After a social hour of visiting and music, the tables were spread with delicious food. All the good eats of the rural household were in evidence. To say the pastor was surprised is to put it mildly. The evening was fittingly closed with singing of gospel hymns and expressions of appreciation and enjoyment.

## Disposition of Dead

## Has Wide Variation

Ceremonies associated with the various methods of disposing of dead over are as interesting as they are varied.

Modern nations as well as many primitive and oriental peoples practice inhumation, and with it their many and peculiar rites. But, as in bygone days, funeral ceremonies of today are most sacred and impressive occasions.

Cremation or the burning of dead bodies to ashes, is now practiced to a small extent in several countries, but is by no means new, says the Pathfinder Magazine. At the beginning of the Christian era cremation was the prevailing custom of the civilized world, with the exception of Egypt, where the dead were embalmed; Judea, where they were entombed in a sepulcher, and China, where they were buried in the earth. Christian inhumation, which is now universal, probably owes its origin to the doctrine of resurrection of the body. While cremation was practiced by the later Greeks, Romans, Danes and others, the first cremation societies were not formed until the Nineteenth century. This method of disposing of human bodies is now urged by some health authorities on sanitary grounds.

## Love and Youth Can Always "Find a Way"

Will love find a way? asks the Boston Globe, which then goes on to tell this: The observer had missed his train and was forced to wait an hour for the next. As he walked through the crowd of passengers from an incoming train he noticed the warmth of embrace of a young man and his girl friend. Apparently she was welcoming him home from a long trip. Ten minutes later he saw them in a strange hold as a train emptied its passengers at another gate. As the crowd dispersed, they parted. The boy friend was trailed to the waiting room, where he met the girl, greeted her sans embrace, and sat down for a chat again. As another train was announced, they again departed. The youth mingled with the incoming crowd and the girl ran up to meet him. To the ordinary onlooker it was a fond welcome home, but to the observer it was an ingenious system of getting in public. Love will find a way.

## Contempt Charge Against Harry Blackmer To Stand

Washington, March 21—(UPI)—Justice Frederick L. Siddons of the District of Columbia supreme court today overruled a motion of attorneys for Harry M. Blackmer, missing Teapot Dome oil witness, for dismissal of contempt proceedings against the defendant, and restoration of \$100,000 worth of property seized from Blackmer pending settlement of the case.

Siddons' decision upheld the constitutionality of the Walsh act which permits courts to subpoena a citizen of the United States living abroad. He said: "It appears clear that the allegiance of a citizen of the United States, actually living in a foreign jurisdiction, includes the duty of obedience to the laws of the sovereignty to which the allegiance is due. Indeed, without such obedience, allegiance would be but an empty name."

## Man Who Concealed Pat McDermott Found Slain

Cleveland, Mar. 21.—(UPI)—Bodies of two men, one identified at Morris (Ben) Nadel, who concealed Pat McDermott, convicted of complicity in the murder of Don R. Mellett, Canton, Ohio, editor two years ago, were found today on a lonely road near Willoughby. They had been shot to death.

Police believed the killing was the result of rum running activities or a possible flare back of the Mellett case.

## Progress in Lighting

A common laborer of today works about ten minutes each day to pay for the lighting of his home by means of electricity. A half-century ago he would have had to work two and one-half hours to provide the same amount of light by means of gas flames. And if he had supplied himself a half-century ago with the same amount of light from candles he would have had to work 24 hours every day to pay his lighting bill. For this great reduction in the cost of artificial lighting, modern science is responsible. —Scientific American.

## Neuritis Made Work Very Difficult

Also Had Stomach and Kidney Pains. Is Perfectly Well Now.

Those who are crippled by rheumatism, or tortured by stomach or kidney trouble, will find good news in the prompt recovery of health made by Mrs. G. O. Lutzenhuser, 621 E. 7th St., Auburn, Ind. She writes:

"Three years ago my kidneys began troubling me, I began to have back-ache and was often disturbed at night. My stomach went back on me, food wouldn't digest, gas formed and pains me intensely, and I was made miserable by constipation, headaches and dizzy spells. But the worst of all was neuritis which crippled my right arm so bad I could hardly work. At night, my feet and lower limbs would swell up and ache, and the neuritis pains were almost worse than tooth-ache. I had just about given up hope of ever being well again, but I made one more effort and started taking Viuna. Soon I noticed I had less neuritis and now, after taking four bottles, the neuritis and the limb swelling have entirely disappeared. My kidneys are fine and never disturb me now, and the back-ache is gone. I can eat good meals and have no gas, stomach pains, headache or constipation. I am getting good sleep and feel just fine in every way. I gladly recommend Viuna, and can't begin to tell how wonderful it is."

Viuna acts promptly on sluggish bowels, loss of appetite and weak eyes. It purifies the blood, clears the skin, restores tone and digestion, and brings new strength and energy to the whole body. Take a bottle on trial. Then if you're not glad you tried Viuna, your money will be refunded. \$1 at druggists' main points by Leeland Medicine Co., Indianapolis, Ind.
