## Cementing Celluloid

Two pieces of celluloid may be joined together by applying glacial acetic acid, pressing the parts together. The principle involved in making celluloid adhere to other materials depends upon dissolving of the celluloid and cementing it to the desired material while it is still in a tacky state. It is possible also that the use of Canada balsam as an adhesive may prove satisfactory. This material gives a surface which remains tacky.

## Rain Foiled Burglars

Burglary of a dress shop in New York was called off on account of rain. The burglars had cut a two-foot hole in the roof, but drops of water from a storm that was passing over the city came through the hole, completing the electric circuit of an automatic burglar alarm and called the police.

## Knighted by King

He's Sir George Wilkins now, is the intrepid Australian soldier of fortune who flew over the North Pole for the honor of England and the advancement of science, King George having bestowed knighthood upon him in his birthday list of honors. The doughty explorer plans an Antarctic expedition late this summer, but disclaims any intention of making a race out of it with Commander Richard E. Byrd.

## WHEAT ACREAGE IS FAR SHORT

Lafayette, Ind., June 8.—(U.P.)—Approximately 791,000 acres of winter wheat is left for harvest in Indiana, the lowest wheat acreage recorded since the Civil War, according to the state crop report announced recently by the department of agricultural statistics of the Purdue University agricultural experiment station, working in co-operation with the United States department of agricultural.

A loss of 65 per cent of the winter wheat crop planted in the state during the past season is reported, the highest average of loss since reports have been compiled.

A total of 1,569,000 acres seeded has been abandoned, the largest loss of acreage in the history of the state with the exception of 1900, when it was slightly exceeded, but in that year there was a much larger acreage planted. It is generally conceded that the loss has been due to sharp drops in temperature, reaching or going below zero, following precipitation which came as rain instead of snow. It was thought that little of the loss has been due to heaving, which in past years has proven destructive.

The reported crop condition of 52 per cent is the lowest since 1912. The condition indicates a yield of 10 bushels per acre on the acreage still standing, or 7,910,000 bushels of wheat compared with 27,621,000 last year and a ten-year average of 31,881,000 bushels.

Rye, like wheat is also reported low, 61 per cent of a normal, lower by 15 points than that of 1899 and 1904, which are the lowest in the past forty years. The indicated yield from this condition is 9.16 bushels per acre, compared with 13.6 last year and a ten-year average of 13.7.

## COURT HOUSE

In the case of the state on relation of Alva C. Neuenschwander et al vs. the Town of Berne, the court ordered the portion of Logan street between Cleveland and Berne streets, vacated, as sought in the petition.

Case Dismissed  
The case of John Hill vs. Emery Hindenlang et al was dismissed on motion of the plaintiff.

Arrested For Non Support  
Grover Bucher was arrested late Thursday on a charge of failure to provide. He was released under \$50 bond.

## Will Probated

The last will of Ernest Kruechebergh was probated today. The entire estate was bequeathed to the widow, Emma Kruechebergh. The widow was appointed executrix and she filed bond in the sum of \$7,000. The will was written May 22, 1928.

## And Men

If you want something done never ask an idle woman; ask a busy one. Idle women either can't or won't. Busy women work a little harder and quicker and willingly do a little more.—

## Thyroid and Paralysis

The thyroid gland is so closely linked with the nervous system that abnormal conditions of the gland often cause paralysis. Removal of part of the gland sometimes produces paralysis, which can be relieved by removing more of the gland.

## "Dry" by Public Opinion

Temperance problems cause no trouble in Afghanistan, for the country is "dry" of its own free will. That is to say, there is no law against the sale or consumption of intoxicants, but public opinion is against it.
