Fred Kepford, ninety-year-old Civil war veteran has married Sarah Crow, a seventy-two-year old lady. The young folks just will have their fling these days.

We notice that most of those who are filing charges against Rev. Shumaker are those who would not get any votes he could control any way, which we presume is very natural.

Statistics show the negro population is decreasing in Dixie, which probably accounts for the fact they can send a negro to congress from one of the Chicago districts.

A judge down in New Orleans has just decided that a smell of liquor coming from a house isn't evidence but we wonder what the man who is looking for a drink would think about that.

Vice-president Dawes has appointed a committee of five to investigate campaign expenditures of presidential candidates but we notice that neither Walsh or Reed are included. These gentlemen get a little too earnest in such matters to suit some.

Don't forget after you have the yard all cleaned and the debris hauled away that a coat of paint adds about as much to the buildings as any thing you can do and the cost is insignificant compared to the increase in value and satisfaction.

If you wish to hear Tom Adams take "the hide off the Coffin-Jackson-Schortemeier squad" as he puts it, tune in at nine o'clock tonight on WLW. The Vincennes editor says he intends to shoot up his opponents with both barrels.

It is needless to tell the candidates that election day is near. They know it and are working overtime to see the voters. Its you folks who will decide who shall be the nominees that should remember it and get busy. It is important that a large vote be cast in Indiana this year to show the world that we intend to clean up.

While the vote cast in California was two to one favorable to the republican party it should be remembered that Mr. Hoover claims that state as his home when he is in this country and that the democratic vote was much larger than usual. There was nothing about it to discourage democrats.

The German-Irish crew will attempt to fly back across the Atlantic when they return home, thus being the first to accomplish a round trip. The boys have received a wonderful reception in this country, and if they succeed in flying home, will be as busy over there the next year as Colonel Lindbergh has been in this country.

Tenth street is to be resurfaced with natural rock asphalt, improving that thoroughfare and adding to the value of properties located thereon. The only street in the city thus covered is Winchester street from Adams to the Cloverleaf railroad and it is smoother now than when put on last summer. It is believed it will prove durable and in every way satisfactory and if it does there is a probability that many streets in the city will eventually be so rebuilt.

ability that many streets in the city will eventually be so rebuilt.

Anyway the indications are that the campaign this year is to be a real one with plenty of enthusiasm and earnestness. Political writers predict there will be more red fire and torches than have been seen in thirty years. Thats no doubt true so we may as well get ready for it. A few months ago it looked as though it would be a one-sided affair but not now.

While it has been admitted by experts that "bats" would prove excellent eradicators of the corn borer, the suggestion has been turned down for the very good reason that there are not enough bats. The average farmer would just about as leave have the corn borer to bother with as to have to be dodging bats all the time and besides the women folks would object for there is an old belief that the pesky flying mice carry bed bugs.

Congressman Rathbone has introduced a bill for the creation of a committee to investigate the needs of an additional east and west highway extending from coast to coast. In the near future the government will construct several real trans-continental roads and it would be fine to be upon one of these. Why not get in touch with this gentleman and see if we cannot sell him a route through this county? Its a big task of course but one well worth doing for their will be no doubt about the merit of being on such such a highway. Besides the benefits to be derived from building such a road the continual traffic sure to follow makes it a worth while thing to go after.

Senator Borah in an able speech at Chicago the other day declared that corruption will be and should be one of the chief issues of the coming campaign and one by which the republican party's fate at the polls will be spelled. Concluding an address entirely upon the efforts being made to "cover up" he said: "You will hear it said in these days that democracy as a form of government is breaking down—that upon the complicated question of modern industrial life the people cannot successfully pass. We need not debate that question now. But make no mistake that upon the great questions which involve national honor and public decency the people have an interest that is insatiable and an instinct that is sure."

IN MEMORIAM

In memory of Benj. F. Beavers M. D.

The angel of death has entered our society, and we are called to mourn the loss of a faithful friend and co-worker. We cherish his memory tenderly as a true friend and doctor.

We shall meet him again in a blessed reunion after life's work is over and greet him in the land where our heavenly Father has prepared a place of eternal rest, for his faithful children. And there we will realize more fully that his work in this life for the benefit of humanity has not been in vain.

Resolved that Adams County Medical Society extend to the bereaved family our deepest sympathy in their affliction. And that a copy of these resolutions, be sent to the family. Daily Democrat and a copy spread on our minutes of record.

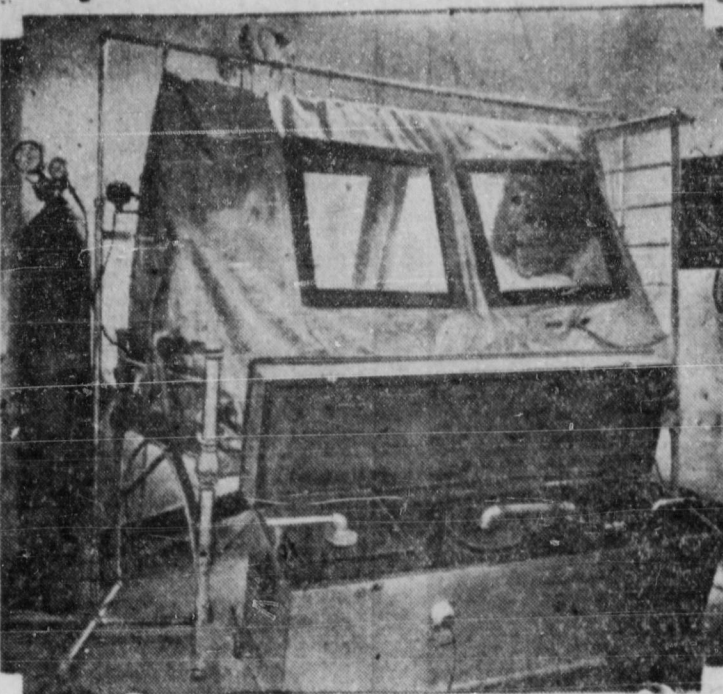

Signed

Allen J. Miller M. D.
James M. Miller M. D.

Not Asleep

We talk of certain people "waking up to find themselves famous," but they have probably been wide awake all the time.

DESPERATE EFFORTS OF NO AVAIL

This is an oxygen chamber such as was used in an unavailing fight to save the life of Floyd Bennett. The pneumonia which he contracted while flying to aid his marooned fellow aviators was too far advanced for any known means of science to be of any use.
