

### Radio "Doctor" Says Static Will Remain In Sets For Years To Come

Wahash, Ind., Feb. 1.—(UP)—Static that has been the bane of radio listening for years, will remain in sets for many years, according to Carl Baber, one of the "doctors" on the static committee of the Radio Listeners Club. "It will take a number of years to eliminate all the unwelcome noises in radio reception," he said. "Before we can do away with this interference, every electrical apparatus, light wire, and electric motor will have to be inspected." The electric iron and curling iron, electric vibrating machines, had connections in wiring, wires rubbing against trees and things named by Baber that produce static. "Doctors" x-ray and violet-ray machines and electric motors of all kinds, elevators, air compressors and many other necessary things are the villains that cause that dreaded crack on the radio just when the best part of the program is coming in," Baber declared. Baber said that many of these static manufacturing plants could be done away with. For instance, new bridges or armatures could be put on electric machines, doctors could have their motors grounded at a small cost, and the electric wiring of each home could be checked for loose connections. "Telephone wires do not cause static, but electric wires do. Loose connections between traction rails cause static. Of course, everyone knows lightning is natural broadcast. Lightning is the worst kind of interference and probably never will be eliminated," the "doctor" concluded.

### State Bar Plans Educational Campaign

The Indiana State Bar Association is making plans to conduct an educational campaign throughout the state for the purpose of educating the citizens of the state in the principles and essential elements of the state institutions and in the fundamentals of constitutional government. A chairman has been selected in each county so that organizations desiring to have some lawyer address them on subjects relating to this work, can communicate with the chairman for that county who will assist in finding some speaker for the occasion. Attorney Henry B. Heller, of Decatur, has been appointed chairman for Adams county. Several organizations have given their hearty endorsement and cooperation to the movement. Such organizations are the state department of public instruction, the state chamber of commerce, Indiana Rotary, the Kiwanis Clubs of Indiana, the Lions Clubs of Indiana, the Daughters of the American Revolution, the Indiana League of Women Voters, the Federated Club of Indiana and the State Woman's Council.

A national oratorical contest on subjects relating to the Constitution is held under the auspices of the Bar Association, each year.

**SANDBORN**—Two Linton men who had 48 cans of fruit in an automobile in which they were riding when it crashed into a telephone pole near here solved the following problem. If an automobile containing 48 cans of fruit crashed into a telephone pole, how many cans will be broken? The answer is 40.

## MARVELOUS WORK OF NEW KONJOLA MEDICINE TOLD

Smith, Yager & Falk Drug Store  
To Introduce Advanced Remedy For First Time  
In Decatur

If you were told that one single medicine put hundreds of men and women back to work in Indianapolis, and other large cities after they had been idle for months with health trouble, it would sound impossible, wouldn't it? And that countless

G. H. MOSBY,  
Discoverer of Konjola

people were completely relieved of rheumatism and neuritis, that they were able to walk again, without canes or crutches, and that this same medicine restored health to men and women who had suffered with stomach and kidney troubles for years, that complete relief had come in cases of misery where health resorts, expensive treatments and medicine upon medicine had failed—indeed it seems impossible. Yet it is all true, and the medicine that has done all these things is the new Konjola, which is being introduced starting today at the Smith, Yager & Falk Drug Store.

Wherever introduced, this Konjola is vastly different and more effective in thousands of cases of ill-health than any previously known medicine. It is a remarkable liquid compound for the following well known troubles: Rheumatism. Especially severe cases, where pains are intense, muscles swollen, joints stiff and rigid. In the milder cases of this disease, Konjola relieves almost at once, and this medicine brings the same results to the neuritis victim that it produces for the rheumatic sufferers.

Stomach, Liver, Kidneys and Bowel Troubles: Nearly all forms of misery that arise from these unhealthy organs, have been so quickly relieved by Konjola that men and women sufferers everywhere were surprised. It is the action of this medicine on the organs of the inner-system that removes toxic poisons from the system and brings quick relief in so many cases. The secret of this Konjola is the way it acts on the important functional organs of the body, namely, the stomach, liver, kidneys and bowels. So many diseases and long standing disorders of these organs were so completely conquered and entirely banished by this new compound that thousands of people in larger cities were able to give up taking medicine for time to come.

After the great accomplishments and wonderful work of Konjola in other sections, it is declared that this medicine is what hundreds of sufferers in Decatur and vicinity have long needed to actually reach their cases, and preparations are being made to introduce Konjola for the first time at the Smith, Yager & Falk Drug Store where this medicine will be sold and explained to the public daily.

### Aviator Delivers Paper To Farmer Every Morning

Lafayette, Ind., Feb. 1.—(INS)—Aviators in the World War were about the only exponents of "sportsmanship" and this attribute has been continued by the modern "bird men."

Because he aided a mail flyer who landed on his farm, W. F. Shoup who lives near Battle Ground, has the distinction of being about the only man in Indiana who has his morning paper delivered by airplane.

When one of the mail flyers needed aid after a mishap Shoup rendered him all the assistance he could command. The flyer flew away with a wave of the hand. However, each day since then a tiny package drops out of the plane as it flies overhead and the package, landing on Shoup's doorstep, always contains the latest paper.
