Scores of women have found relief from their distressing ailments when spinal adjustments relieved pinched nerves and restored normal nervous activity to the parts affected. For appointment call CHARLES & CHARLES Chiropractors Office Hours: 10 to 12-2 to 8 6:30 to 8:00 127 N. Second St. Phone 628

COURT HOUSE

Wife Seeks Divorce

A suit for divorce was filed in the circuit court today by Ida Kerr Cline against Lewis W. Cline. According to the complaint, the couple were married July 11, 1922 and separated November 16, 1922, when the defendant abandoned the plaintiff. It is further alleged that the defendant failed to provide for the plaintiff and their child. Mrs. Cline demands a divorce, the custody of their child, an allowance for the support of the child and alimony in the sum of \$1,000. Attorney Dore B. Erwin, of Decatur, is counsel for the plaintiff, who resides in Jefferson township.

Jones Neuenschwander et ux to Edward D. Engeler, lot 179 in Berne for \$5,000.

WANT ARSENAL
NEAR NEW YORK

(CONTINUED FROM PAGE ONE)

United the lightning rods and wires, causing a fire which brought the first explosion of T. N. T. encased in submarine depth bombs, according to one theory.

Plans for investigation by a formal board of inquiry were carried forward today, although it is unlikely that the board will be convened until the principal witnesses, Capt. Otto Dowling, commandant at the post, recovers from the injuries he received in trying to save his post from destruction. Word from the Brooklyn navy hospital that Dowling's eyesight was saved was received with gratification by his chief here.

Douling and the marines and sailors who fought with him probably will be singled out for special notice for their bravery.

Attend the Rodeo Saturday afternoon and evening at Belmont Park. Benefit Junior Band. 164-31

GUESTS ARE TRAPPED IN THEIR BEDS

(CONTINUED FROM PAGE ONE)

of them through the smoke and flame filled halls to windows and virtually threw them to volunteer firemen waiting below.

Troopers said that the bodies recovered were so badly burned that identification thus far has been impossible. Three were women and one was a man.

Several of the injured suffered fractured legs as they landed on the bare ground after jumping from a high window.

Word of the fire was soon spread to nearby towns and volunteer firemen came from Catskill, Tannersville and Haines Falls. They arrived too late to stop the fire and immediately organized relief and rescue work.

The Red Cross took charge of the injured who were taken to Haines Falls.

State troopers assumed the direction of the search of the ruins for bodies.

Guests who escaped without injury in most cases had lost their clothing and personal possession. Houses nearby were thrown open to them.

The hotel was patronized largely by Brooklyn, New York and New Jersey people. There were 48 guests listed on the register last night.

In addition to the guests many of the employees of the hotel were in the building and it was believed that the four bodies recovered probably were those of employees.

Of the missing seven were employees and 16 were guests. Fears for the missing were increased after noon when parties sent to check homes and resorts nearby for refugees reported they had found none whose names had been listed as missing.

At noon the flames were still so hot troopers were unable to go deeply into the wreckage.

At one o'clock this afternoon New York City policemen who were attending the Police camp at Tannersville reported they believed at least ten bodies were in the ruins.

Square dance at Sun Set Dance Pavilion Wednesday evening.

CHINESE CIVIL WAR IS RESUMED

Fighting Breaks Out On Large Scale; Casualties Not Extensive

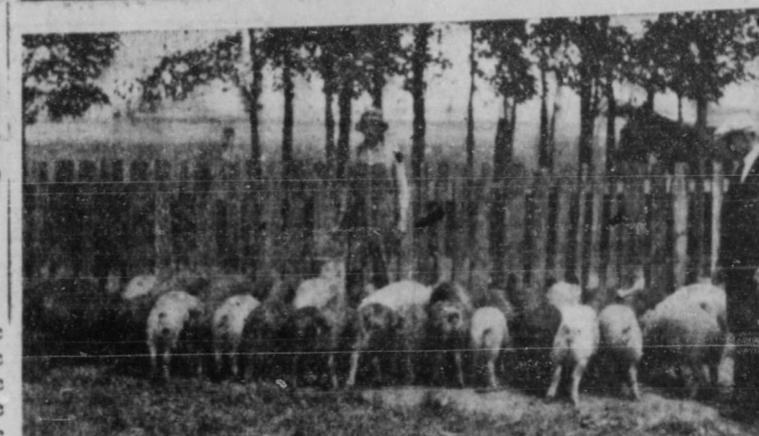

By Carl Hirsh
(United Press Staff Correspondent)
Shanghai, July 14.—(United Press)—The Chinese Civil War was resumed on a large scale today.

The Kuomintang, or Nationalist army, was resisting a severe attack in Nanking and had countered with a move against the Allies along the Tungtung front. The engagement arose from an effort by the Kuomintang to move artillery and munitions to Kalgan, where the main army retired last spring after its evacuation from Peiping by the allies. Marshals Chang Tso Lin, Wu Pei Fu, and Li Ching Ling.

Miss Clara Gerke of Root township was a shopper here this morning.

How To Make Ton Litters

Adams County Hog Raiser Gives Some Of His Secrets

Editor's Note: The following story and the accompanying photograph appeared in the July 10 issue of the Indiana Farmer's Guide. The story was written by L. M. Busche, Adams county agricultural agent, and the photo, snapped by Mr. Busche, shows three prospective ton litters on the farm of J. P. Habegger, Adams county farmer. The story and photograph are reprinted herewith through the courtesy of the Farmer's Guide.

The accompanying picture shows P. T. Brown, of the animal husbandry extension department, inspecting three prospective ton litters on the farm of J. P. Habegger, Adams county. Mr. Brown is in charge of the ton litter work in Indiana. The three litters shown consist respectively of eleven and eleven pigs. When seen they were approximately 100 days old and were estimated to weight at 100 pounds. The pigs are grade Durocs. The partly white pigs shown are from a grade of Chester White dam.

"When questioned by Mr. Brown, the proud owner had the following to say concerning the production and care of the litters thus far: "During the breeding season last fall the sows were running on timothy and white clover pasture. A little corn was the only grain they got. As winter approached I fed some ground oats slop in addition to the ear corn. During the winter a small amount of oil meal was added to the slop in order to keep them in proper condition. About a week before farrowing time I decreased the amount of corn and added some bran to the slop. About a week to ten days after the pigs were born I discontinued the oil meal, then I gradually increased the ration as the pigs made greater demand upon their mothers."

"As soon as the pigs would eat I added a 'creep' for them so that they might be fed independently of the mothers. They were hand-fed shelled corn and slop made of very finely ground oats and middlings. Their ration was gradually increased as they grew larger and at the present time I am using semi-solid buttermilk to balance the ration."

"Mr. Habegger's nine sows farrowed 82 pigs of which 68 were raised to weaning time. Most of the pigs that were lost were the older ones which contracted 'thumps' because the inclement weather made it impossible to give them enough exercise. As to the care of the sows at farrowing time, Mr. Habegger had the following to say: "The sows were kept in A-shaped individual houses. Before they were placed in these quarters I thoroughly cleaned and disinfected the houses with a standard stock dip. Most of the sows I scrubbed thoroughly with a stiff brush. A moderate amount of straw was used for bedding, it being changed each day during the extremely cold weather. I protected the pigs from the cold by closing the doors. Manure was piled about 2 feet high.
