Clock Off Duty With Case Of Frozen Hands

For the first time in several months, the clock in the court house tower failed to tick off the minutes and stopped at 6:30 o'clock last night. D. J. Hensley investigated the clock this morning and found that the hands had been frozen. The recent rains caused water to collect in the clock and last night's cold wave caused the freeze.

This is the first time since the middle of last winter that the clock has stopped and since May 1 it has not varied more than 15 seconds with the Western Union time received daily in this city. Repairs were made this morning on the clock and it is expected that it can be relied on, unless sleet or rain causes another stop.

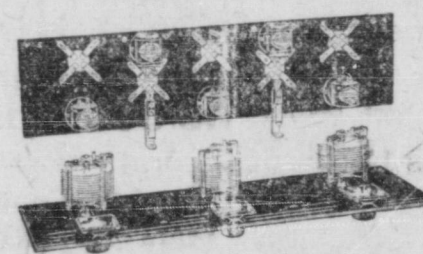

Premier 5 Tube ENSEMBLE

The Premier "Ensemble" in Beautiful, Attractive Three-Color Display Carton

"Quality Radio at a Sane Price"

Premier "ENSEMBLE" is not a kit—but a completely assembled though unwired Quality Radio Set. The user receives it in two completely assembled parts, which are put together with a screw driver in thirty seconds. No drilling, tapping or other machine work to do. No other tools required, except a soldering copper—and Premier furnishes that! The new, copyrighted Premier wiring plan with six color charts enables the most inexperienced to wire the set completely, and with certainty of success. Only one short evening of delightful fun and your "ENSEMBLE" is ready to operate.

As the "Ensemble" comes to you. Two completely assembled units. Thirty seconds and a screw-driver and you are ready to wire.

In beauty, too, the "ENSEMBLE" excels. Its 7x21 in. Genuine Bakelite panel is a perfect reproduction of selected black walnut. Its handsome black dials and knobs of special design give striking beauty to this quality "ENSEMBLE." The "ENSEMBLE" plan gives the user the privilege of selecting a standard cabinet from the many available styles to harmonize with the furnishings of his own home—and Premier "ENSEMBLE" will grace the finest surroundings. In engineering also, the ENSEMBLE is a forward step. The unique circuit and special design of apparatus used set new standards of volume, distance, tone quality and selectivity. Unlike the average tuned radio frequency set, the "ENSEMBLE" gives equally good volume and selectivity on all broadcasting wave-lengths, from 200 to 600 meters. The experimenter, and the man who enjoys radio for its entertainment and educational value alone, alike find the "ENSEMBLE" ideal radio. The experimenter, because the usual grief of set building has been eliminated, leaving only the delightful part, and the listener, because the "ENSEMBLE" brings to him the utmost in radio at a sane price.
