### Twin Girls Near End Of 162-Mile Swim

New York, June 30.—(UP)—Bernice and Phillis Zintfield, the 13-year-old swimming twins, arrived at the 158th street dock at 7 a. m., today, completing the next-to-last lap of their 162-mile swim down the Hudson from Albany to the battery.

The twins left Yonkers at 5:30 A. M. they arrived in Yonkers at 5:30 p. m., yesterday from Tarrytown, 14 1/2 miles up the river.

The twins planned to resume their swim from 158th street at 1:30 p. m. expecting to land at the battery about 3 p. m.

They have now finished 155 miles of the swim in 49 1/2 hours actual time in the water, their trainer, George Mains, said. It puts them well ahead of the record of 57 hours and 11 minutes for the entire swim made last year by Mrs. Lottie Moore Schoemmel.

plane, "Bird of Paradise."  
The decision yesterday was in response to a request from Gen. Mason Patrick, air corps chief, now at San Francisco, for permission for the return flight.

The United Press was told the decision still stands.

#### Central Normal Has Record Graduating Class

Danville, Ind., June 30.—Central Normal college is in the midst of its fifty-first annual commencement activities, with the largest class of seniors in the school's history to receive their diplomas tonight.

The class of 1927 has a roll of 85 members and the registrar's record shows that 82 of these will receive A. B. degrees.

A feature of today's program will be a pageant: "The Coming of Education to the American Forest," given by students of the physical education department under the direction of Mrs. Russell Cook, of the athletic department. Dr. H. M. Whistler, former vice-president of the school and now of the state department of education will give the commencement address on "The Measure of Values."

#### Horse Racing To Come Into Its Own In Chicago

Chicago, June 30.—(UP)—Horse racing will come into its own in Chicago Saturday with the opening of the \$2,000,000 Lincoln Fields track under state supervision, with pari-mutuel betting legalized.

The Lincoln Fields summer meeting is the high spot of the longest Chicago racing season in more than 25 years. The second running of the Lincoln handicap on July 9 will be the feature.

While betting has been going on under a modified mutuel system about Chicago for the past three years, the Lager bill, legalizing race track speculation, will make possible first class racing without the handicap of operating under injunctions, and various interpretations of state laws.

CINCINNATI—Carl Mays, veteran pitcher of the Cincinnati National League baseball club, will be out for the remainder of the season following an operation for hernia.

## BYRD GIVEN MAIL FOR EUROPE

## CANADA THISTLE SHOULD BE CUT

### County Agent Warns Farmers Against Letting Weed Pest Go To Seed

(By L. M. Busche, County Agent)

The opinion of farmers generally is that Canada thistles have been increasing in Adams county the last few years. This is undoubtedly due to the fact that farmers have been careless in permitting them to bloom and produce seeds. Although some are inclined to think the seed will not grow, tests made in this part of the state has proven beyond all doubt that one can produce a nice crop of thistles simply by planting seeds. New patches constantly being found at considerable distance from old patches, also lends additional proof to the folly of permitting them to mature.

If those who think the Canada thistle is not an important enemy would make a trip to parts of Michigan or Canada where no effort has been made to control them, they would come home with a firm determination to eradicate them as quickly as possible. In these localities as well as in New York state and other parts of the east, land has depreciated greatly in value due to the fact that farmers prefer farms free from thistles. Those who do not object to handling the thistles in grain or hay or to working with them while the field is in cultivation, should at least have respect enough for their neighbors to prevent them going to seed. This can be done only by keeping them from blooming.

Of course there is a state law relative to Canada thistles. It provides that thistles shall not be permitted to attain height of more than 6 inches. Also, it provides that thistles shall not be allowed to produce seeds at any height. However, a law is only as effective as those concerned make it. Accordingly we cannot depend upon the Canada thistle law to do much good. It will be only by the full cooperation of every one having thistles, that we can eradicate them. Every man should consider it his duty to kill the thistles on his farm. He should consider it not only from his personal standpoint but more especially from the fact that he is morally obligated to protect his neighbors.

Thistles can be killed. Those who think they cannot are merely hunting an excuse to avoid work. There is no easy method, however, various signs and dates to the contrary notwithstanding. Various successful methods have been used and anyone wishing to put them into effect will be given the information if desired.

MINNEAPOLIS, Minn.—Through effective pitching by Homer Wilson the Millers defeated Kansas City today 7-3. The Blues bunched four hits for all of their runs in the eighth.

MILWAUKEE, Wis.—St. Paul hit three Milwaukee pitchers hard to win the opening game of the series 10-7.

## FLIER REPORTED SIGHTED OVER CITY OF BREST

(CONTINUED FROM PAGE ONE)

ships at sea and messages wireless from the America showed.

The constant stream of automatic dots and dashes spelling-WTW, which the America sends out when it is not broadcasting messages, was heard by two ships off the Irish coast in the early morning hours.

At 8:20 a. m., Greenwich mean time, (4:20 E. D. S.) the S. S. Berlin at 48.15 north latitude and 25.15 west longitude heard the WTW signal, it reported by wireless to Devizes radio station, England.

At 8:30 a. m., G. M. T., (4:30 E. D. T.) the S. S. Hamburg, 49. 16 north latitude, 14.39 west longitude heard the signals, it wirelessed the Valencia, Ireland, radio station.

The Hamburg's position was estimated to be 275 miles southwest of the Irish coast. The Berlin was some 600 miles west of the Hamburg.

Since the America's range is only about 300 miles, the indication was that it was between the two ships. Unless it had increased remarkably its 100-mile an hour average speed of yesterday, it must have been much nearer the Berlin than the Hamburg.

Calculating on the basis of 100 miles an hour, and assuming the ship had not lost its direction in the heavy fog through which it fought its way all night, Grover Whalen, vice-president of the America Trans-Oceanic company, estimated the America's probable position at 8 a. m., as 800 miles west of Ireland.

A later version of the S. S. Berlin's

## PUBLIC SALE

Plenty of cut flowers for bouquets.

Funeral work a specialty. It will pay you to call and look the stock over.

CARL FISHER GREENHOUSE COMPANY

report, given out at Roosevelt Field, said the plane was 50 miles north of the ship when the signals were heard, and that the ship's operator was unable to reach the America with messages.

Whalen then estimated the America was 600 miles from the Irish coast at 4:20 E. D. T., and was 90 miles south of her original course, probably due to deflection in response to British weather warning of storms.

Whale calculations may have been off. The Berlin's position was later more than 600 miles from the America.

Twice early morning, the America sent messages but failed to get position or tell any details of it except that the fog was bad.
