Trusteeship Settled
In the trusteeship under the will of Thomas Malley, the final report was filed and approved, the trustees discharged and the trust adjudged settled and closed.

America's Only Active Volcano Studied In Effort To Learn How It Works

(By Homer L. Roberts, United Press Staff Correspondent)

Sacramento, Cal.—Delicate instruments, capable of taking the temperature, recording the heartbeats and feeling the pulse of America's only active volcano, Mt. Lassen, are soon to be provided in Lassen National Park as a result of an act of congress.

Like the famous Hawaiian volcano, Kilauea, Mt. Lassen is to be equipped with an underground laboratory, containing sensitive instruments to record each new tremor or outbreak, while overhead the volcano will be harnessed with precise levelings, temporary seismograph stations, gravity stations, chemistry laboratories and other equipment necessary to record the daily changes in the great volcano.

This announcement was made by Dr. T. A. Jaggar, chief of the section of volcanology, United States Geolo-

gical Survey, who recently made a thorough inspection trip through Lassen National Park, where he conferred with A. L. Conard, president of the park association.

California has other volcanic phenomena, Dr. Jaggar declares. In Northern Sonoma County is situated in entire valley filled with "fumaroles" or steam geysers, some of which are being harnessed to generate electric power. All these are due to receive government investigation when proper state cooperation and funds are made available.

German Trade Next To U. S. And Britain, Gaining Position Held Before War

Washington—(United Press).—Germany, although defeated and almost bankrupt in the World War, today stands third among the leading nations of the world in foreign trade, according to the U. S. Department of Commerce.

A comparative analysis of international trade statistics by the department shows that Germany, since the war, rapidly has been regaining her former position in the commercial world. She already has surpassed France and now stands next to United States in foreign trade. The United Kingdom leads.

From 1924 to 1925 Germany's foreign trade increased 35.5 per cent while France's trade decreased 1.4 per cent. At the same time the foreign trade of the United States increased only 11.4 per cent and that of the United Kingdom 10.9 per cent.

In 1913 the value of Germany's foreign trade was \$4,970,000,000, and in 1925 it reached \$5,052,000,000. Due to the decreased value of the dollar, however, the 1925 figures do not actually show an increase over the total in 1913.

France's foreign trade in 1925 was valued at \$4,262,000,000 and in 1913 at \$3,053,000,000.

Meanwhile, United States with a foreign trade valued at \$9,136,000,000 in 1925, is pressing the United Kingdom, which in 1925 had a total trade valued at \$10,867,000,000.

Mankind Said To Do Its Best Thinking When It Is Too Cold For Comfort

Oxford (United Press).—Mankind does its best thinking when the weather is a little too cold for comfort, according to Professor H. J. Fleure, surveying the year's advance in anthropology before the British Association or the Advancement of Science.

"We must not argue too crudely that man's 'ideal climate' is the climate of the region in which modern man originated," he said.

"The most we can say, in that respect, is that as his constitution seems tuned to certain climatic conditions, those conditions are probably not very far from the conditions obtaining in the region in which he evolved, admitting at the same time that quite possibly he migrated into a region other than the one to which he was accustomed and so gained, perhaps, an access of vigor."

"Certainly man's mental processes are most active at a temperature below that of the greatest comfort physically. Olbricht has gone so far as to venture the suggestion that the great mental advance to the fully human condition of the race probably occurred in a cold, bracing period, perhaps one of the later phases of the Ice Age."

"The conditions that make us today unctious most actively are those of a climate with temperatures usually varying between 70 degrees and 20 degrees Fahrenheit, without too long spells at either of these limits, with enough but not too much bright sunshine and with variability and storms as a feature."

"Very great cold appears to have deleterious effects mentally and physically."

MERTON ENDS HIS TESTIMONY

Prosecution In Daugherty-Miller Case Turns To Activities Of King

New York, Sept. 15.—(United Press) Richard Merton completed five and one-half days of testimony in the Daugherty-Miller conspiracy trial today and the prosecution of the former attorney general and former alien property custodian turned to tracing the activities of the late John T. King, of Connecticut, former republican national committeeman.

It was to King, according to Merton, that Merton paid \$441,000 in "commission" for securing return to Swiss interests which he represented of \$7,000,000 assets of the American Metal company, seized by the alien property custodian during the war.

C. J. STEIGMEYER IN NEW POSITION

Former Decatur Man Named Advertising Manager Of News-Sentinel

Clem J. Steigmeyer, son of Joseph Steigmeyer of this city, has been appointed advertising manager of the News-Sentinel, Fort Wayne, Mr. Steigmeyer is a former Decatur boy, having attended the Catholic schools and being a graduate of the Decatur Public schools. Following his graduation from Indiana University, he accepted a position with the Fort Wayne Journal-Gazette, remaining there until the outbreak of the war. He served in the army 19 months and then returned to the Journal-Gazette.

