

### Miles Women Walk In Preparing Meals Are Measured in Experiment

Stockton, Cal., Aug. 20.—(United Press)—Kitchen shortcuts to cut down mileage of the housewife preparing meals or baking a cake may be mapped out by the San Joaquin Farm Bureau home department, which is now making a survey, through the use of pedometers, in hopes of increasing efficiency in farm homes.

So far pedometer readings have revealed many interesting things. For instance, one woman walked one and three-quarter miles to get breakfast, while a neighbor, preparing breakfast for the same number of people walked only one-fourth mile. Arrangement of kitchen equipment has much to do with the difference.

Fifteen reports have been submitted to the survey board. One woman walked one-quarter mile getting lunch and one mile preparing dinner. Another woman walked one and three-quarter miles getting breakfast, three-quarters of a mile getting lunch and one and one-quarter miles preparing dinner.

The pedometer was not large enough to register the mileage of one woman who was baking a cake, one of the reports said.

### Plans to "Repair" Niagara Falls Must Await Canadian Vote

By HERBERT LITTLE  
(United Press Staff Correspondent)  
Washington, Aug. 19.—(United Press)—Repair of Niagara Falls must wait on elections.

Plans for the repair of the famous honeymooners' mecca, the edge of which is disintegrating, threatening destruction of the scenic value of the falls, has been held up by the United States and Canadian governments until after the Canadian elections. It is felt that the government commissions can act with more authority then.

A "sore tooth" cavity is causing the damage. A V-shaped notch on the edge is causing convergence of the waters, rapid eating away of the edge, much mist to spoil the view, and a promise to destroy the wide falls completely by cutting out a gorge. The notch is in the middle of the Horseshoe Falls on the Canadian side.

One plan is to build concrete islands in Niagara river above the falls to turn the flow over the other parts of the falls.

The edge of the falls has been receding an average of seven feet a year for many years, but heretofore its steep edge has been evened by preservation, according to Commerce Department engineers working under Secretary Hoover on plans for saving the place.

The falls on the American side are not wearing away so speedily. The engineers assert that the beauty of the American falls is not being lost, due to the even distribution of the water, which totals only 9,000 cubic feet a second, compared with the side.

Besides the concrete islands, plans to build concrete islands on the Canadian side have been suggested for reinforcement.

ment of the fringe of the cliff with concrete, and also for a submerged concrete weir, or dam, to be constructed above the falls. The concrete islands, it is pointed out, could be covered with trees and sod to prevent impairment of the natural beauty of the cataract.

### Family Budget One Of Biggest Factors Assuring A Successful Marriage

Washington, Aug. 20.—(United Press)—Adopt a family expense budget and you will do much to insure a successful marriage, Chase G. Woodhouse, of the U. S. Bureau of Home Economics, advises home makers, in a bulletin just published.

Scores of letters from housewives from all parts of the country telling of family troubles and asking for information on planning home expenses have been received by the bureau. In response to these pleas the bureau issued the budget plan.

"In order to spend wisely," the bulletin stated, "you must know what you have to spend. The first step in making your budget is to estimate your income. Next list all the articles and services that your family is likely to need during the year. List every expenditure. Set aside something for the 'rainy day' and take out insurance enough to care for the family."

"Now compare the totals of the two lists—your estimated income and your estimated expenditures. For safety the expenditures should be somewhat under the income. Go over the expenditures until this margin

### Abbreviated Costumes At Mask Ball Causes Discussion in London

London (United Press).—London society is still gasping over the variety of costumes—some allegedly greatly abbreviated—worn by some of the guests who attended the mask dance given by the Duchess of Sutherland at Hampden House.

Prominent among those in attendance were the King and Queen of Spain, who did not appear in mask dress and the Prince of Wales and his brother, Prince Henri, both of whom appeared in shiek's dress.

Everybody was there and "everybody" in England means all who count for anything in official blue books.

The greatest sensation of the evening was caused when eight of the most beautiful women in the United Kingdom appeared as a rowing crew from Maton. The crew had a coxswain, Alfred Duff-Cooper, husband of Lady Diana Manners. He shouted orders to his crew as they rowed their cardboard boat across the ballroom floor. They afterwards fell exhausted into the depths of the craft.

The crew consisted of Lady Victor Paget, Lady Brecknock, Lady Ednam, Lady Loughborough, Mrs. Richard Norton, Mrs. Dudley Ward, Mrs. Lionel Tennyson and Miss Poppy Baring.

### American Woman Swims Channel Nightly in Her Dreams While Training

Deal, Eng., (United Press)—Mrs. Clemington Carson of New York is swimming the Channel each night in

her dreams.

She is waiting for a chance to try the perilous long-distance swim from England to France, but her imagination already has put her successfully across many times. Experts on the spot declare her chances of completing the swim are as good as any of the women swimmers training for the test.

"In my sleep," Mrs. Carson said, "I keep dreaming of swimming your Channel. My dreams, of which I have had many, are so remarkably realistic that I actually see myself doing the swim sure enough and walking out of the water and up the sandy shore at the other end."

Her two children, Clem, aged three and a half years, and Majorie, aged two, appear in her dreams, she said, and seem to beckon her on. She looks upon her dreams as a good omen.

Mrs. Carson's speed in practice swims is increasing, her trainer said, and her swimming style is improving rapidly.

### Wheat Pouring Into Storage Elevators

Superior, Wis., Aug. 20.—(United Press)—Wheat from the "world's bread basket" is beginning to trickle into storage elevators here prior to shipment to the world markets.

Elevators here have a capacity of more than 20,000,000 bushels, but it is not thought likely that so great amount of grain will be stored this

year.

More than 3,000,000 bushels of wheat has found its way into the elevators during the past months. This figure represents in main, the crop from Kansas and little Minnesota and Dakota wheat has started the journey east.