About seven years ago Mr. Steigmeyer accepted a position as advertising manager and director of extension work of the First National Bank, Fort Wayne. He assumed his new duties today and his friends in this city will be glad to learn of his continued success. He has been active in civic affairs in Fort Wayne and is well known there.

American Boycott Is Proposed By Natives Of Philippine Islands

Manila (United Press).—Sentiment among Philippine extremists in favor of a boycott against American business men in the islands who are actively fighting the independence movement, has been greatly stimulated by the introduction of several bills in Washington designed to curtail native autonomy in the Philippines.

Senator Osias, who is also president of the National University and recognized leader of the radical student element, addressing a mass meeting openly advocated the use of the boycott as a weapon against Americans and British firms which are contributing money to the campaign against independence.

The meeting was chiefly for the purpose of denouncing the Kieiss Bill No. 1 which would strengthen the powers of the American auditor in the Philippines, the Kieiss Bill No. 2, which would strengthen the powers of the governor general, and the Bacon Bill, which would amputate Mindanao and other Moro lands from the main body of the archipelago.

About 4,000 persons crowded into the Grand Opera House and cheered vitriolic denunciations of "American imperialism."

New Calculations Disprove Newton's Equilibrium Theory

San Francisco, (United Press).—Astronomical revelation, disclosing what is claimed to be a new law of nature finding Newton's equilibrium theory in error, has been made by Captain V. S. J. See, government astronomer at Mare Island.

Captain See's calculations, which have definitely been accepted by leading scientists, prove that tides originating in the Pacific Ocean cause the globe to wobble on its axis and his theory fixes the rigidity of the earth as three times that of standard steel.

The discoveries followed a series of minute and highly exact calculations of tidal heights and were a consequence of the efforts of Captain See to determine the cause of a variation of the earth's latitude, caused by the rotation of the North and South Poles once every 14 months about the true axis or mean position.

The government astronomer not only succeeded in proving that this variation, a puzzle to scientists since its discovery, is caused by tides originating in the Pacific Ocean and traveling westward, through the Indian and Atlantic oceans to the shores of France, but he found that Newton's theory by which the average height of tides is calculated, is in error and that under a heretofore unknown law of nature, the average height is twice that calculated by the discoverer of the law of gravitation.

Captain See's findings settle definitely two points upon which scientists have speculated for more than 100 years, it is claimed. They establish that no large bodies of land exist between Alaska and the North Pole, and they prove that the center of the earth is not liquid.

PRIMARIES SPELL DEFEAT FOR TWO LEADERS TUESDAY

(Continued From Page Two)

With approximately 9,000 votes to be tabulated, the vote has Smith 79,463; Brown 74,551.

John G. Richards defeated Ira G.

Blackwood in the gubernatorial race.

Vermont Nominates Weeks
Burlington, Vt., Sept. 15.—(United Press).—Judge John E. Weeks, has been nominated for Governor by the Republicans of President Coolidge's native state virtually complete returns from yesterday's primary showed today.

Returns from 235 cities and towns out of 248 in the state gave: Weeks, 23,230; Max Powell 14,847; Lieut. Governor Walter Farnsworth 10,933.

There were no Democratic nominations.

Gov. Groesbeck Defeated
Detroit, Michigan, Sept. 15.—(United Press).—Governor Alex J. Groesbeck has been defeated for the Republican gubernatorial nomination by an indicated majority of at least 75,000 votes by Mayor Fred Green of Ionia, incomplete returns from Tuesday's primary indicated today.

Returns gave Green 243,657; Groesbeck, 146,080.

Groesbeck is serving his third term as Governor. Green assailed Groesbeck's pardoning of 5,000 prisoners.

New Orleans, Sept. 15.—(United Press).—Running neck and neck, Senator Edwin Broussard and Fred Y. Sanders, the former wet and the latter dry, were within 50 votes of each other in Louisiana's Democratic senatorial primary race early today.

The result is not expected to be determined until returns from the last precinct have been tabulated.

MRS. McPHERSON DECIDES TO QUIT "FIGHTING BACK"

(CONTINUED FROM PAGE ONE)

attorney Osa Keyes today by Miss Bernice Morris, secretary of R. A. McKinley, blind Long Beach attorney who was killed recently in an automobile accident.

Miss Morris told the prosecutor that her employer had been dealing with Mrs. McPherson concerning a plan to produce a trio of mythical kidnappers and find a desert shack to fit the Evangelist's story of her kidnapping and imprisonment.
